

## Florida Arbovirus Surveillance Week 43: October 20-26, 2019

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV), and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease is also included. During the period of October 20-26, 2019, the following arboviral activity was recorded in Florida.

**WNV activity:** No human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. Forty-five sentinel chickens tested positive for antibodies to WNV this week in Brevard, Citrus, Duval, Hillsborough, Lee, Leon, Manatee, Martin, Nassau, Orange, Pinellas, Polk, Putnam, Sarasota, Seminole, St. Johns, Sumter, Volusia, and Walton counties. In 2019, positive samples from one human, one blood donor, eight horses, one eagle, and 525 sentinel chickens have been reported from 30 counties.

**SLEV activity:** No human cases of SLEV infection were reported this week. No sentinel chickens tested positive for antibodies to SLEV this week. In 2019, positive samples from three sentinel chickens have been reported from three counties.

**EEEV activity:** No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. No sentinel chickens tested positive for antibodies to EEEV this week. In 2019, positive samples from 28 horses, one emu, one eagle, and 110 sentinel chickens have been reported from 31 counties.

**International Travel-Associated Dengue Fever Cases:** Twenty-five cases of dengue fever were reported this week in persons that had international travel. In 2019, 314 travel-associated cases have been reported.

**Dengue Fever Cases Acquired in Florida:** No cases of locally acquired dengue fever were reported this week. In 2019, 12 cases of locally acquired dengue fever have been reported.

**International Travel-Associated Chikungunya Fever Cases:** No cases of chikungunya fever were reported this week in persons that had international travel. In 2019, five travel-associated cases have been reported.

**Chikungunya Fever Cases Acquired in Florida:** No cases of locally acquired chikungunya fever were reported this week. In 2019, no cases of locally acquired chikungunya fever have been reported.

**International Travel-Associated Zika Fever Cases:** No cases of Zika fever were reported this week in persons that had international travel. In 2019, 36 travel-associated cases have been reported.

**Zika Fever Cases Acquired in Florida:** No cases of locally acquired Zika fever were reported this week. In 2019, no cases of locally acquired Zika fever have been reported.

**Advisories/Alerts:** Bay, Broward, Calhoun, Citrus, DeSoto, Duval, Hillsborough, Holmes, Indian River, Lee, Orange, Polk, St. Johns, Suwannee, Volusia, and Walton counties are currently under a mosquito-borne illness advisory. Miami-Dade County is currently under a mosquito-borne illness alert. No other counties are currently under mosquito-borne illness advisory or alert.

There is a Level 2 Travel Health Notice for Nigeria related to the transmission of yellow fever virus. There are also Level 1 Travel Health Notices for Central and South America, Mexico, the Caribbean, Asia, the Pacific Islands, Africa, the Middle East, France, and Spain related to the transmission of dengue virus, for Burundi related to malaria transmission, and for Ethiopia related to chikungunya transmission. Additional information on

travel health notices can be found at the following link: [wwwnc.cdc.gov/travel/notices](http://wwwnc.cdc.gov/travel/notices). For a map of arboviral disease activity in the United States visit: [www.cdc.gov/arbovet/maps/ADB\\_Diseases\\_Map/index.html](http://www.cdc.gov/arbovet/maps/ADB_Diseases_Map/index.html).

## 2019 Human Case Summary\*

**West Nile Virus Illnesses Acquired in Florida:** One human case of WNV illness acquired in Florida has been reported in 2019 in Duval County (July). One asymptomatic positive blood donor has been reported in 2019 from Bay County (August).

**International Travel-Associated Chikungunya Fever Cases:** Five cases of chikungunya fever with onset in 2019 have been reported in individuals with travel history to a chikungunya endemic country in the two weeks prior to onset. Countries of origin were: Brazil, Haiti, India, and Thailand (2). Counties reporting cases were: Alachua, Manatee, Marion, Orange, and Palm Beach. Two cases were reported in non-Florida residents.

