---

## Introduction

---

The Florida Department of Health is pleased to release the 2010 Orange County, Florida Communities Putting Prevention to Work (CPPW) Behavioral Risk Factor Surveillance System (BRFSS) Data Report. In 2010, 2,586 Orange County adults, aged 18 years or older, completed the CPPW BRFSS survey. This survey was developed in collaboration with national, state, and local representatives to better meet the needs of programs, researchers, and community planners by providing estimates of prevalence of personal health behaviors that contribute to morbidity and mortality among adults in Orange County.

The 2010 CPPW BRFSS survey collected data on a variety of issues related to health status, healthcare access, lifestyle, chronic illnesses, and disease prevention practices. These data can be used to: (1) determine priority health issues and identify populations at highest risk for illness, disability, and death; (2) plan and evaluate prevention programs; (3) educate the community and policy makers about disease prevention; and (4) support community policies that promote health and prevent disease.

This report examines county level estimates for leading health indicators, each of which is presented by sex, race/ethnicity, age, education, income, and marital status. The 2010 CPPW BRFSS survey data are adjusted, or “weighted”, so that the resulting estimates can be generalized to all Orange County adults aged 18 years or older.

The weighting methodology for the 2010 CPPW BRFSS data is iterative proportional fitting, or “raking”. Raking is a commonly used estimation procedure where estimates are controlled to population totals or control totals. These estimates are adjusted by one demographic variable at a time until all variables have been adjusted. The procedure continues in a repetitive process until all group proportions in the sample approach those of the population. Raking variables for the 2010 CPPW BRFSS include age, sex, race/ethnicity, telephone source, education, marital status, and renter/owner status. Raking is used to mitigate the various sources of survey error such as under-coverage and nonresponse. A process called weight trimming is also being used and refers to increasing the value of extremely low weights and decreasing the value of extremely high weights to reduce their impact on the variance of the estimates.

Since CPPW BRFSS respondents are randomly selected, measures of prevalence, reported as percentages, are subject to random sampling errors; therefore, each measure listed in the data tables includes the 95% confidence interval. Measures of prevalence have been excluded from the tables for any subpopulation with a sample size less than 30, which would yield statistically unreliable estimates.

Using the confidence intervals, comparisons can be made between subpopulations within a measure (e.g., general level of health of males compared to females). If the confidence intervals overlap, there is no statistically significant difference in the prevalence rates. However, if the confidence intervals do not overlap, there is a statistically significant difference. For example, if 13.0%-15.7% of males and 10.5%-12.7% of females report their general level of health as fair or poor, it is appropriate to state that the prevalence of adults reporting their general level of health as fair or poor was significantly higher in males than females. If a measure’s confidence interval is wide, data should be interpreted with caution.

If any assistance is needed with data interpretation or survey methodology and for more information about the CPPW BRFSS, please contact the Bureau of Epidemiology's Chronic Disease Section at (850) 245-4401 or by e-mail at [ChronicDisease@doh.state.fl.us](mailto:ChronicDisease@doh.state.fl.us). ## 2010 Orange County, Florida CPPW BRFSS Data Report

### Chronic Disease

#### Percentage of adults who reported their general level of health as 'good', 'very good', or 'excellent':

		Measure	95% CI	
<b>ALL</b>	Overall	80.8	77.2	84.4
<b>SEX</b>	Male	81.5	75.5	87.5
	Female	80.0	76.0	84.1
<b>RACE/ETHNICITY</b>	Non-Hispanic White	82.2	77.3	87.2
	Non-Hispanic Black	85.8	79.5	92.1
	Hispanic	76.5	67.8	85.2
<b>SEX BY RACE/ETHNICITY</b>	Non-Hispanic White Male	84.4	76.1	92.6
	Non-Hispanic White Female	80.1	74.4	85.9
	Non-Hispanic Black Male	93.5	89.2	97.8
	Non-Hispanic Black Female	78.8	68.1	89.6
	Hispanic Male	70.9	56.1	85.7
	Hispanic Female	82.2	74.2	90.3
<b>AGE GROUP</b>	18-44	87.7	82.2	93.3
	45-64	72.6	67.6	77.6
	65 & Older	66.9	61.3	72.6
<b>EDUCATION LEVEL</b>	<High School	64.0	50.6	77.4
	High School/GED	76.4	68.1	84.8
	>High School	86.9	83.4	90.4
<b>ANNUAL INCOME</b>	<\$25,000	68.5	60.9	76.0
	\$25,000-\$49,999	81.0	71.4	90.7
	\$50,000 or More	93.1	89.8	96.5
<b>MARITAL STATUS</b>	Married/Couple	85.1	81.0	89.3
	Not Married/Couple	76.3	70.5	82.2

