

Florida Arbovirus Surveillance Week 44: October 31-November 6, 2021

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV) and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease is also included. During the period of October 31-November 6, 2021, the following arboviral activity was recorded in Florida.

WNV activity: No human cases of WNV infection were reported this week. One horse with WNV infection was reported this week in Glades County. Five sentinel chickens tested positive for antibodies to WNV this week in Indian River, Nassau, St. Johns, St. Lucie, and Walton counties. In 2021, positive samples from four humans, three horses, 128 sentinel chickens, and eight mosquito pools have been reported from 22 counties.

SLEV activity: No human cases of SLEV infection were reported this week. Two sentinel chickens tested positive for antibodies to SLEV this week in Citrus and Palm Beach counties. In 2021, positive samples from 14 sentinel chickens and one mosquito pool have been reported from seven counties.

Flavivirus (WNV or SLEV)* activity: Two sentinel chickens tested positive for antibodies to a flavivirus this week in Duval and Sumter counties. In 2021, positive samples from 77 sentinel chickens have been reported from 16 counties.

EEEV activity: No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. Two sentinel chickens tested positive for antibodies to EEEV this week in Duval and Walton counties. In 2021, positive samples from 18 horses, 180 sentinel chickens, and one emu have been reported from 30 counties.

International Travel-Associated Dengue Fever: No cases of dengue fever were reported this week in persons that had international travel. In 2021, 11 travel-associated dengue fever cases have been reported.

Dengue Fever Cases Acquired in Florida: No cases of locally acquired dengue fever were reported this week. In 2021, no cases of locally acquired dengue fever have been reported.

International Travel-Associated Chikungunya Fever Cases: No cases of chikungunya fever were reported this week in persons that had international travel. In 2021, one travel-associated chikungunya fever case has been reported.

Chikungunya Fever Cases Acquired in Florida: No cases of locally acquired chikungunya fever were reported this week. In 2021, no cases of locally acquired chikungunya fever have been reported.

International Travel-Associated Zika Fever Cases: No cases of Zika fever were reported this week in persons that had international travel. In 2021, no travel-associated Zika fever cases have been reported.

Zika Fever Cases Acquired in Florida: No cases of locally acquired Zika fever were reported this week. In 2021, no cases of locally acquired Zika fever have been reported.

Advisories/Alerts: Bay, Citrus, Jefferson, Nassau, Orange, Palm Beach, Pasco and Walton counties are currently under a mosquito-borne illness advisory. Collier County is currently under a mosquito-borne illness alert. No other counties are currently under mosquito-borne illness advisory or alert. A Level 1 Travel Health Notice has been issued for Central and South America, Mexico, the Caribbean, Asia, the Pacific Islands,

Africa, and the Middle East related to the transmission of dengue virus, for Burundi related to malaria transmission and for Chad related to Leishmaniasis. A Level 2 Travel Health Alert has been issued for Nigeria related to the transmission of yellow fever virus. Additional information on travel health notices can be found at: wwwnc.cdc.gov/travel/notices. For a map of arboviral disease activity in the United States visit: www.cdc.gov/arbovet/maps/ADB_Diseases_Map/index.html.

2021 Human Case Summary

West Nile Virus Illnesses Acquired in Florida: Four human cases of WNV illness acquired in Florida have been reported in 2021: three in Collier County (August) and one in Miami-Dade (July) County.

International Travel-Associated Chikungunya Fever Cases: One case of chikungunya fever with onset in 2021 has been reported in an individual with travel history to a chikungunya endemic country in the two weeks prior to onset. Country of origin was: Brazil. County reporting the case was: Broward.