**International Travel-Associated Dengue Fever Cases:** Three hundred fourteen cases of dengue fever with onset in 2019 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Counties reporting cases were: Alachua (2), Brevard (2), Broward (32), Charlotte, Citrus, Collier, Duval (4), Hillsborough (21), Lake, Lee (9), Manatee (2), Miami-Dade (186), Orange (11), Osceola (3), Palm Beach (22), Pasco (3), Pinellas (2), Polk, Putnam, Sarasota (2), Seminole (3), and St. Lucie (4). Seventeen cases were reported in non-Florida residents. Eight cases met the criteria for severe dengue (dengue shock syndrome [DSS] or dengue hemorrhagic fever [DHF]). Those at greater risk for DSS and DHF include persons with previous dengue infection, pregnant women, infants, the elderly, and those with co-morbidities. However, severe illness can also occur in those without any of these risk factors. In 2019, 248 cases of dengue reported in Florida have been serotyped by PCR.\* Please see the below table for a breakdown of cases by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-1 and DENV-2	DENV-1 and DENV-3	DENV-2 and DENV-3	Unknown*	Total
Cuba	12	149		2			34	197
Dominican Republic	15						3	18
Jamaica		1	10		1		5	17
Honduras	1	9	1				5	16

India/Malaysia							1	1
Malaysia/Singapore		1						1
Panama							1	1
Vietnam	1							1
<b>Total</b>	<b>40</b>	<b>186</b>	<b>18</b>	<b>2</b>	<b>1</b>	<b>1</b>	<b>66</b>	<b>314</b>

\* Serotyping for 17 cases are pending and will be added in future weeks.

**Dengue Fever Cases Acquired in Florida:** In 2019, 12 cases of locally acquired dengue fever have been reported in Broward, Hillsborough, and Miami-Dade (10) counties, with onsets in March, July (2), August (3), and September (6).

**International Travel-Associated Zika Fever Cases:** In 2019, 36 cases of Zika fever have been reported in individuals with travel history to a country or area experiencing Zika virus activity. Countries of origin were: Brazil, Colombia (1), Cuba (6), Guatemala (5), Haiti (11), Honduras (4), Jamaica, Nicaragua, Philippines, Puerto Rico, and Venezuela (3). Counties reporting cases were: Broward (5), Collier (3), Duval, Hillsborough (2), Indian River, Lee, Miami-Dade (17), Orange (4), Palm Beach, and Sarasota. Three cases were reported in non-Florida residents. Florida is monitoring a total of 23 pregnant women in 2019.