#### Percentage of adults who reported their general level of health as 'fair' or 'poor':

		Measure	95% CI	
<b>ALL</b>	Overall	19.2	15.6	22.8
<b>SEX</b>	Male	18.5	12.5	24.5
	Female	20.0	15.9	24.0
<b>RACE/ETHNICITY</b>	Non-Hispanic White	17.8	12.8	22.7
	Non-Hispanic Black	14.2	7.9	20.5
	Hispanic	23.5	14.8	32.2
<b>SEX BY RACE/ETHNICITY</b>	Non-Hispanic White Male	15.6	7.4	23.9
	Non-Hispanic White Female	19.9	14.1	25.6
	Non-Hispanic Black Male	6.5	2.2	10.8
	Non-Hispanic Black Female	21.2	10.4	31.9
	Hispanic Male	29.1	14.3	43.9
	Hispanic Female	17.8	9.7	25.8
<b>AGE GROUP</b>	18-44	12.3	6.7	17.8
	45-64	27.4	22.4	32.4
	65 & Older	33.1	27.4	38.7
<b>EDUCATION LEVEL</b>	<High School	36.0	22.6	49.4
	High School/GED	23.6	15.2	31.9
	>High School	13.1	9.6	16.6
<b>ANNUAL INCOME</b>	<\$25,000	31.5	24.0	39.1
	\$25,000-\$49,999	19.0	9.3	28.6
	\$50,000 or More	6.9	3.5	10.2
<b>MARITAL STATUS</b>	Married/Couple	14.9	10.7	19.0
	Not Married/Couple	23.7	17.8	29.5

CI = Confidence Interval

^ = The measures were unavailable, not appropriate for the table, or suppressed due to low respondent counts.