International Travel-Associated Dengue Fever Cases: Eleven cases with onset in 2021 have been reported in individuals with travel history to a dengue endemic area in the two weeks prior to onset. Counties reporting cases were: Broward, Hernando (2), Hillsborough, Miami-Dade (3), Monroe, and Palm Beach (3): One case was reported in a non-Florida resident. In 2021, eight cases of dengue reported in Florida have been serotyped by PCR. Please see the table below for a breakdown of case by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	Unknown Serotype	Total
Colombia			1	1	2
Cuba	2	1		1	4
Dominican Republic		1			1
Ecuador	1				1
Honduras				1	1
Mexico/Caribbean		1			1
Saint Barts	1				1
Total	4	3	1	3	11

International Travel-Associated Malaria Cases: Thirty-five cases of malaria with onset in 2021 have been reported. Countries of origin were: Cameroon (4), Côte D'Ivoire, Ethiopia, Ghana (6), Kenya, Liberia (3), Mali, Mozambique, Nigeria (7), Sierra Leone (5), Tanzania, Togo, Uganda (2) and Venezuela. Counties reporting cases were: Alachua (2), Brevard (2), Broward (5), Duval (5), Miami-Dade (5), Orange (2), Osceola (2), Palm Beach (3), Pinellas (2), Polk (3), Seminole (3) and St. Johns. Four cases were reported in non-Florida residents.

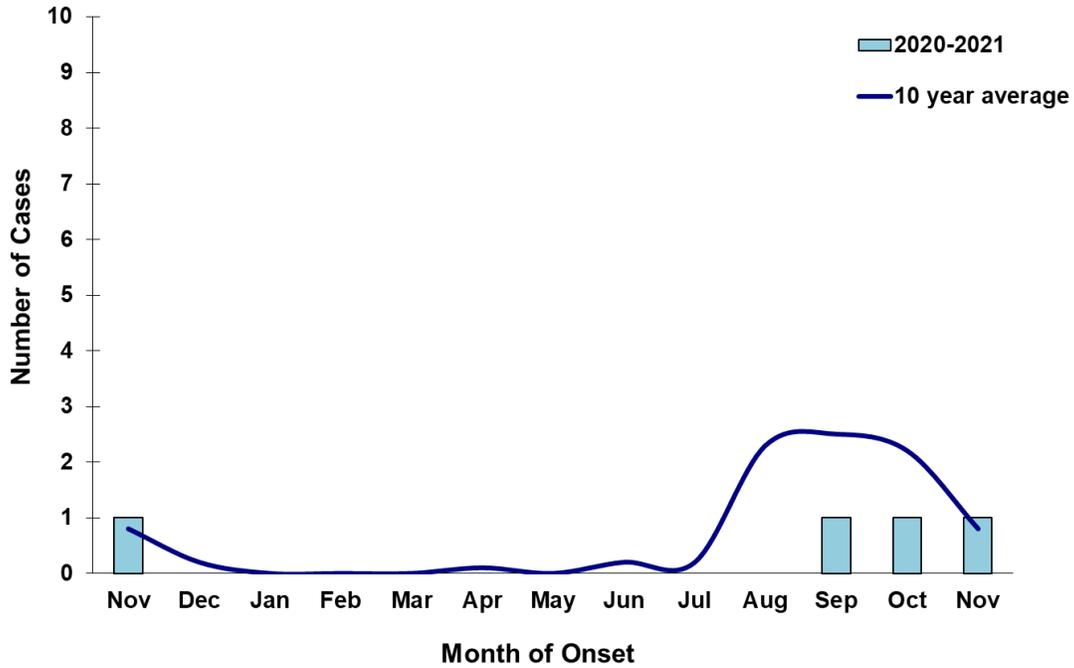

Thirty-two cases (91%) were diagnosed with *Plasmodium falciparum*. One case (3%) was diagnosed with *Plasmodium malariae*. One case (3%) was diagnosed with *Plasmodium ovale*. One case (3%) was diagnosed with *Plasmodium vivax*.

