

Florida Arbovirus Surveillance Week 23: June 2 - 8, 2013

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), St. Louis encephalitis virus (SLEV), and Highlands J virus (HJV) and exotic viruses such as dengue virus (DENV) and California encephalitis group viruses (CEV). Malaria, a non-viral mosquito-borne disease is also included. During the period of June 2- 8, 2013 the following arboviral activity was recorded in Florida:

DENV activity: No locally acquired dengue cases have been reported in 2013.

EEEV activity: No human cases of EEEV infection were reported this week. No horse cases of EEEV infection were reported this week. Five sentinel chickens tested positive for antibodies to EEEV this week in St. Johns and Walton Counties. In 2013, positive samples from two human, three birds, seven equines, and 29 sentinel chickens have been received from 15 counties.

WNV activity: No human cases of WNV infection have been reported in 2013. No horse cases of WNV infection were reported this week. Four sentinel chickens tested positive this week for antibodies to WNV in Walton County. In 2013, positive samples from 45 sentinel chickens have been received from four counties.

SLEV activity: No sentinel chickens tested positive for antibodies to SLEV this week. In 2013, two positive samples have been received from two counties.

HJV activity: No sentinel chickens tested positive for antibodies to HJV this week. In 2013, nine positive samples have been received from four counties.

Advisories/Alerts: Hillsborough and Levy counties are currently under a mosquito-borne illness advisory. No other counties are currently under mosquito-borne illness advisory or alert.

2013 Human Case Summary*

EEEV Infection Acquired in Florida: Two human cases of EEEV infection with onset in January (1) and March (1) have been reported in 2013 in Levy (1) and Hillsborough (1) County residents.

Imported Dengue: Forty cases of dengue with onset in 2013 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Countries of origin were: Angola, Barbados, Brazil (3), The Caribbean, Columbia (3), Costa Rica, Dominican Republic (4), Haiti (2), Honduras, Indonesia, Jamaica (4), Nigeria, Panama, Philippines, Puerto Rico (14), and Saint Martin. Counties reporting cases were: Brevard, Broward (3), Clay, Duval, Indian River, Lee, Miami-Dade (14), Orange (8), Osceola (2), Palm Beach (6), St. Lucie, and Volusia. Five of the cases were reported in non-Florida residents.

In 2013, 26 of the 40 cases of dengue reported in Florida have been serotyped by PCR. Additional serotyping and strain typing are being conducted.

	# of cases per serotype – 2013
DENV-1	18
DENV-2	0
DENV-3	3
DENV-4	5
	26

Imported Malaria: Twenty-one cases of malaria with onset in 2013 have been reported. Countries of origin were: Benin, Democratic Republic of the Congo, Guinea, Ghana (3), Guyana (4), Haiti (5), Kenya, Liberia, Nigeria, Sierra Leone (2), and Solomon Islands. Counties reporting cases were: Alachua, Hillsborough (4), Lake, Lee, Miami-Dade (6), Orange (4), Palm Beach (2), Pinellas, and Seminole. One of the cases was reported in a non-Florida resident.