---

### Glossary

---

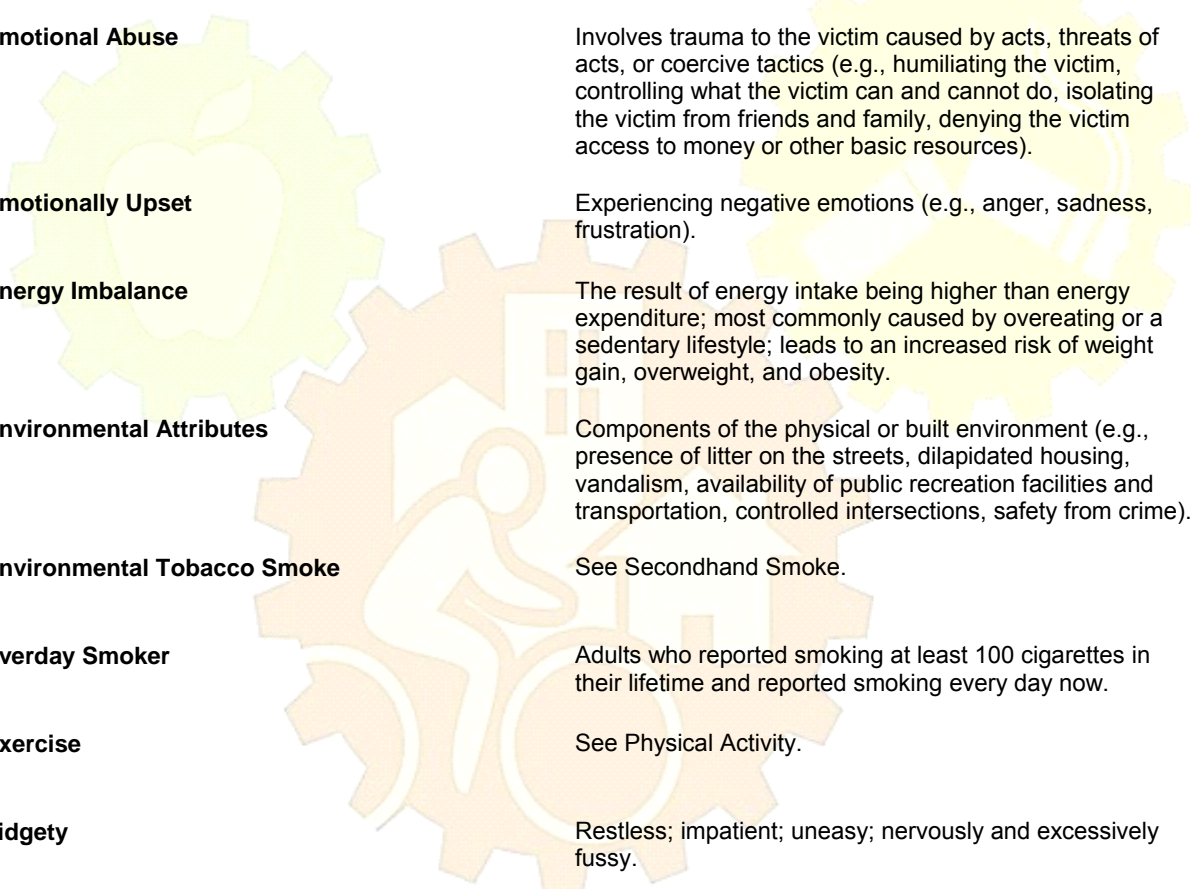

<b>Active</b>	Descriptive category for physical activity level of adults; defined as performing 150 to 300 minutes (or vigorous equivalent minutes) of leisure-time aerobic physical activity per week in the past 30 days.
<b>Adult</b>	Individual aged 18 years or older.
<b>Aerobic Physical Activity</b>	Also called endurance activity; improves cardiorespiratory fitness; activity in which the body's large muscles move in a rhythmic manner for a sustained period of time (e.g., walking, running, swimming, bicycling).
<b>Age</b>	The length of time that one has existed; duration of life by years; self-reported demographic variable.
<b>Angina</b>	Most common symptom of coronary artery disease (CAD); chest pain or discomfort that occurs if an area of the heart muscle does not get enough oxygen-rich blood.
<b>Body Mass Index (BMI)</b>	Number calculated from a person's height and weight; provides a reliable indicator of body fatness for most people; used to screen for weight categories that may lead to health problems.
<b>Calorie</b>	Also called kilocalories (kcal) or kilogram calories; a measure of the amount of energy derived from food.
<b>Cancer</b>	General name for a group of more than 100 diseases; when cells in a part of the body begin to grow out of control, forming new, abnormal cells and sometimes invading or growing into other tissues.
<b>Chronic Diseases</b>	Diseases of long duration and generally slow progression (e.g., heart disease; stroke; cancer; diabetes); represent the leading causes of mortality worldwide.
<b>Coronary Artery Disease (CAD)</b>	Most common type of heart disease; occurs when a substance called plaque builds up on the inner walls of the arteries that supply blood to the heart, called coronary arteries; most common cause of a heart attack.
<b>Coronary Heart Disease (CHD)</b>	See Coronary Artery Disease (CAD).
<b>Current Smoker</b>	Combination of everyday smoker and some day smoker.
<b>Daily Fruit Consumption Recommendation</b>	≥ 2 servings of fruit per day.
<b>Daily Vegetable Consumption Recommendation</b>	≥ 3 servings of vegetables per day.

