

Florida Arbovirus Surveillance Week 17: April 24 – April 30, 2011

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), St. Louis encephalitis virus (SLEV), and Highlands J virus (HJV) and exotic viruses such as Dengue virus (DENV) and California encephalitis group viruses (CEV). Malaria, a non-viral mosquito-borne disease is also included. During the period April 24 – April 30, 2011, the following arboviral activity was recorded in Florida:

DENV activity: No new cases of dengue associated with Key West were reported this week.

EEEV activity: One brown thrasher in Okaloosa County tested positive for antibodies to EEEV.

WNV activity: No WNV activity was reported this week.

SLEV activity: No SLEV activity was reported this week.

HJV activity: No HJV activity was reported this week.

Advisories/Alerts: Miami-Dade County is under mosquito-borne illness advisory.

Year to Date Human Case Summary

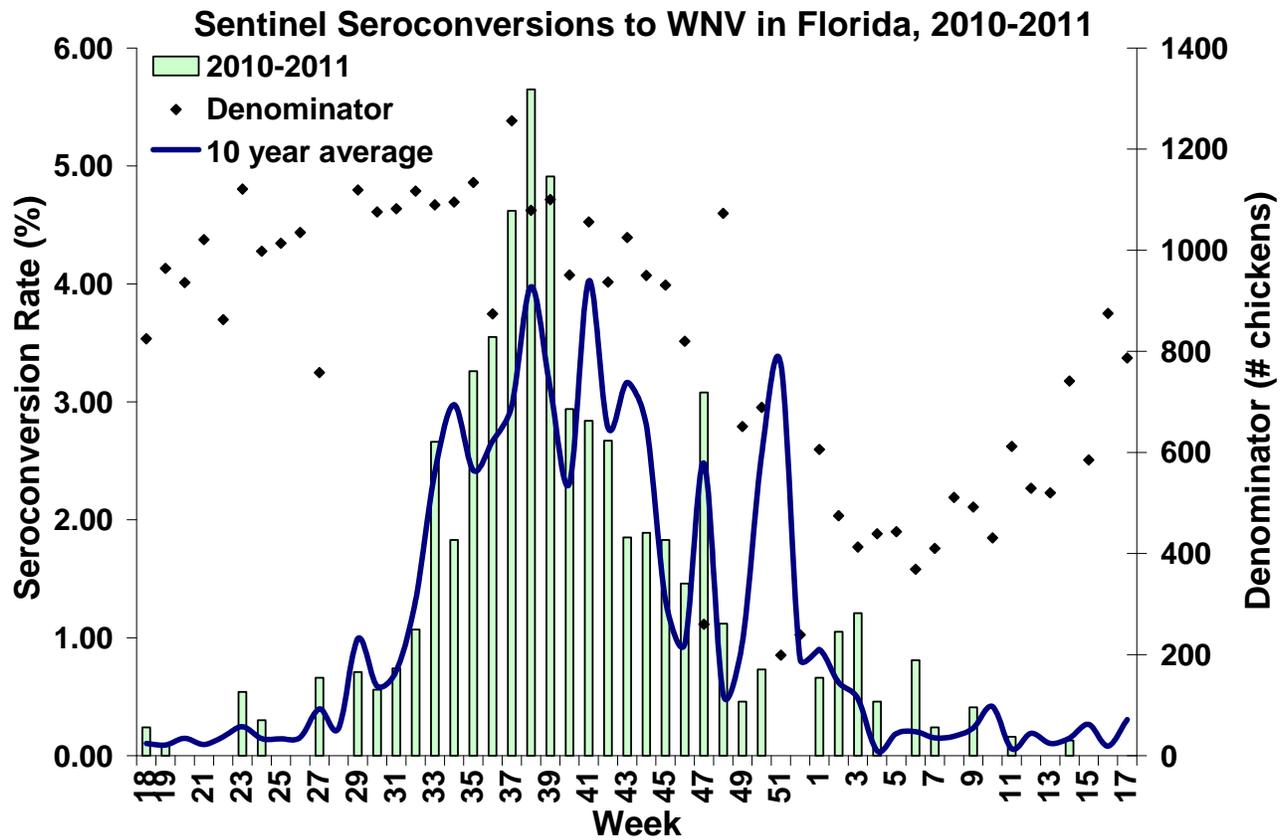

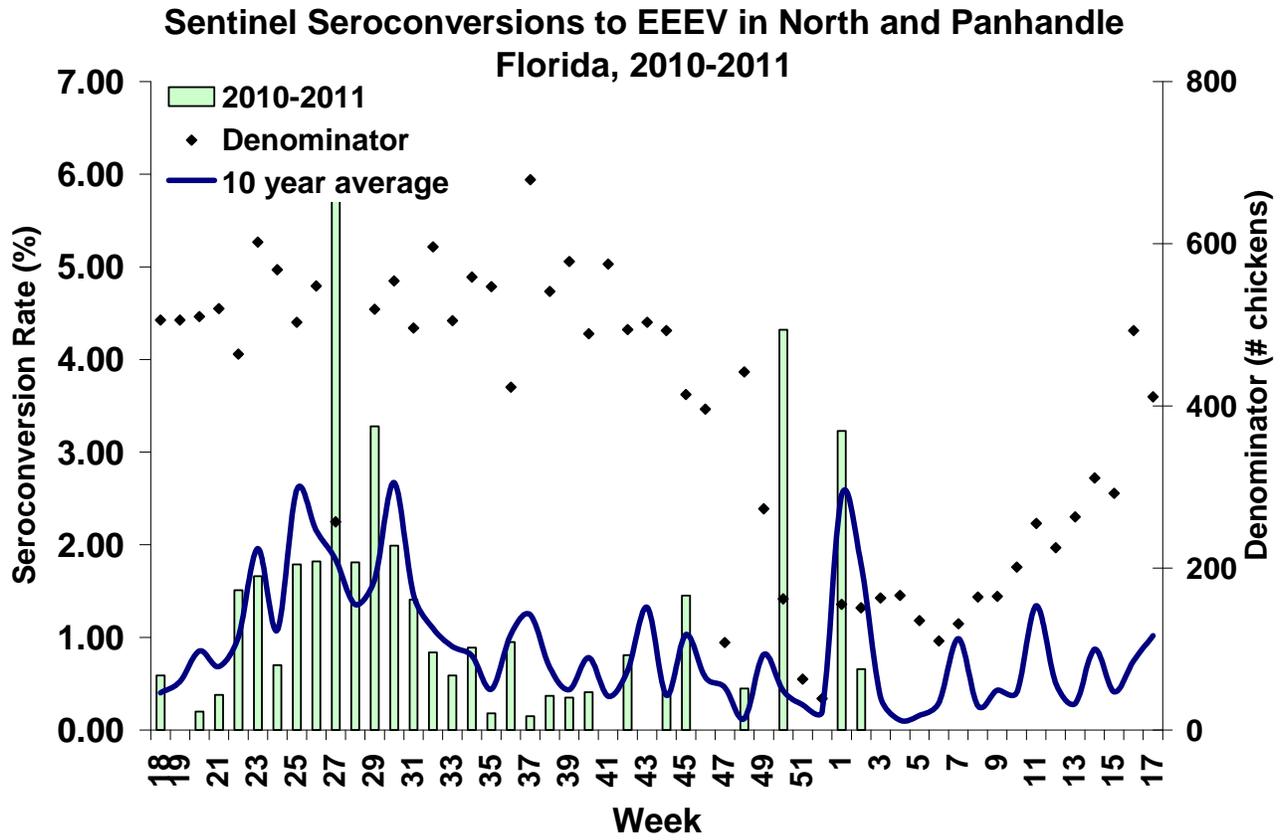

Dengue Acquired in Florida: In 2011, one case of locally acquired dengue has been reported in Miami-Dade County.

Imported Dengue: Four cases of dengue with onset in 2011 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Countries of origin were Colombia, India, Turks and Caicos Islands and Venezuela. Counties reporting cases were Miami-Dade (2), Pasco and Pinellas.

Imported Malaria: Twenty-eight imported cases of malaria with onset in 2011 have been reported. Countries of origin were: Ethiopia (2), Eritrea, Guyana, Haiti (13), India (3), Liberia (2), Mali, Mexico, Nigeria, Peru, Rwanda and Uganda. Counties reporting cases were: Alachua, Brevard, Broward (3), Collier (2), Duval (3), Hillsborough, Indian River, Lee (2), Miami-Dade (7), Orange, Palm Beach (4) Pinellas and St. Lucie.

Sentinel Chickens

No positive sentinels reported this week.