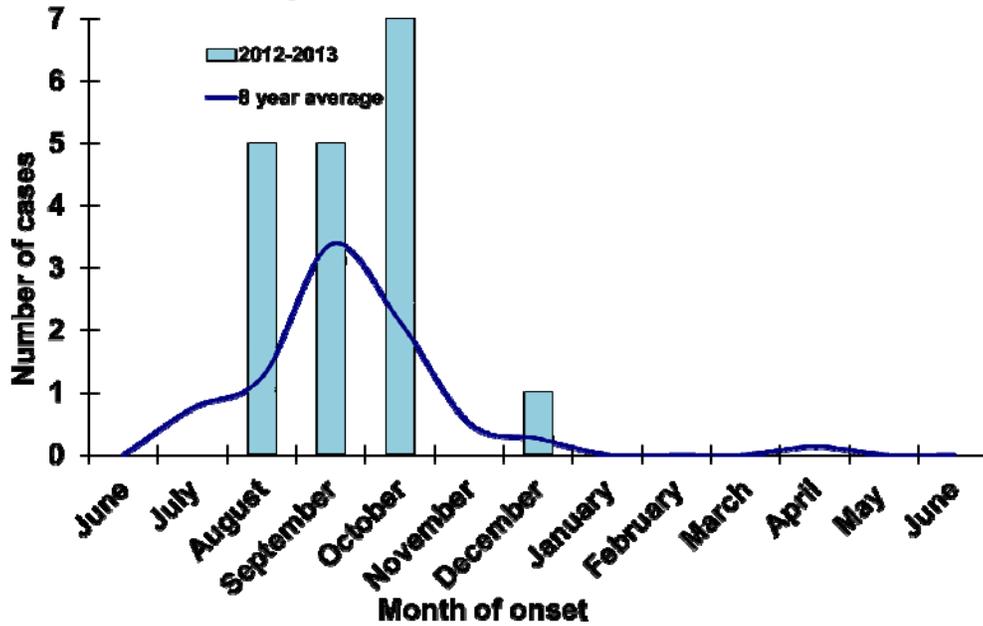

Fifteen cases (71%) were diagnosed with *Plasmodium falciparum*, five (24%) with *Plasmodium vivax*, and one mixed *Plasmodium falciparum/ Plasmodium vivax* (5%).

Veterinary Cases

No horses were reported testing positive for EEEV this week.