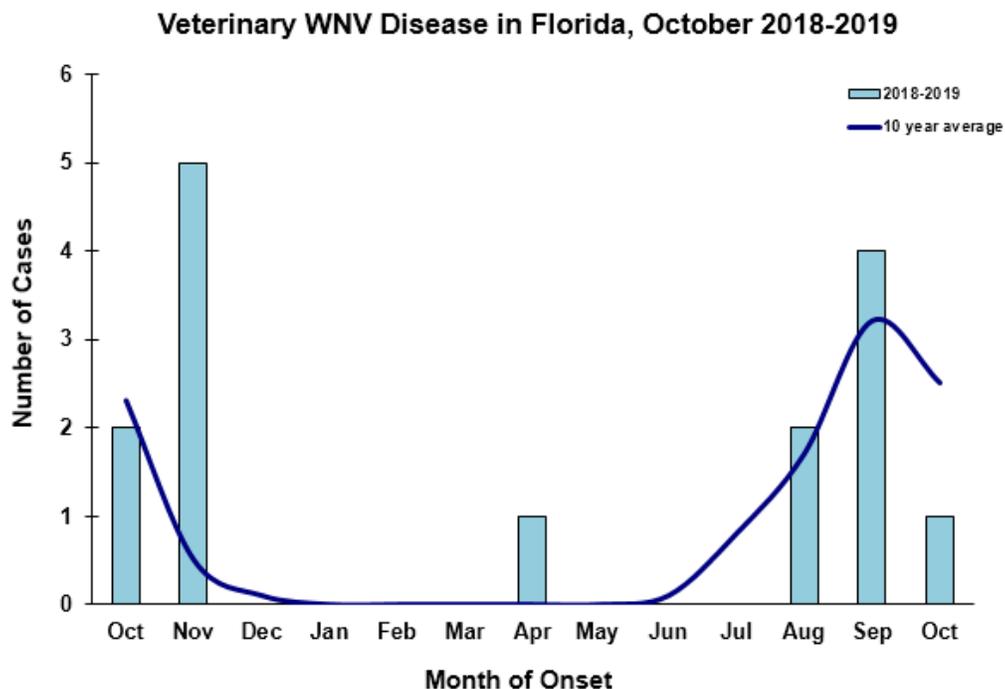

**International Travel-Associated Malaria Cases:** Fifty-five cases of malaria with onset in 2019 have been reported. Countries of origin were: Afghanistan, Angola (3), Central African Republic, Chad, Congo, Democratic Republic of the Congo (4), Ghana (7), Guyana, India, Ivory Coast (6), Kenya (3), Liberia (3), Nigeria (14), Papua New Guinea, Sudan, Togo, Uganda (2), Venezuela, and Zambia (3). Counties reporting cases were: Brevard (2), Broward (5), Duval (9), Hillsborough (4), Lake (2), Manatee, Miami-Dade (8), Okaloosa, Orange (7), Pasco (4), Pinellas (5), Polk (3), Seminole (3), and Volusia. Fifteen cases were reported in non-Florida residents.

Forty-seven cases (85%) were diagnosed with *Plasmodium falciparum*. Five cases (9%) were diagnosed with *Plasmodium vivax*. Two cases (4%) were diagnosed with *Plasmodium ovale*. One case (2%) was diagnosed with *Plasmodium malariae*.

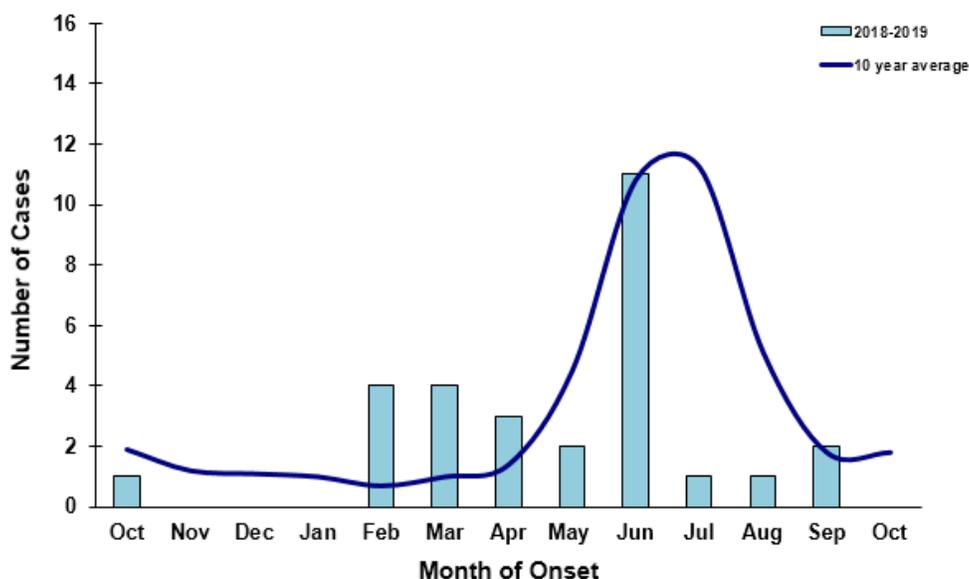

### Veterinary Cases\*

\*Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

No horses with EEEV or WNV infection were reported this week.