Live Wild Birds

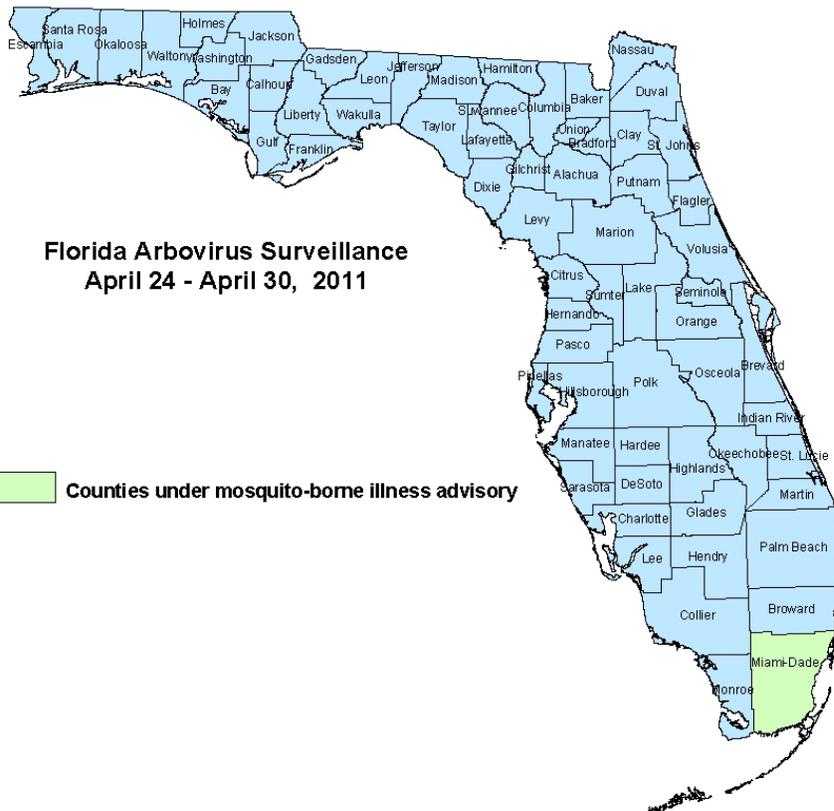

Out of 19 live wild birds collected from three counties on April 15 - April 21, 2011, one brown thrasher in Okaloosa County tested positive for antibodies to EEEV.