### Glossary

---

<b>Depressed</b>	The manifestation of depression, a common mental disorder that presents with low mood, loss of interest or pleasure, feelings of guilt or low self-worth, disturbed sleep or appetite, low energy, and poor concentration.
<b>Diabetes</b>	General term for diabetes mellitus; disease in which the blood glucose levels are above normal due to either the pancreas not producing enough insulin (Type-1 diabetes) or the body not using its own insulin as well as it should (Type-2 diabetes).
<b>Emotional Abuse</b>	Involves trauma to the victim caused by acts, threats of acts, or coercive tactics (e.g., humiliating the victim, controlling what the victim can and cannot do, isolating the victim from friends and family, denying the victim access to money or other basic resources).
<b>Emotionally Upset</b>	Experiencing negative emotions (e.g., anger, sadness, frustration).
<b>Energy Imbalance</b>	The result of energy intake being higher than energy expenditure; most commonly caused by overeating or a sedentary lifestyle; leads to an increased risk of weight gain, overweight, and obesity.
<b>Environmental Attributes</b>	Components of the physical or built environment (e.g., presence of litter on the streets, dilapidated housing, vandalism, availability of public recreation facilities and transportation, controlled intersections, safety from crime).
<b>Environmental Tobacco Smoke</b>	See Secondhand Smoke.
<b>Everyday Smoker</b>	Adults who reported smoking at least 100 cigarettes in their lifetime and reported smoking every day now.
<b>Exercise</b>	See Physical Activity.
<b>Fidgety</b>	Restless; impatient; uneasy; nervously and excessively fussy.
<b>Florida Quitline</b>	Telephone quitline service specific to the state of Florida.
<b>Flu</b>	Also called influenza; a contagious respiratory illness, caused by a variety of influenza viruses, that can cause mild to severe illness, and at times can lead to death; some individuals, such as older people, young children, and people with certain health conditions, are at high risk for serious flu complications.