### Veterinary EEEV Disease in Florida, October 2018-2019

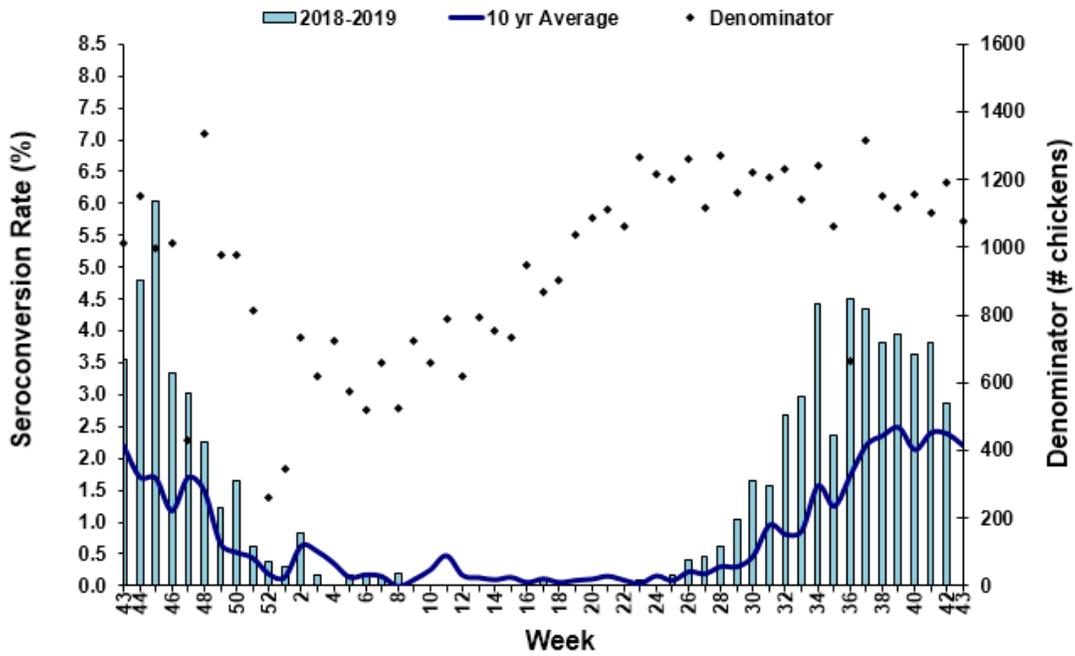

### Sentinel Chickens\*

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

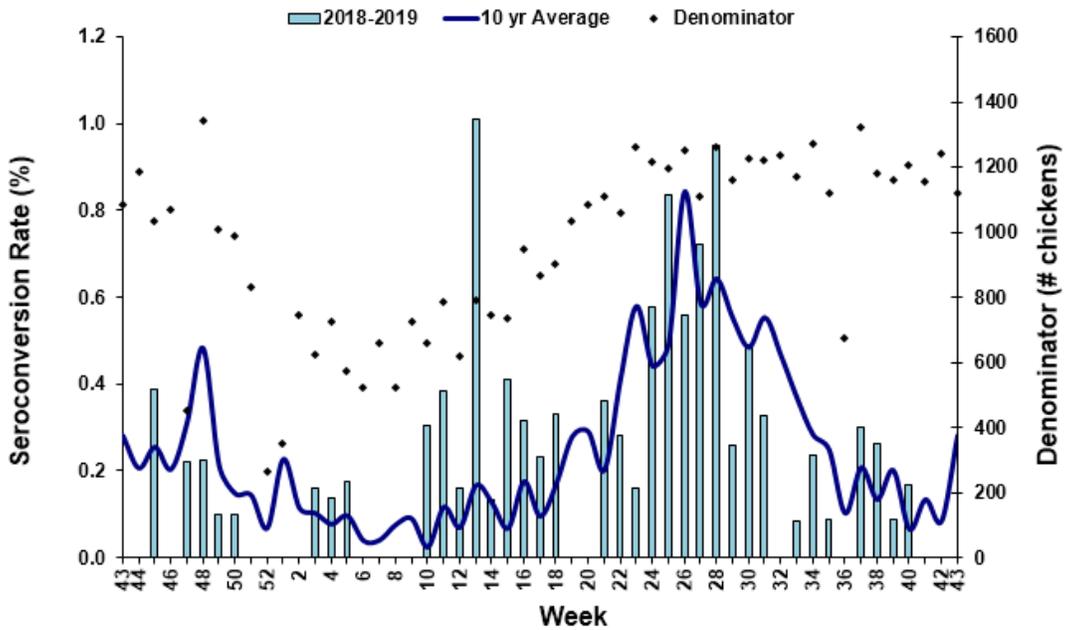

Forty-five sentinel chickens tested positive for antibodies to WNV this week in Brevard, Citrus, Duval, Hillsborough, Lee, Leon, Manatee, Martin, Nassau, Orange, Pinellas, Polk, Putnam, Sarasota, Seminole, St. Johns, Sumter, Volusia, and Walton counties.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Brevard	10/10/19	6.38		6.38				3 WNV	47 WNV, 1 EEEV
Citrus	10/15/19	15.94		15.94				11 WNV	43 WNV, 6 EEEV
Duval	10/14/19	9.68		9.68				3 WNV	12 WNV
Hillsborough	10/15/19	6.67		6.67				3 WNV	17 WNV
Lee	10/15/19	1.19		1.19				1 WNV	33 WNV, 1 SLEV
Leon	10/14/19	2.86		2.86				1 WNV	2 WNV, 7 EEEV, 1 HJV
Manatee	10/15/19	1.72		1.72				1 WNV	4 WNV
Martin	10/11/19	4.88		4.88				2 WNV	10 WNV