Veterinary WNV Disease in Florida, June 2012-2013

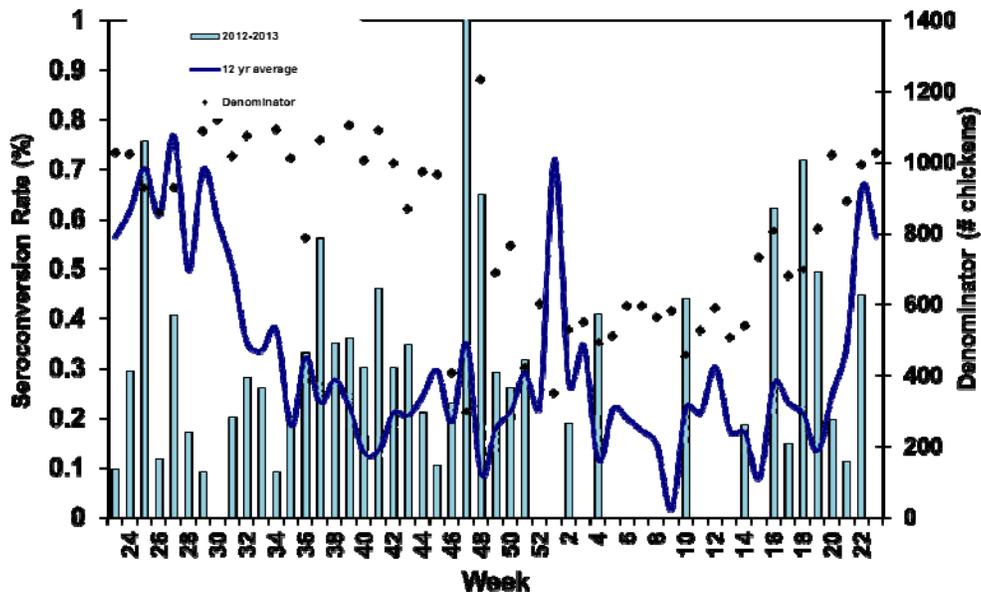

Sentinel Chickens

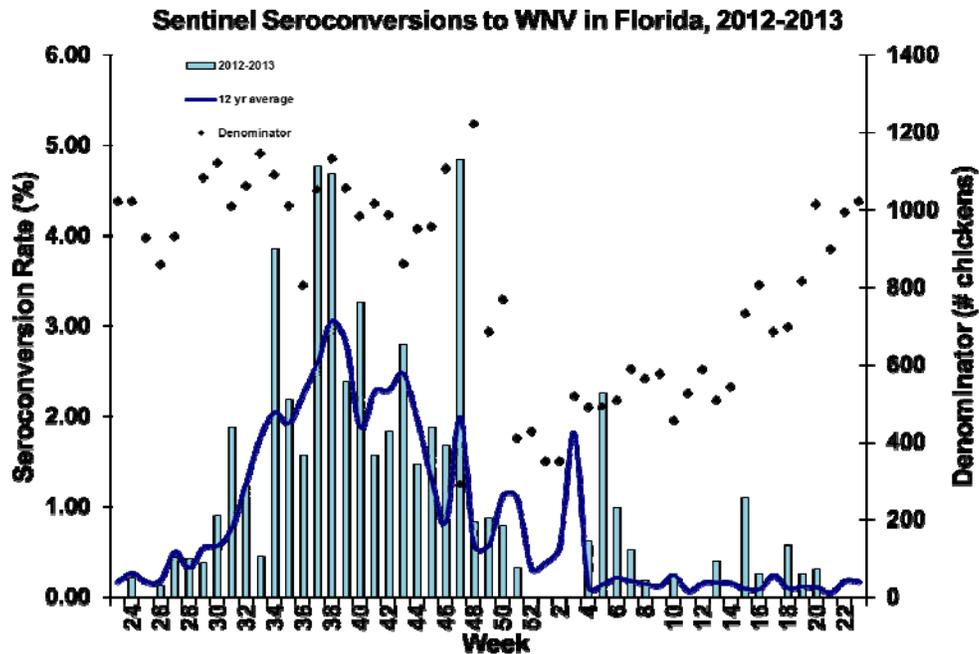

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Four sentinel chickens tested positive this week for antibodies to WNV in Walton County. Five sentinel chickens tested positive for antibodies to EEEV this week in St. Johns and Walton Counties.

County	Collection Date	Seroconversion Rates (%)				County Totals	
		SLEV	WNV	EEEV	HJV	Collection Week	YTD
St. Johns	5/28/2013			1.69		1 EEEV	4 EEEV
Walton	5/7/2013		0.94			1 WNV, 2 EEEV	
	5/13/2013		2.94			3 WNV, 2 EEEV, 5 HJV	
	5/28/2013			4.40		4 EEEV	40 WNV, 20 EEEV, 5 HJV