### Glossary

---

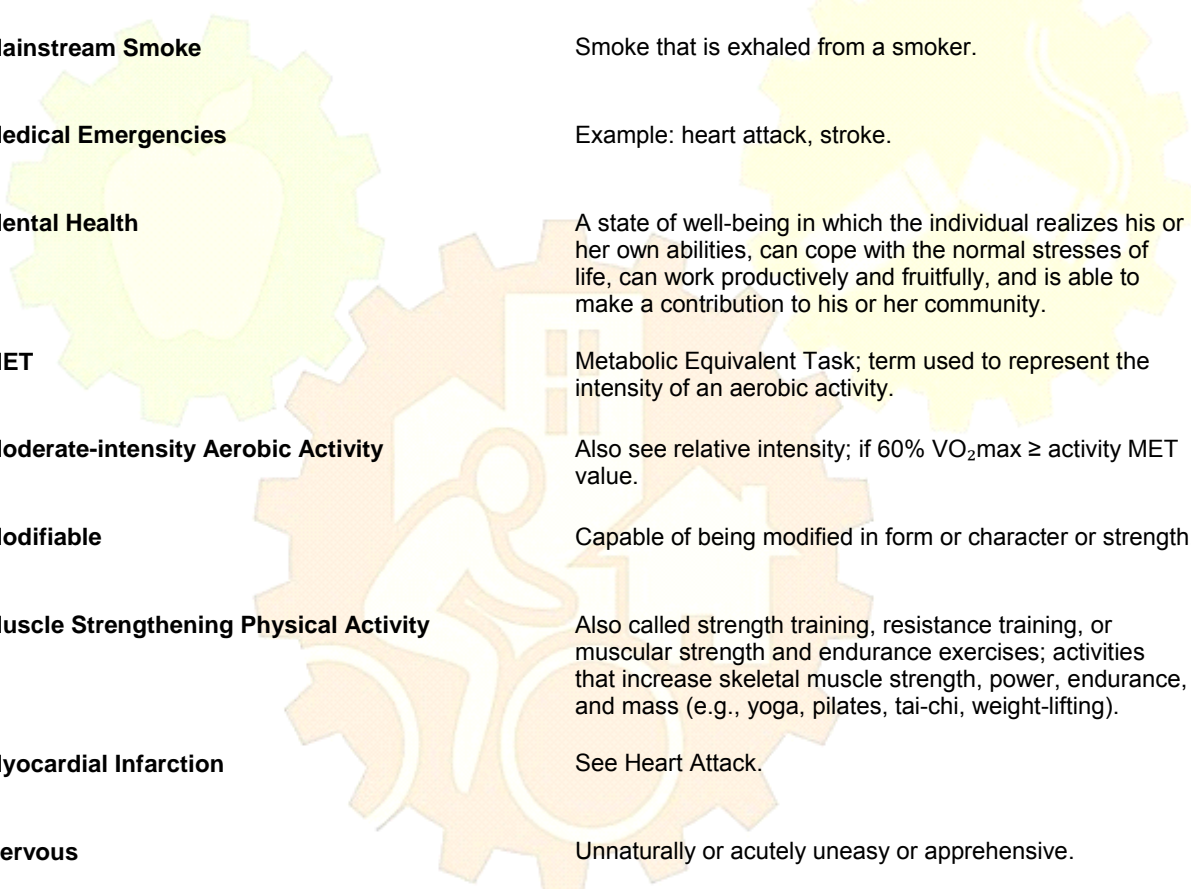

<b>Food Stamps Program</b>	Includes a food stamp card or voucher, or cash grants from the state for food.
<b>Former Smoker</b>	Adults who reported smoking at least 100 cigarettes in their lifetime but reported not smoking now.
<b>Health Behavior</b>	An action taken by a person to maintain, attain, or regain good health and to prevent illness.
<b>Health Risk Behavior</b>	An action taken by a person that is associated with higher than average rates of morbidity or mortality (e.g., lack of physical activity, poor nutrition, tobacco use, excessive alcohol consumption).
<b>Healthcare Coverage</b>	Example: health insurance, pre-paid plans such as HMO's, government plans such as Medicare.
<b>Healthcare Provider</b>	A person who by education, training, certification, or licensure is qualified to and is engaged in providing healthcare to patients (e.g., medical doctor, nurse practitioner, physician assistant, registered nurse).
<b>Healthy Foods</b>	Example: fresh fruits and vegetables, whole grain foods, low fat options.
<b>Healthy Weight</b>	Having a body mass index (BMI) ranging from 18.5 to 24.9; BMI is calculated using self-reported height and weight.
<b>Heart Attack</b>	Most commonly caused by coronary artery disease (CAD); occurs when a section of the heart muscle dies or gets damaged because of reduced blood supply.
<b>Highly Active</b>	Descriptive category for physical activity level of adults; defined as performing more than 300 minutes (or vigorous equivalent minutes) of leisure-time aerobic physical activity per week in the past 30 days.
<b>Hispanic</b>	Adults of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race; self-reported demographic variable.
<b>Hopeless</b>	Without hope; despairing.
<b>Insufficiently Active</b>	Descriptive category for physical activity level of adults; defined as performing 1 to 149 minutes (or vigorous equivalent minutes) of leisure-time aerobic physical activity per week in the past 30 days.
<b>Intensity</b>	Refers to how much work is being performed or the magnitude of the effort required to perform an activity.