Nassau	10/12/19	2.94		2.94				1 WNV	14 WNV, 8 EEEV
Orange	10/14/19	4.60		4.60				4 WNV	61 WNV, 6 EEEV
Pinellas	10/14/19	3.57		3.57				2 WNV	4 WNV, 1 SLEV
Polk	10/14/19	3.33		3.33				1 WNV	26 WNV, 5 EEEV
Putnam	10/10/19	11.54		11.54				3 WNV	17 WNV, 4 EEEV
Sarasota	10/11/19	5.17		5.17				3 WNV	18 WNV
Seminole	10/14/19	4.88		4.88				2 WNV	17 WNV, 1 EEEV
St. Johns	10/14/19	4.08		4.08				2 WNV	39 WNV, 8 EEEV
Sumter	10/11/19	3.03		3.03				1 WNV	5 WNV, 1 SLEV, 1 EEEV
Volusia	10/15/19	4.88		4.88				2 WNV	50 WNV, 5 EEEV
Walton	10/14/19	0.76		0.76				1 WNV	13 WNV, 45 EEEV, 3 HJV

### Sentinel Seroconversions to WNV in Florida, 2018-2019

### Sentinel Seroconversions to EEEV in Florida, 2018-2019

### Mosquito Pools

No mosquito pools tested positive for EEEV, WNV, or Zika this week.

County	Collection Date	Result	Species	County YTD
--------	-----------------	--------	---------	------------