Veterinary Cases**

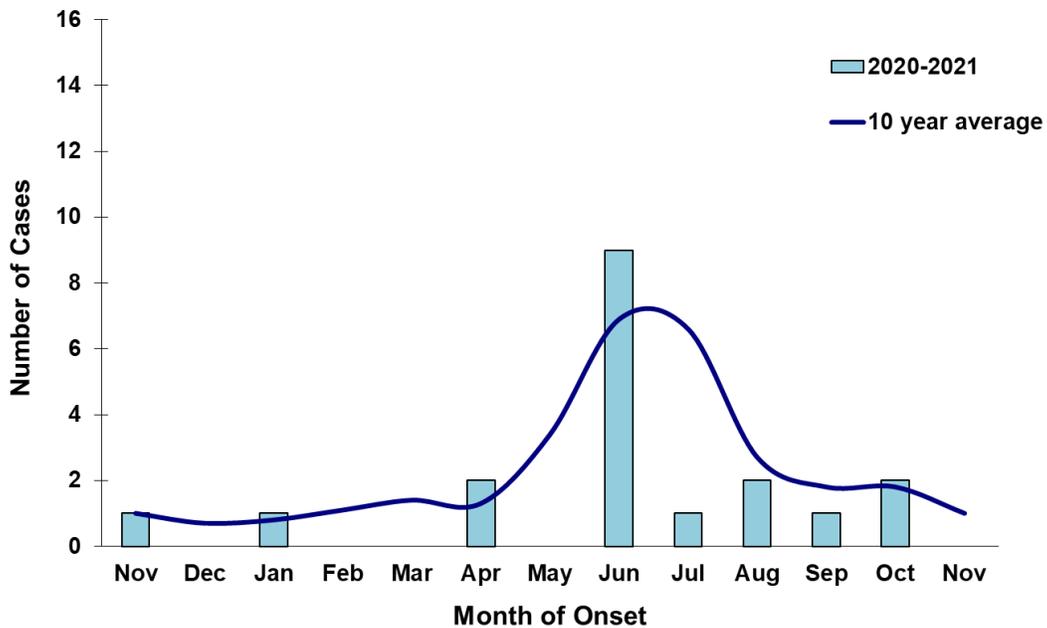

**Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

One horse with WNV infection was reported this week in Glades County.

