

## Florida Arbovirus Surveillance Week 50: December 7 - 13, 2014

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV) and California encephalitis group viruses (CEV). Malaria, a non-viral mosquito-borne disease is also included. During the period of December 7-13, 2014 the following arboviral activity was recorded in Florida.

**WNV activity:** No human cases of WNV illness were reported this week. No horses with WNV infection were reported this week. Three sentinel chickens tested positive for antibodies to WNV this week in Indian River, Orange, and Sumter Counties. In 2014, positive samples from 325 sentinel chickens, 5 horses, 15 human cases, and 2 asymptomatic blood donors have been received from 31 counties.

**SLEV activity:** No human cases of SLE were reported this week. One sentinel chicken tested positive for antibodies to SLEV this week in Manatee County. In 2014, positive samples from 2 human cases and 106 sentinel chickens have been received from 13 counties.

**EEEV activity:** No human cases of EEE were reported this week. No horses with EEEEV infection were reported this week. One sentinel chicken tested positive for antibodies to EEEEV this week in Orange County. In 2014, positive samples from 172 sentinel chickens, 2 deer, and 56 horses have been received from 32 counties.

**International Travel-Associated Dengue Fever Cases:** Two cases of dengue fever were reported this week in persons that had international travel. In 2014, 80 travel-associated cases have been reported.

**Dengue Fever Cases Acquired in Florida:** No new cases of locally acquired dengue fever were reported this week. In 2014, a total of six cases of locally acquired dengue fever have been reported.

**International Travel-Associated Chikungunya Fever Cases:** Seventeen cases of chikungunya fever were reported this week in persons that had international travel. In 2014, 423 travel-associated cases have been reported.

**Chikungunya Fever Cases Acquired in Florida:** No new cases of locally acquired chikungunya fever were reported this week. In 2014, a total of 11 cases of locally acquired chikungunya fever have been reported.

**Advisories/Alerts:** Alachua, Broward, Clay, Columbia, Flagler, Jefferson, Leon, Levy, Lafayette, Marion, Polk, Putnam, Santa Rosa, St. Johns, Suwannee and Washington Counties are currently under a mosquito-borne illness advisory. Duval and Volusia Counties are currently under a mosquito-borne illness alert. No other counties are currently under mosquito-borne illness advisory or alert. A CDC Health Alert Network (HAN) health advisory was issued in December for the Caribbean region announcing the first locally acquired cases of chikungunya fever in the Americas. There is a Level 1 (Watch) Travel Health Notice from the CDC for multiple countries in the Caribbean related to the continued transmission of chikungunya which was updated October 21, 2014.

## 2014 Human Case Summary\*

**West Nile Virus Illnesses Acquired in Florida:** A total of fifteen human cases of WNV illness acquired in Florida have been reported in 2014; one in Alachua (August), one in Clay (October), three in Escambia (July, August, September), two in Duval (August, September), one in Leon (August), one in Marion (October), one in Pasco (August), one in Polk (September) and four in Volusia (August, September) Counties. Two asymptomatic positive blood donors were reported from Santa Rosa (July) and St. Johns (September) Counties.

**International Travel-Associated Dengue Fever Cases:** Eighty cases of dengue with onset in 2014 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Countries of origin were: Bangladesh, Bolivia, Brazil (2), Caribbean, Columbia, Costa Rica (5), Cuba (27), Cuba/Bahamas, Dominican Republic (9), El Salvador (2), Guadeloupe, Guatemala, Guyana, Haiti (4), Honduras (7), Jamaica (2), Mexico (3), Puerto Rico (6), Sri Lanka, Trinidad, and Venezuela (3). Counties reporting cases were: Alachua, Brevard (2), Broward (7), Clay, Collier, Highlands, Hillsborough (5), Lee, Manatee (2), Marion, Miami-Dade (37), Orange (4), Osceola (6), Palm Beach (5), Pinellas, Seminole (2), St. Lucie (2), and Volusia. Seven of the cases were reported in non-Florida residents. In 2014, 35 of the 80 cases of dengue reported in Florida have been serotyped by PCR. Additional serotyping and strain typing are being conducted.

**Dengue Fever Cases Acquired in Florida:** In 2014, a total of six cases of locally acquired dengue fever have been reported. Six cases of dengue in Miami-Dade residents with onset in June, August, and September have been reported as acquired in Miami-Dade County.