Sentinel Seroconversions to EEEV in Florida, 2012-2013

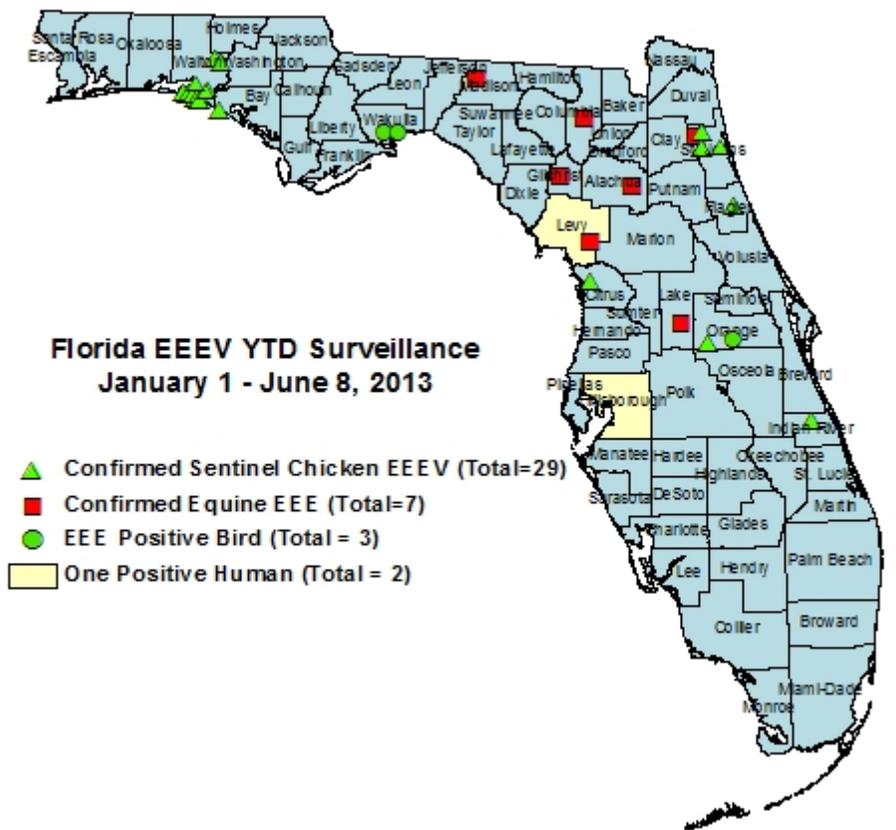

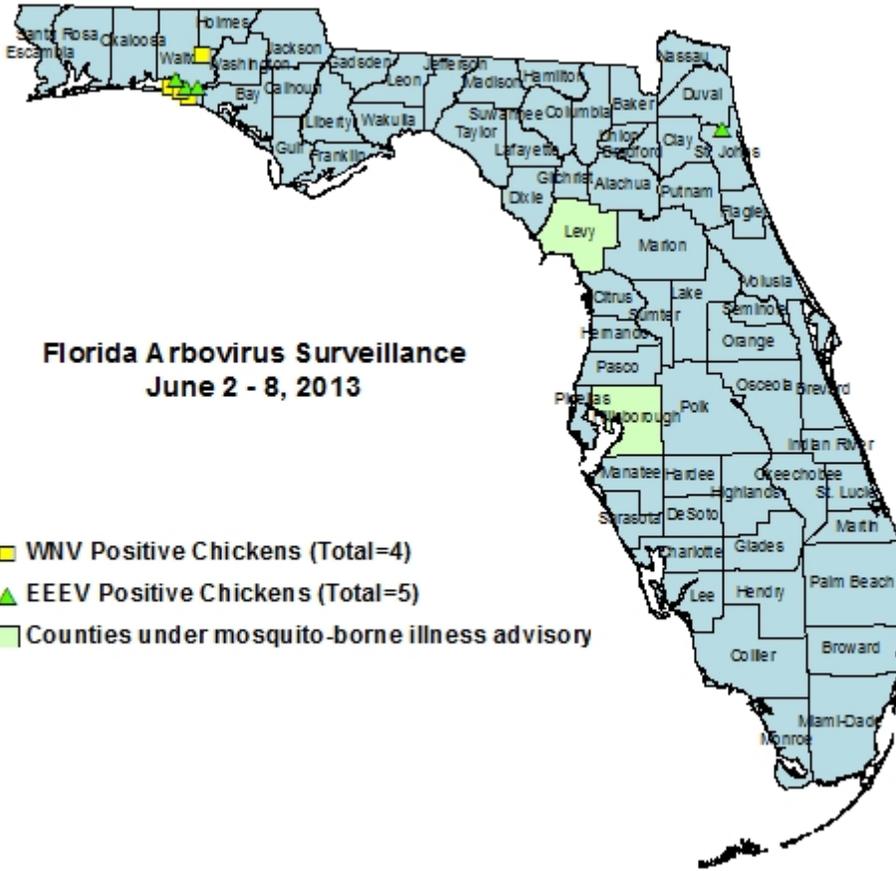

Dead Birds

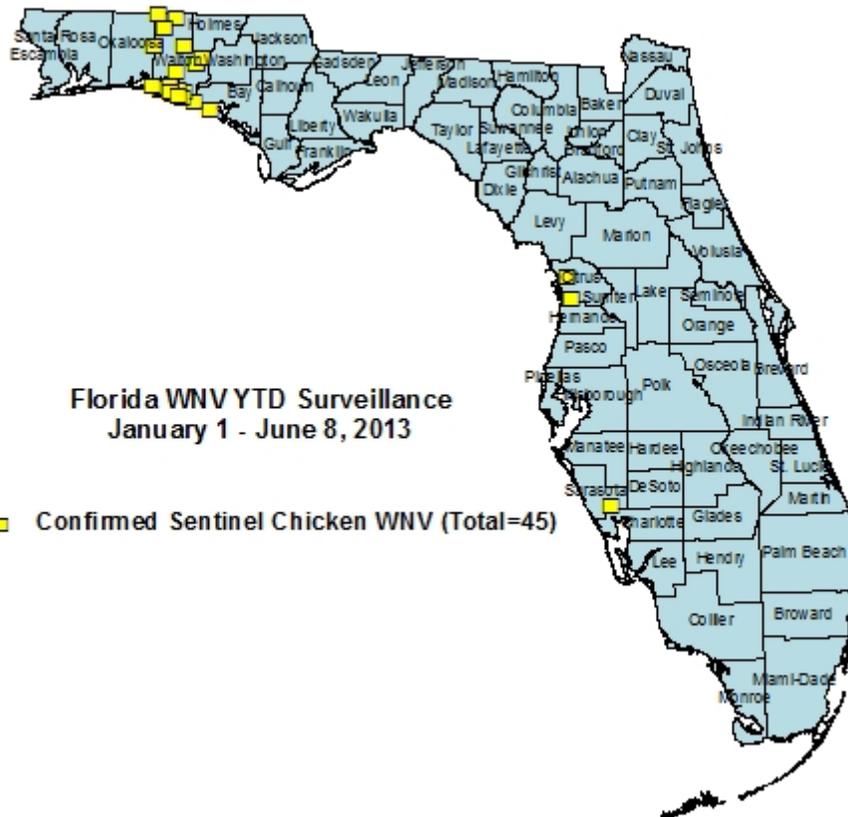

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 3 reports representing 12 dead birds, including 1 raptor were received from 3 counties.

In 2013, 452 reports representing a total of 1516 dead birds (11 crow, 7 jays, 82 raptors, 15 doves) were received from 43 of Florida's 67 counties. Please note that FWC collects reports of birds that have died from a variety of causes, not only arboviruses. Dead birds should be reported to www.myfwc.com/bird/

County	Total Dead Birds	Crows	Jays	Raptors	Dove
Hernando	1	0	0	0	0
Manatee	1	0	0	0	0
Marion	10	0	0	0	0

Maps

2013 Arbovirus Activity by County

County	Arbovirus Activity
Alachua	EEEV: 1 horse (2/13)
Bay	EEEV: 1 sentinel (5/21) WNV: 1 sentinel (5/7) HJV: 1 sentinel (5/7)
Citrus	EEEV: 1 sentinel (4/15) WNV: 3 sentinels (1/21, 1/28) SLEV: 1 sentinel (1/21) HJV: 2 sentinels (3/25, 4/2)
Columbia	EEEV: 1 horse (5/4)
Flagler	EEEV: 1 sentinel (4/22)
Gilchrist	EEEV: 1 horse (2/6)
Hillsborough	EEEV: 1 human (March)
Indian River	EEEV: 1 sentinel (5/9)
Lake	EEEV: 1 horse (1/30)
Levy	EEEV: 1 human (January) ; 1 horse (1/7)
Madison	EEEV: 1 horse (2/16)