Veterinary WNV Disease in Florida, November 2020-2021

Veterinary EEEV Disease in Florida, November 2020-2021

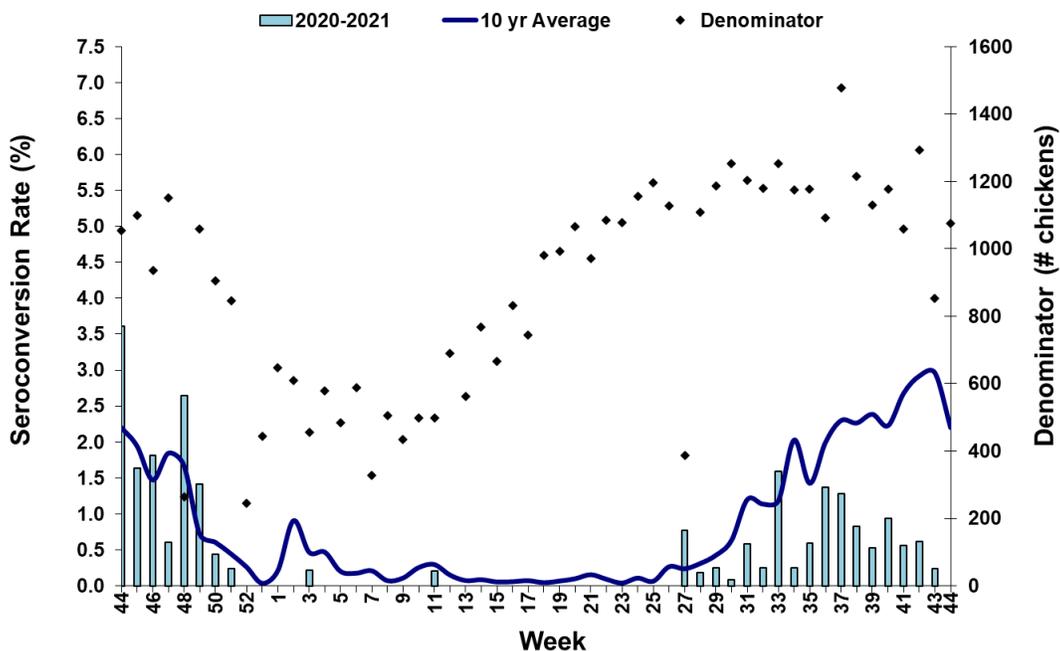

Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

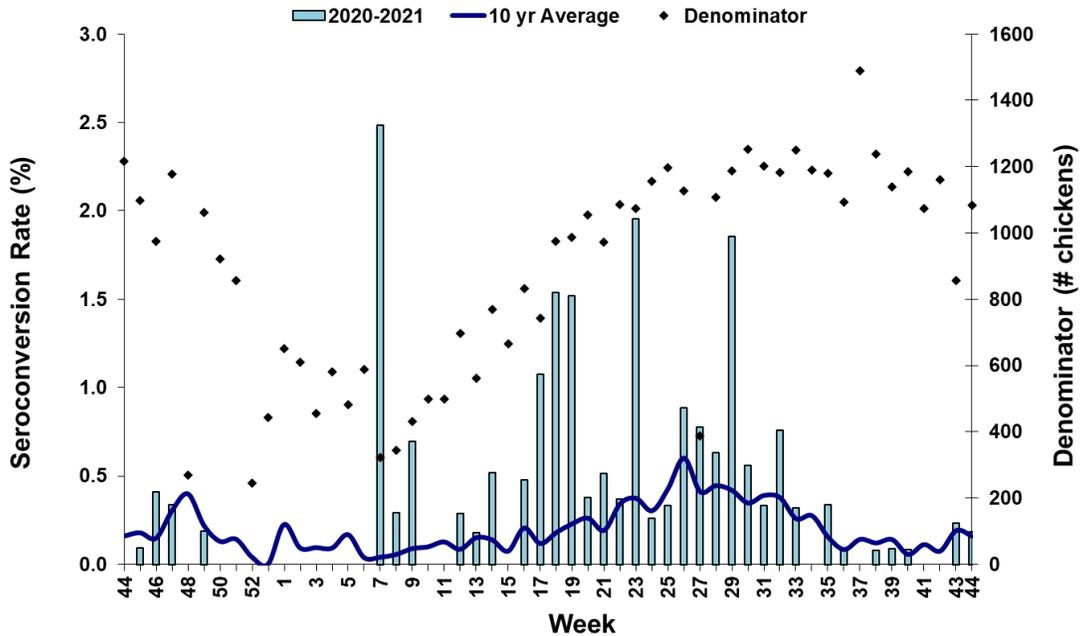

Five sentinel chickens tested positive for antibodies to WNV this week in Indian River, Nassau, St. Johns, St. Lucie, and Walton counties. Two sentinel chickens tested positive for antibodies to SLEV this week in Citrus and Palm Beach counties. Two sentinel chickens tested positive for antibodies to EEEV this week in Duval and Walton counties. Two sentinel chickens tested positive for antibodies to a flavivirus this week in Duval and Sumter counties.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Citrus	10/26/2021	1.47	1.47					1 SLEV	2 WNV, 8 EEEV, 1 SLEV
Duval	9/27/2021 11/1/2021	14.29			5.26	5.26		1 WNV, 3 Flavivirus 1 EEEV	3 WNV, 1 EEEV, 5 Flavivirus
Indian River	10/21/2021	2.13		2.13				1 WNV	1 WNV, 8 EEEV
Nassau	10/23/2021	5.56		2.78				1 WNV, 1 Flavivirus	5 WNV, 12 EEEV, 5 Flavivirus
Palm Beach	10/26/2021	11.11	11.11					1 SLEV	3 SLEV, 5 Flavivirus
St. Johns	10/25/2021	3.70		1.85				1 WNV, 1 Flavivirus	4 WNV, 9 EEEV, 4 Flavivirus
St. Lucie	10/21/2021	5.56		2.78				1 WNV, 1 Flavivirus	2 WNV, 2 EEEV, 1 Flavivirus
Sumter	10/21/2021	4.17						1 Flavivirus	2 Flavivirus
Walton	10/25/2021 11/1/2021	1.28		1.28	3.23	3.23		1 WNV 1 EEEV	57 WNV, 58 EEEV, 6 SLEV, 24 Flavivirus