**International Travel-Associated Chikungunya Fever Cases:** Four hundred and twenty-three cases of chikungunya with onset in 2014 have been reported in individuals with travel history to a chikungunya endemic country or area experiencing an outbreak in the two weeks prior to onset. Countries of origin were: Antigua (2), Antigua/Barbuda, Barbados, Bequia, Colombia (3), Cuba (7), Dominica/Guadalupe, Dominican Republic (86), El Salvador (6), Grenada, Guatemala, Guyana (10), Haiti (106), Haiti/Dominican Republic, Honduras (2), India, Indonesia, Jamaica (58), Martinique (2), Nicaragua, Philippines, Puerto Rico (111), Puerto Rico/Dominican Republic (2), South America, St. Lucia (2), St. Thomas/St. Martin/Bahamas (2), St. Thomas, St. Vincent and the Grenadines, Trinidad (2), Trinidad/Tobago (2), Venezuela (2), and Virgin Islands (4). Counties reporting cases were: Alachua (2), Brevard (4), Broward (75), Charlotte (3), Clay (2), Collier (2), Duval (10), Escambia (2), Flagler, Hernando (3), Highlands, Hillsborough (36), Indian River (2), Lake (5), Lee (16), Leon (2), Manatee (3), Marion, Miami-Dade (76), Monroe, Nassau, Okaloosa (2), Orange (52), Osceola (17), Palm Beach (43), Pasco (4), Pinellas (11), Polk (23), Santa Rosa, Sarasota (3), Seminole (9), St. Johns (2), St. Lucie (3), Volusia (4), and Walton. Thirty-two of the cases were reported in non-Florida residents.

**Chikungunya Fever Cases Acquired in Florida:** In 2014, a total of eleven cases of locally acquired chikungunya fever have been reported. One case of chikungunya fever with onset in July was acquired in Broward County. Two cases of chikungunya fever with onset in June were acquired in Miami-Dade County. Four cases of chikungunya fever with onset in July were acquired in Palm Beach County. Four cases of chikungunya fever with onset in July and August were acquired in St. Lucie County.

**International Travel-Associated Malaria Cases:** Fifty-nine cases of malaria with onset in 2014 have been reported. Countries of origin were: Angola (3), Cameroon, Dominican Republic, East Africa,