### Glossary

---

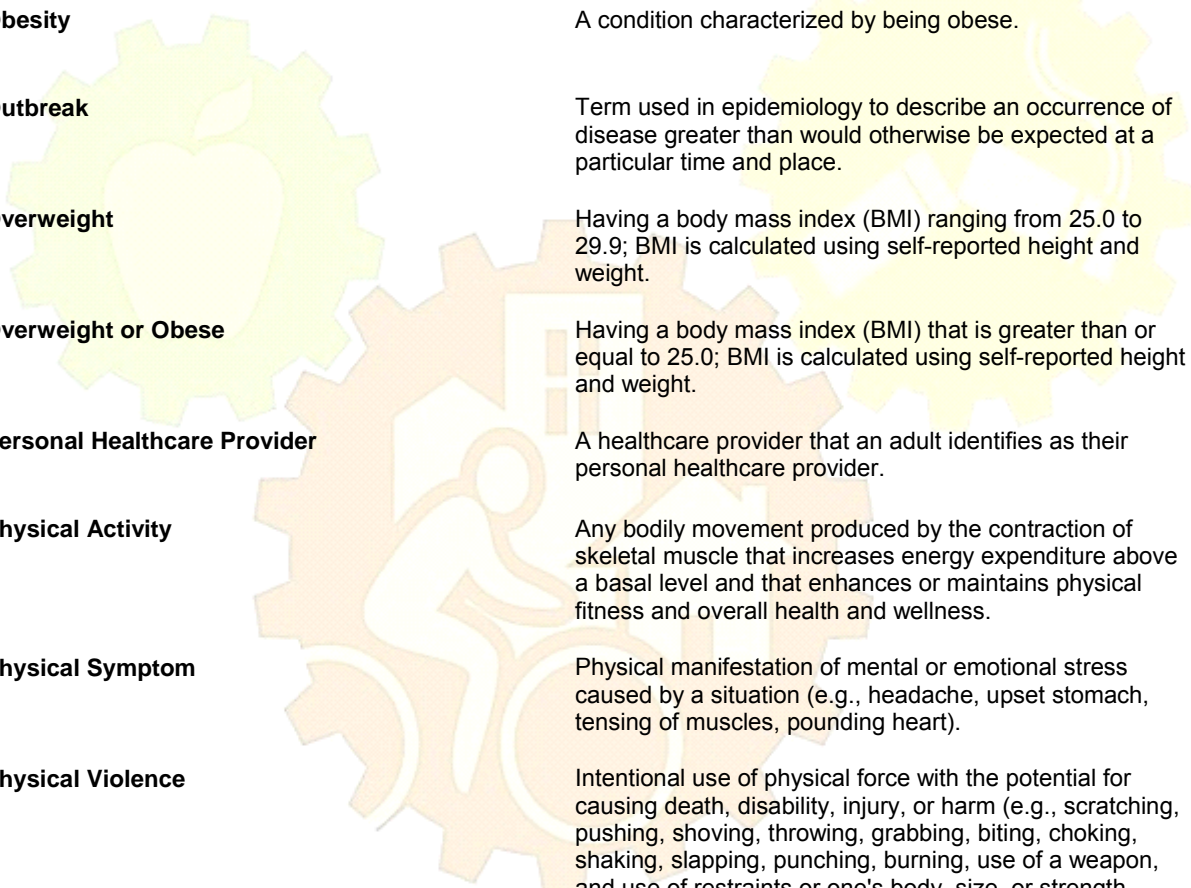

<b>Intimate Partner</b>	Current or former partner or spouse.
<b>Intimate Partner Violence (IPV)</b>	Physical, sexual, or psychological harm by a current or former partner or spouse; can occur among heterosexual or same-sex couples and does not require sexual intimacy.
<b>Leisure-time Physical Activity</b>	Refers to physical activity or exercise performed outside of one's regular job.
<b>Mainstream Smoke</b>	Smoke that is exhaled from a smoker.
<b>Medical Emergencies</b>	Example: heart attack, stroke.
<b>Mental Health</b>	A state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.
<b>MET</b>	Metabolic Equivalent Task; term used to represent the intensity of an aerobic activity.
<b>Moderate-intensity Aerobic Activity</b>	Also see relative intensity; if $60\% \text{VO}_2\text{max} \geq \text{activity MET value}$ .
<b>Modifiable</b>	Capable of being modified in form or character or strength.
<b>Muscle Strengthening Physical Activity</b>	Also called strength training, resistance training, or muscular strength and endurance exercises; activities that increase skeletal muscle strength, power, endurance, and mass (e.g., yoga, pilates, tai-chi, weight-lifting).
<b>Myocardial Infarction</b>	See Heart Attack.
<b>Nervous</b>	Unnaturally or acutely uneasy or apprehensive.
<b>Never Smoked</b>	Adults who reported smoking less than 100 cigarettes in their lifetime.
<b>Non-Hispanic Black</b>	Adults not of Hispanic culture or origins reporting membership in only the Black race category; self-reported demographic variable.
<b>Non-Hispanic White</b>	Adults not of Hispanic culture or origins reporting membership in only the White race category; self-reported demographic variable.

### Glossary

---

<b>Non-medical Emergencies</b>	Example: traffic accident.
<b>Non-smoker</b>	Combination of former smoker and never smoked.
<b>Obese</b>	Having a body mass index (BMI) that is greater than or equal to 30.0; BMI is calculated using self-reported height and weight.
<b>Obesity</b>	A condition characterized by being obese.
<b>Outbreak</b>	Term used in epidemiology to describe an occurrence of disease greater than would otherwise be expected at a particular time and place.
<b>Overweight</b>	Having a body mass index (BMI) ranging from 25.0 to 29.9; BMI is calculated using self-reported height and weight.
<b>Overweight or Obese</b>	Having a body mass index (BMI) that is greater than or equal to 25.0; BMI is calculated using self-reported height and weight.
<b>Personal Healthcare Provider</b>	A healthcare provider that an adult identifies as their personal healthcare provider.
<b>Physical Activity</b>	Any bodily movement produced by the contraction of skeletal muscle that increases energy expenditure above a basal level and that enhances or maintains physical fitness and overall health and wellness.
<b>Physical Symptom</b>	Physical manifestation of mental or emotional stress caused by a situation (e.g., headache, upset stomach, tensing of muscles, pounding heart).
<b>Physical Violence</b>	Intentional use of physical force with the potential for causing death, disability, injury, or harm (e.g., scratching, pushing, shoving, throwing, grabbing, biting, choking, shaking, slapping, punching, burning, use of a weapon, and use of restraints or one's body, size, or strength against another person).
<b>Print Media</b>	Example: newspaper, magazine, poster, flyer.
<b>Race/Ethnicity</b>	A measure that combines an adult's ethnicity status (e.g., Hispanic, non-Hispanic) and race status (e.g., white, black, other); self-reported demographic variable.
<b>Regular Soda/Pop</b>	Any soda/pop that contains sugar; does not include diet soda/pop.