Orange	EEEV: 1 sentinel (5/2) ; 1 Bird (1/1)
Sarasota	WNV : 1 sentinel (5/3) SLEV: 1 sentinel (4/5)
Seminole	HJV: 1 sentinel (5/7)
St. Johns	EEEV : 1 horse (3/1) ; 4 sentinels (4/8, 5/6, 5/28)
Wakulla	EEEV : 2 Birds (4/8)
Walton	EEEV : 20 sentinels (1/7, 2/26, 3/25, 4/15, 4/29, 4/30, 5/6, 5/13, 5/28) WNV : 40 sentinels (1/7, 1/14, 1/15, 1/23, 1/28, 2/4, 2/20, 3/11, 4/8, 4/9, 4/15, 4/29, 4/30, 5/7, 5/13)

County	Arbovirus Activity
Alachua	EEEV: 1 horse (2/13)
Bay	EEEV: 1 sentinel (5/21) WNV: 1 sentinel (5/7) HJV: 1 sentinel (5/7)
Citrus	EEEV: 1 sentinel (4/15) WNV: 3 sentinels (1/21, 1/28) SLEV: 1 sentinel (1/21) HJV: 2 sentinels (3/25, 4/2)
Columbia	EEEV: 1 horse (5/4)
Flagler	EEEV: 1 sentinel (4/22)
Gilchrist	EEEV: 1 horse (2/6)
Hillsborough	EEEV: 1 human (March)
Indian River	EEEV: 1 sentinel (5/9)
Lake	EEEV: 1 horse (1/30) HJV : 5 sentinels (5/13)

*Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, and malaria. In addition, dengue and malaria tallies may also include suspect cases. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at:

http://www.doh.state.fl.us/Disease_ctrl/epi/surv/CaseDefinitions/2012CaseDef_FINAL.pdf

Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred.

Data is provided by county health departments, Department of Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