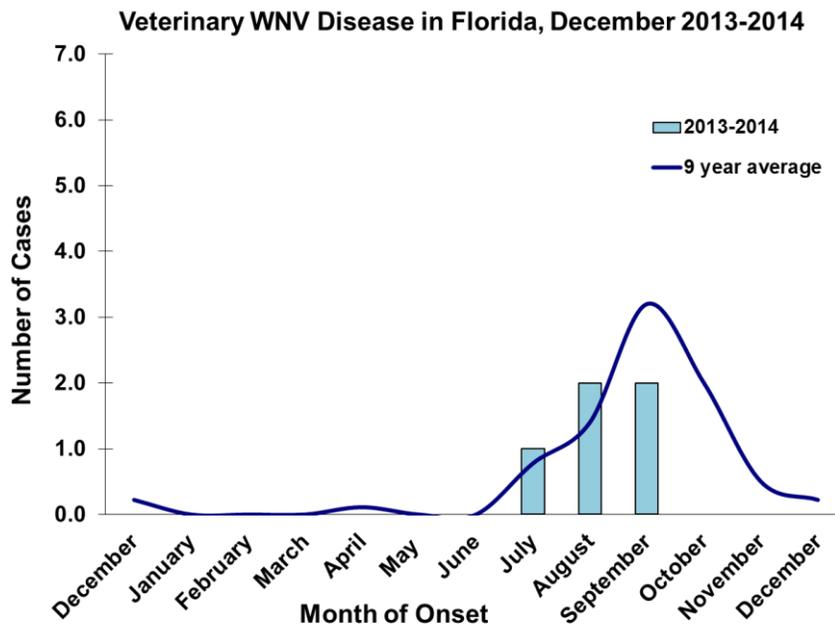

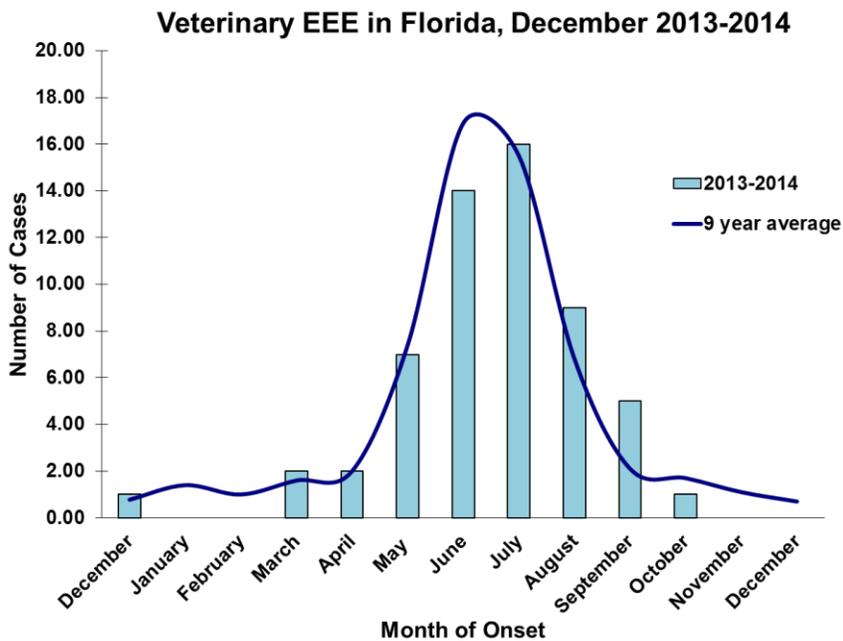

Equatorial Guinea (2), Ghana (3), Ghana/Rwanda, Ghana/Senegal, Ghana/Togo, Guatemala, Guyana, Haiti, Honduras, India (9), Ivory Coast (3), Kenya (3), Liberia, Nigeria (10), Nigeria/Ethiopia, Papua New Guinea, Peru, Sierra Leone (5), Sudan, Togo, Uganda (2), and multiple sub-Saharan African countries (3). Counties reporting cases were: Broward (8), Clay, Duval (3), Escambia, Hernando, Hillsborough (10), Leon, Miami-Dade (13), Okaloosa (2), Orange (7), Osceola (2), Palm Beach (5), Pasco, Pinellas (2), Santa Rosa, and Seminole. Sixteen of the cases were reported in non-Florida residents.

Forty-two cases (71%) were diagnosed with *Plasmodium falciparum*. Twelve cases (20%) were diagnosed with *Plasmodium vivax*. Two cases (3%) were diagnosed with *Plasmodium malariae*. Three cases (5%) were diagnosed with *Plasmodium ovale*.