## Dead Birds

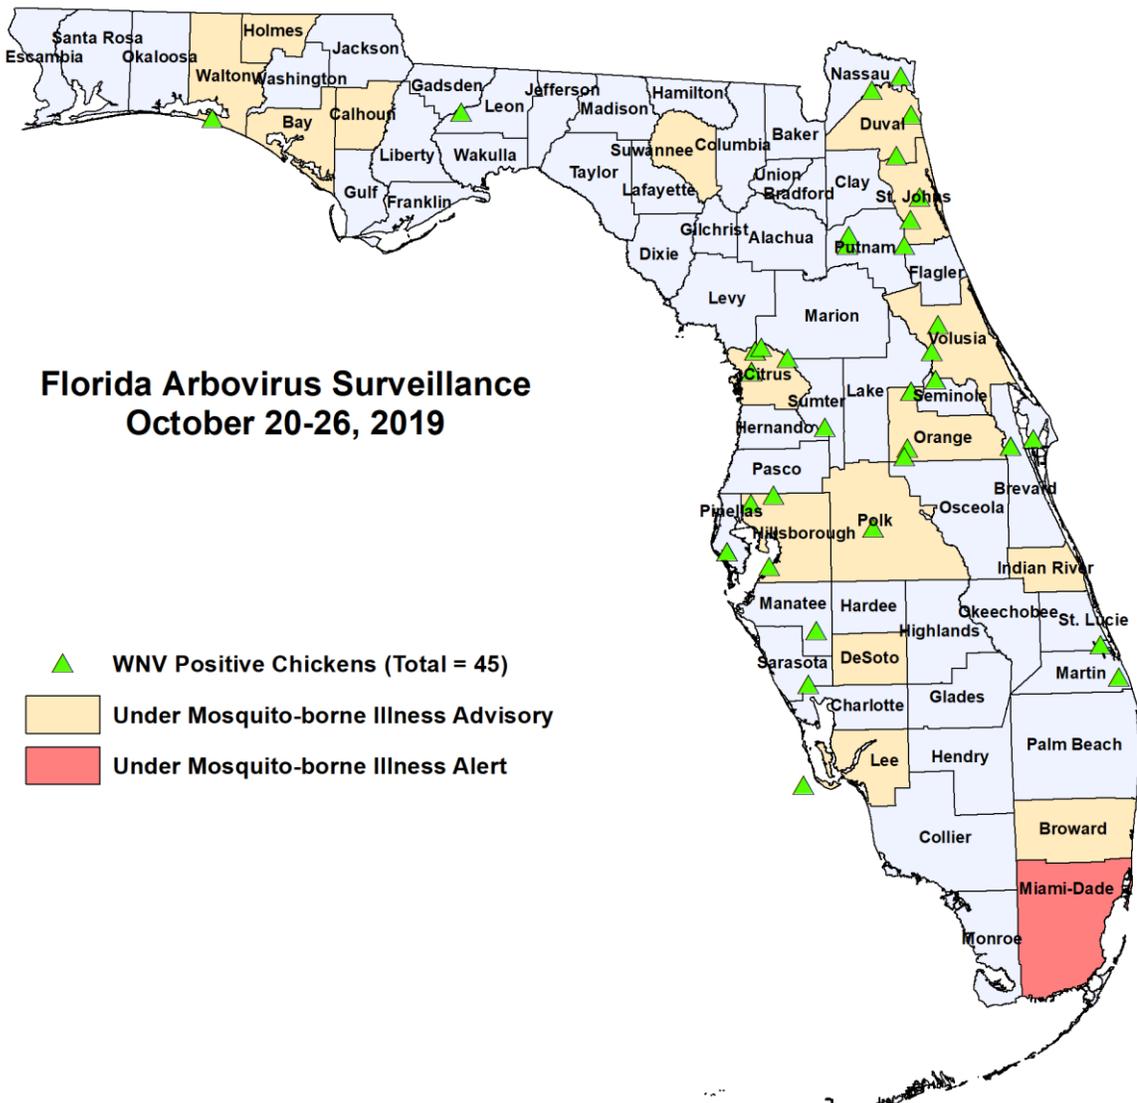

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, eight reports representing a total of 40 dead birds, including one raptor and one dove, were received from eight counties.