Sentinel Seroconversions to WNV in Florida, 2020-2021

Sentinel Seroconversions to EEEV in Florida, 2020-2021

Mosquito Pools

No mosquito pools tested positive for WNV or EEEV this week.

County	Collection Date	Result	Species	County YTD

Dead Birds

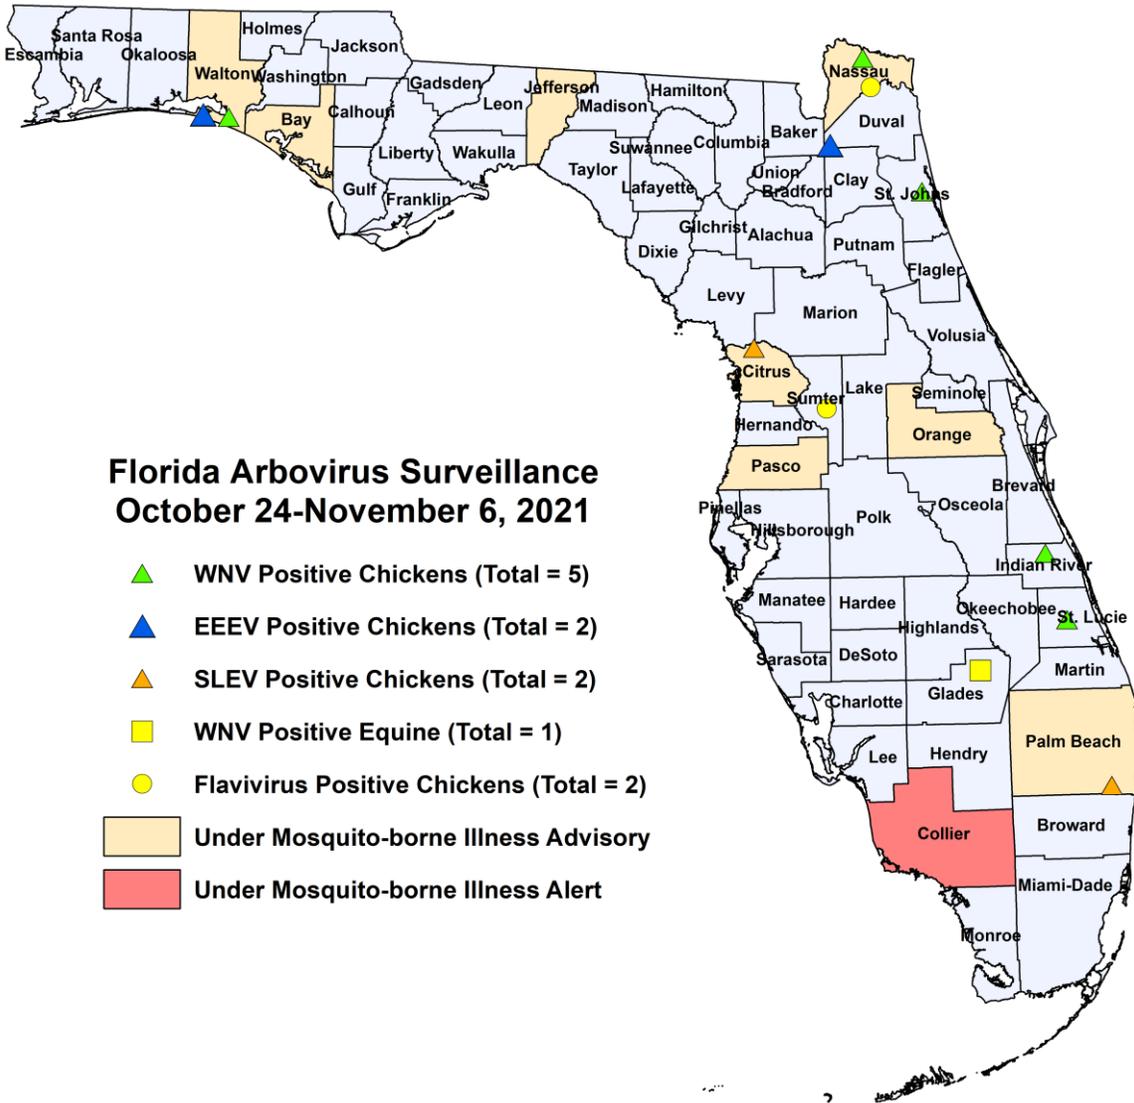

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, two reports representing a total of five dead birds were received from two counties.