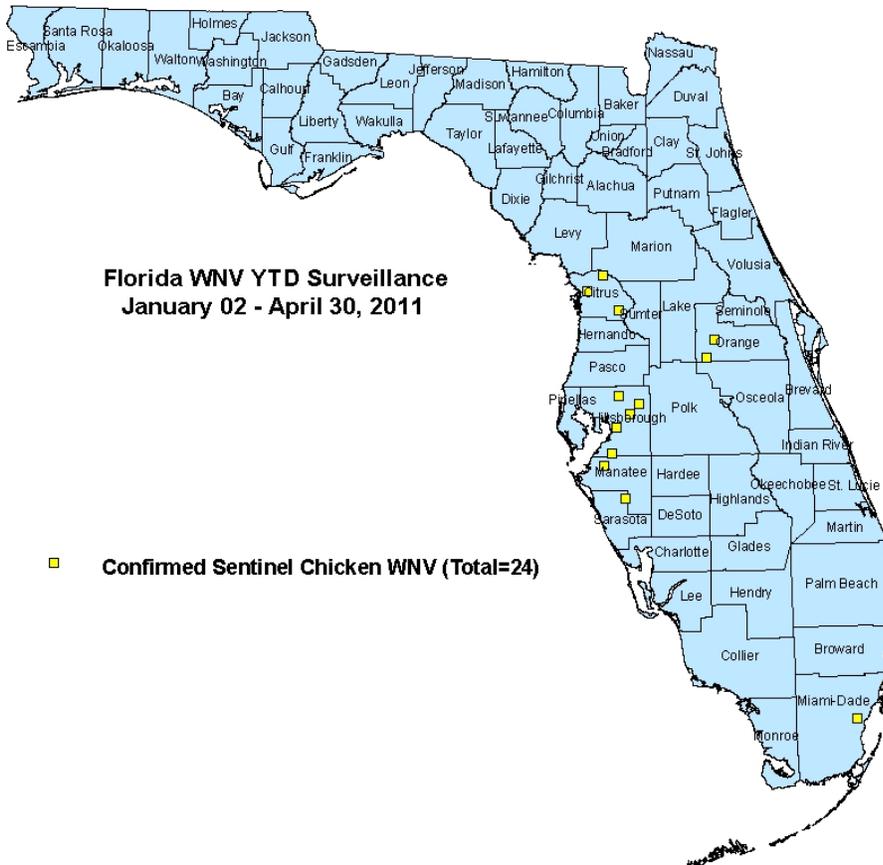

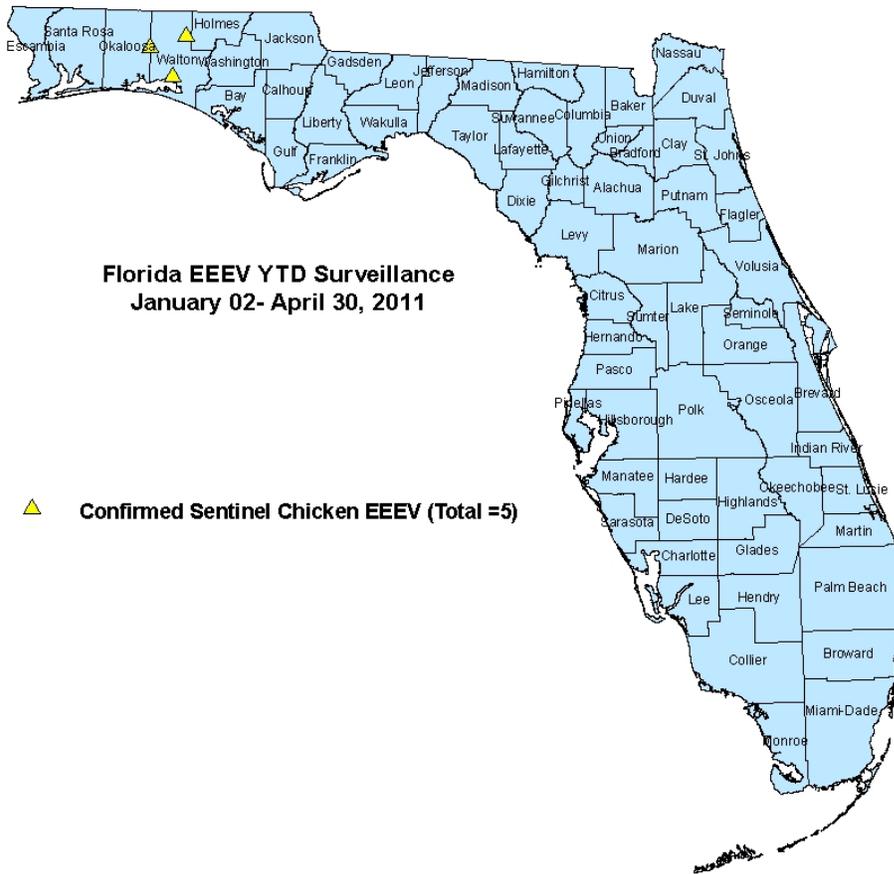

County	Collection Date	EEEV	Flavi	Species	EEEV Rate	Flavi Rate	County YTD
Okaloosa	4/20/11	1		Brown thrasher	1 out of 2	N/A	5 EEEV

Dead Birds

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 4 reports representing 10 dead birds were received from 3 counties. One was identified as a crow and one as a raptor. None were identified as jays. In 2011, one hundred and twenty reports representing a total of 420 dead birds (8 crows, 28 jays, 33 raptors, 351 others) were received from 35 of Florida's 67 counties. Please note that FWC collects reports of birds that have died from a variety of causes, not only arboviruses. Dead birds should be reported to www.myfwc.com/bird/

Maps

YTD Arbovirus Activity by County

County	Arbovirus Activity
Citrus	WNV: 3 sentinels (1/3, 1/11)
Dade	WNV: 1 sentinel (1/18)
Hillsborough	WNV : 13 sentinels (1/4, 1/11, 1/18, 1/25, 2/9, 3/1)
Manatee	WNV: 1 sentinel (4/4)
Okaloosa	EEE : 5 live wild birds (2 blue jays 1/10, 4/11; 1 cardinal 1/ 11 and 2 brown thrashers 2/21, 4/20)
Orange	WNV : 3 sentinels (1/3, 1/18, 1/24) HJV : 1 sentinel (2/24)
Santa Rosa	EEE: 5 live wild birds (1 house sparrow 1/05 and 4 blue jays 3/1, 2/1, 4/12)
Sarasota	WNV: 3 sentinels (1/4, 2/14, 3/14)
Walton	EEE : 5 sentinels (1/6) ; 2 live wild birds (2 cardinals 1/14, 1/21) HJV: 1 sentinel (1/14)