---

### Glossary

---

<b>Relative Intensity</b>	Method for calculating activity intensity; takes into account or adjusts for an adult's exercise capacity; for aerobic exercise, expressed as a percent of an adult's aerobic capacity (VO <sub>2</sub> max), which is sex and age specific, in relation to the MET value of an aerobic activity.
<b>Restless</b>	Characterized by or showing inability to remain at rest; inquiet or uneasy, perpetually agitated.
<b>Routine Check-up</b>	A general physical exam; does not include exams conducted for a specific injury, illness, or condition.
<b>Secondhand Smoke</b>	A mixture of gases and fine particles that includes more than 7,000 chemicals, including hundreds that are toxic and about 70 that can cause cancer; comprised of sidestream smoke and mainstream smoke.
<b>Sedentary</b>	Not participating in any leisure-time physical activity.
<b>Sex</b>	The condition or character of being male or female; self-reported demographic variable.
<b>Sexual Violence</b>	Divided into three categories: (1) use of physical force to compel a person to engage in a sexual act against his or her will, whether or not the act is completed; (2) attempted or completed sex act involving a person who is unable to understand the nature or condition of the act, to decline participation, or to communicate unwillingness to engage in the sexual act (e.g., because of illness, disability, or the influence of alcohol or other drugs, or because of intimidation or pressure); and 3) abusive sexual contact.
<b>Sidestream Smoke</b>	Smoke that comes from the end of a lighted tobacco product.
<b>Smoker Status</b>	A measure that sorts adults into four categories of smoking: everyday smoker, someday smoker, former smoker, never smoked.
<b>Smoking</b>	Inhalation of the smoke, comprised of gases and hydrocarbon vapors, generated by slowly burning tobacco.
<b>Someday Smoker</b>	Adults who reported smoking at least 100 cigarettes in their lifetime and reported smoking some days now.
<b>Stroke</b>	Sometimes called a brain attack; occurs when a clot blocks the blood supply to the brain or when a blood vessel in the brain bursts.

### Glossary

---

<b>Sugar-sweetened Beverage</b>	A beverage or drink with sugar, in any form, added (e.g., Kool-aid, lemonade, sweet tea, sports or energy drinks); does not include 100% fruit juice, diet drinks, or artificially sweetened beverages.
<b>Telephone Quitline</b>	Free telephone-based service that connects people who smoke cigarettes with someone who can help them quit.
<b>Threats</b>	Involves the use of words, gestures, or weapons to communicate the intent to cause death, disability, injury, or physical harm.
<b>Vandalism</b>	Destruction or spoiling of anything; defacement directed towards any property without permission of the owner (e.g., broken windows, graffiti).
<b>Vigorous-intensity Aerobic Activity</b>	Also see relative intensity; if 60% VO <sub>2</sub> max < activity MET value.
<b>Weekly Leisure-time Aerobic Physical Activity Recommendation</b>	≥ 150 minutes per week of moderate-intensity aerobic activities, OR ≥ 75 minutes per week of vigorous-intensity aerobic activities, OR ≥ 150 minutes per week of an equivalent combination of moderate- and vigorous-intensity aerobic activities performed for at least 10 minutes at a time.
<b>Weekly Leisure-time Muscle Strengthening Physical Activity Recommendation</b>	≥ 2 days per week, working all major muscle groups (i.e. legs, hips, back, abdomen, chest, shoulders, and arms).
<b>WIC Program</b>	Women, Infants, and Children Program; federal grant program that provides supplemental nutritious foods, nutrition education and counseling, and screening and referrals to other health, welfare, and social services to populations that are low-income, nutritionally at-risk.
<b>Worthless</b>	Without worth; of no use, importance, or value.