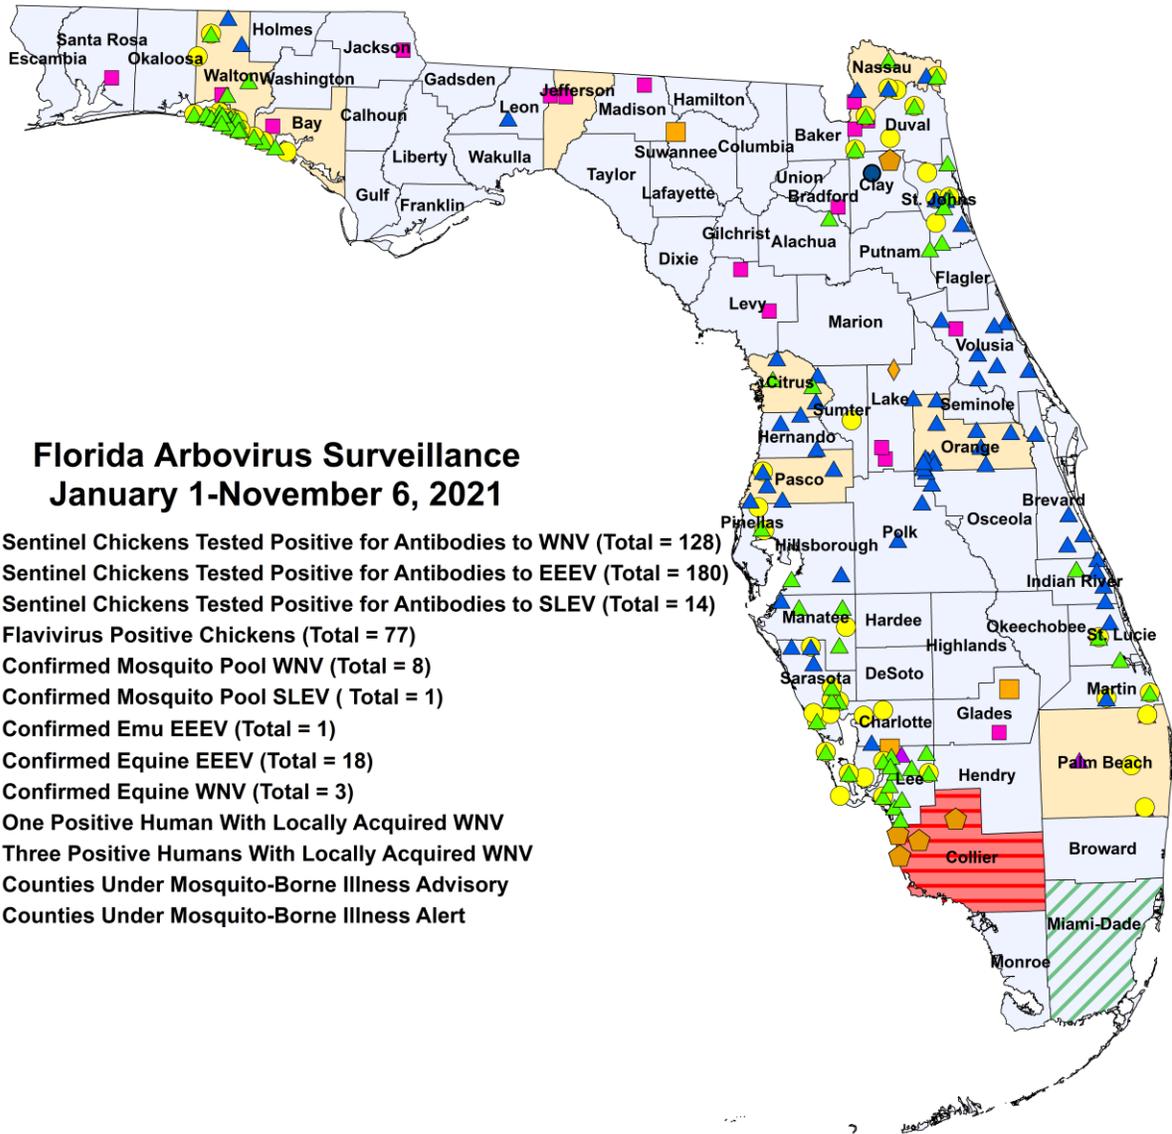

In 2021, 458 reports representing a total of 1,101 dead birds (64 crows, 28 jays, 91 raptors, 140 doves) were received from 50 of Florida's 67 counties.

2021

County	Total Dead Birds	Crows	Jays	Raptors	Doves
Orange	3	0	0	0	0
Palm Beach	2	0	0	0	0

Maps

2021 Arbovirus Activity by County

County	Humans	Equines	Sentinel Chickens	Other
Alachua			2 WNV (10/13) 1 EEEV (7/6)	
Bay		1 EEEV (6/28)	11 WNV (8/16, 8/23, 9/7, 9/13, 9/20) 3 EEEV (6/21, 7/19, 8/9) 3 Flavivirus (9/27, 10/4)	
Bradford		1 EEEV (9/18)		
Brevard			6 EEEV (4/2, 6/9, 6/16, 7/14, 9/1, 10/6)	
Charlotte			2 WNV (9/17, 9/24) 1 EEEV (6/18) 1 SLEV (10/1) 5 Flavivirus (9/24, 10/1, 10/8)	
Citrus			2 WNV (3/16, 9/21) 8 EEEV (3/2, 4/20, 5/3, 5/25, 8/10) 1 SLEV (10/26)	