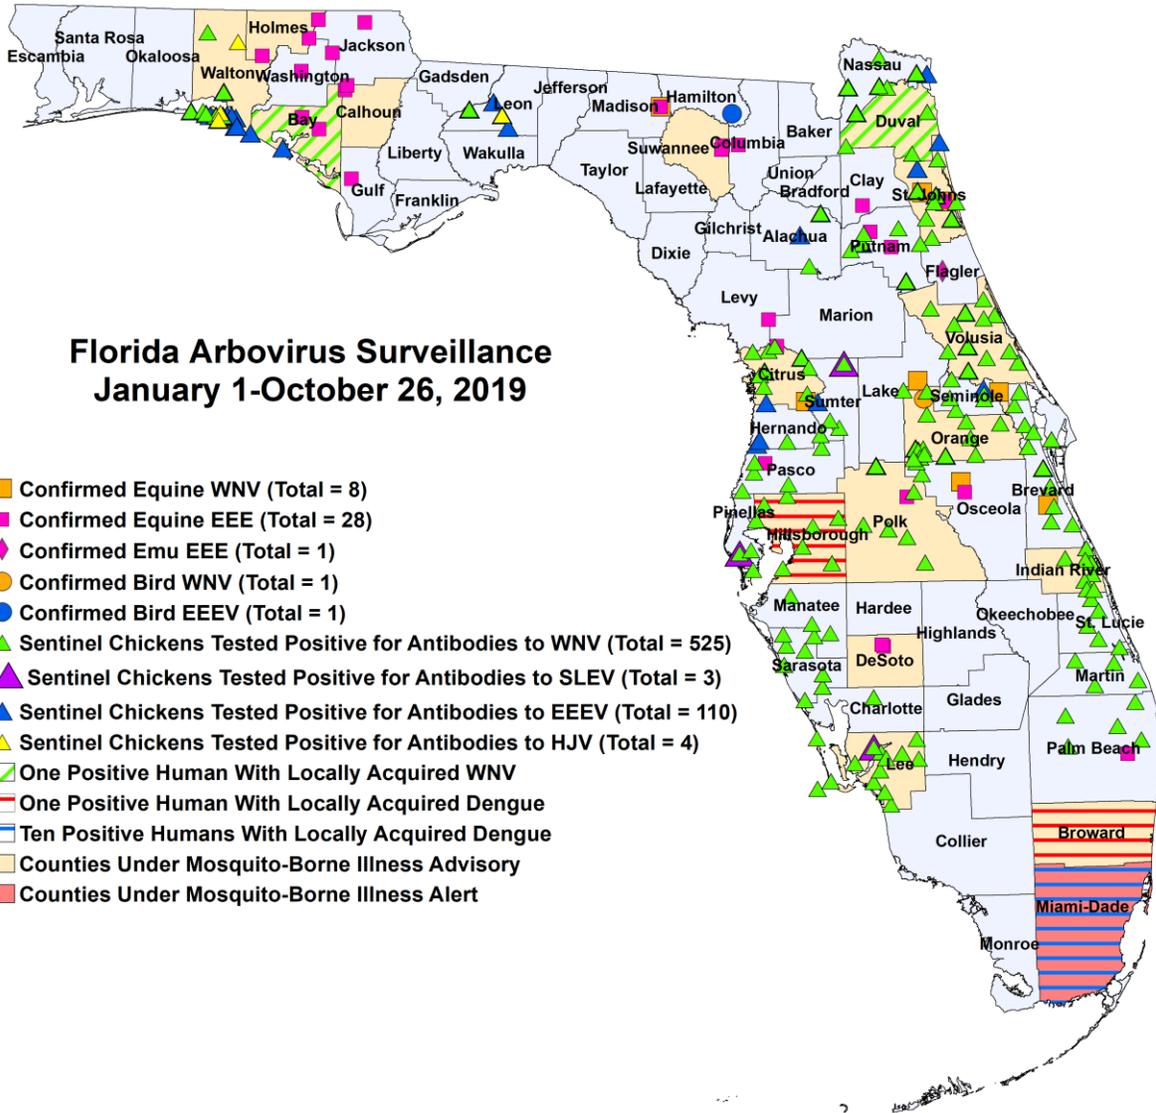

In 2019, 322 reports representing a total of 652 dead birds (14 crows, 13 jays, 80 raptors, and 35 doves) were received from 44 of Florida's 67 counties. Please note that FWC collects reports of birds that have died from a variety of causes, not only arboviruses. Dead birds should be reported to [www.myfwc.com/bird/](http://www.myfwc.com/bird/).

**2019**

County	Total Dead Birds	Crows	Jays	Raptors	Doves
Alachua	1	0	0	0	0
Bay	11	0	0	0	0
Hillsborough	4	0	0	0	0
Leon	1	0	0	0	1
Palm Beach	4	0	0	0	0
Pinellas	15	0	0	0	0
Volusia	1	0	0	1	0
Walton	3	0	0	0	0

**For more surveillance information, please see the DOH website at:** [www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html](http://www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html)

**For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at:** [www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm](http://www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm)

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: [www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html](http://www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html). Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