County	Humans	Equines	Sentinel Chickens	Other
Clay				1 WNV mosquito pool (Cx. quinquefasciatus [9/21]) 1 SLEV mosquito pool (Cx. quinquefasciatus [9/8])
Collier	3 WNV (August)			7 WNV mosquito pools (Cx. nigripalpus [7/13, 8/24, 8/27], Cx. quinquefasciatus [8/6, 8/20, 8/27])
Duval		1 EEEV (8/6)	3 WNV (9/7, 9/27, 10/18) 1 EEEV (11/1) 5 Flavivirus (9/27, 10/4)	
Glades		1 EEEV (10/9) 1 WNV (11/3)		
Hernando			3 EEEV (6/7)	
Hillsborough			1 WNV (10/4) 1 EEEV (8/10) 1 SLEV (10/12) 1 Flavivirus (9/21)	
Indian River			1 WNV (10/21) 8 EEEV (4/8, 4/22, 5/7, 5/20, 7/22, 8/13)	
Jackson		1 EEEV (6/16)		
Jefferson		2 EEEV (6/22, 6/27)		
Lake		2 EEEV (6/3, 10/18)		1 EEEV emu (9/29)
Lee		1 WNV (9/2),	29 WNV (7/7, 7/13, 7/19, 7/26, 8/2, 8/3, 8/16, 8/17, 9/6, 9/7, 9/27, 10/5, 10/12) 1 EEEV (6/1) 2 SLEV (10/12, 10/18) 9 Flavivirus (9/27, 10/5, 10/18)	
Leon		1 EEEV (6/6)	2 EEEV (8/10)	
Levy		2 EEEV (4/18, 6/7)		
Madison		1 EEEV (6/17)		
Manatee			3 WNV (1/20, 8/10, 10/5) 4 EEEV (3/24, 4/7, 5/12, 5/19) 1 Flavivirus (10/5)	
Martin			1 WNV (10/15) 2 EEEV (5/28, 7/23) 2 Flavivirus (10/1, 10/22)	
Miami-Dade	1 WNV (July)			
Nassau		2 EEEV (4/22, 6/8)	5 WNV (8/14, 9/4, 10/2, 10/16, 10/23) 12 EEEV (6/26, 7/10, 7/17, 7/24, 7/31, 8/7, 8/14, 9/4) 5 Flavivirus (10/2, 10/9, 10/23)	
Orange			31 EEEV (2/15, 2/22, 3/1, 3/22, 5/10, 5/17, 6/7, 6/28, 7/6, 7/12, 7/19, 7/26, 8/16, 10/25)	
Palm Beach			3 SLEV (4/19, 4/20, 10/26) 5 Flavivirus (10/4)	
Pasco			8 EEEV (5/10, 6/6, 6/14, 6/21, 7/26) 1 Flavivirus (9/19)	

County	Humans	Equines	Sentinel Chickens	Other
Pinellas			1 WNV sentinel (8/2) 1 Flavivirus (10/4)	
Polk			3 EEEV (5/14, 5/28, 7/23)	
Putnam			1 WNV (9/20)	
Santa Rosa		1 EEEV (8/1)		
Sarasota			3 WNV (8/13, 9/24, 10/1) 6 EEEV (5/4, 5/18, 6/11) 8 Flavivirus (9/17, 9/21, 9/24, 10/1, 10/8)	
St. Johns			4 WNV (10/4, 10/25) 9 EEEV (4/26, 5/3, 6/1, 6/28, 9/20) 4 Flavivirus (9/27, 10/4, 10/11, 10/25)	
St. Lucie			2 WNV (9/9, 10/21) 2 EEEV (5/26) 1 Flavivirus (10/21)	
Sumter			2 Flavivirus (10/12, 10/21)	
Suwannee		1 WNV (10/3)		
Volusia		1 EEEV (1/11)	10 EEEV (2/15, 4/19, 4/26, 5/3, 6/1, 6/7, 8/16, 8/30)	
Walton		1 EEEV (7/25)	57 WNV (8/2, 8/17, 8/23, 8/24, 8/30, 9/7, 9/13, 9/14, 9/20, 9/28, 10/5, 10/18, 10/25) 58 EEEV (4/5, 4/26, 5/3, 5/4, 5/10, 6/7, 6/21, 6/28, 6/30, 7/12, 7/19, 7/20, 7/26, 8/2, 8/3, 8/9, 8/30, 9/7, 9/28, 11/1) 6 SLEV (9/27, 10/11) 24 Flavivirus (8/30, 9/20, 9/27, 9/28, 10/5, 10/11, 10/19)	

*Seventy-seven chickens have tested positive for flavivirus antibodies and require additional specialized testing to distinguish between WNV and SLEV antibodies. Testing is currently delayed due to supply chain issues. The final determination of these birds will be updated as more information becomes available. In Florida, both WNV and SLEV have similar disease vectors and epidemiology. Seroconversion rates for flavivirus are included in the table.

For more surveillance information, please see the DOH website at: www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html

For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at: www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html. Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control

agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