**Veterinary Cases\***

\*Veterinary cases are reported by date of onset

No horses with EEEV or WNV infection were reported this week

## Sentinel Chickens

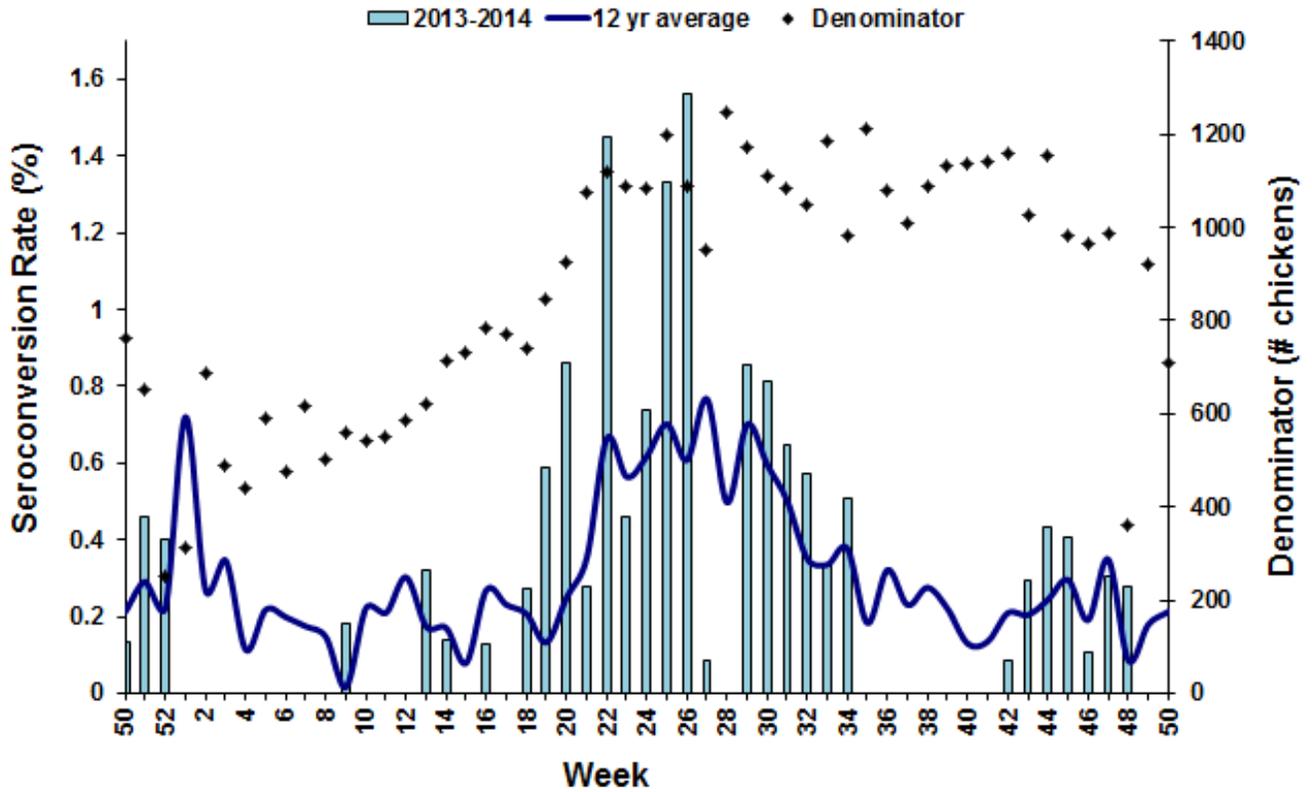

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Three sentinel chickens tested positive for antibodies to WNV this week in Indian River, Orange, and Sumter Counties. One sentinel chicken tested positive for antibodies to SLEV this week in Manatee County. One sentinel chicken tested positive for antibodies to EEEV this week in Orange County. Two sentinel chickens tested positive for antibodies to HJV this week in Citrus and Orange Counties (state total of 71 positives for 2014).

## Dead Birds

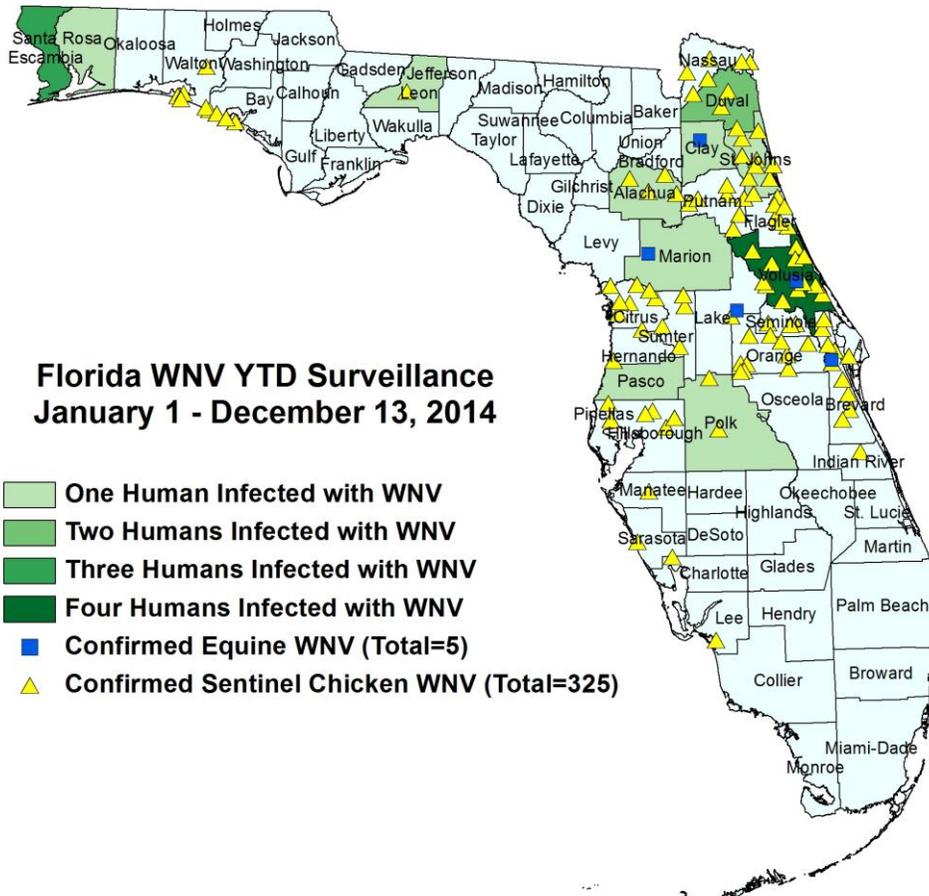

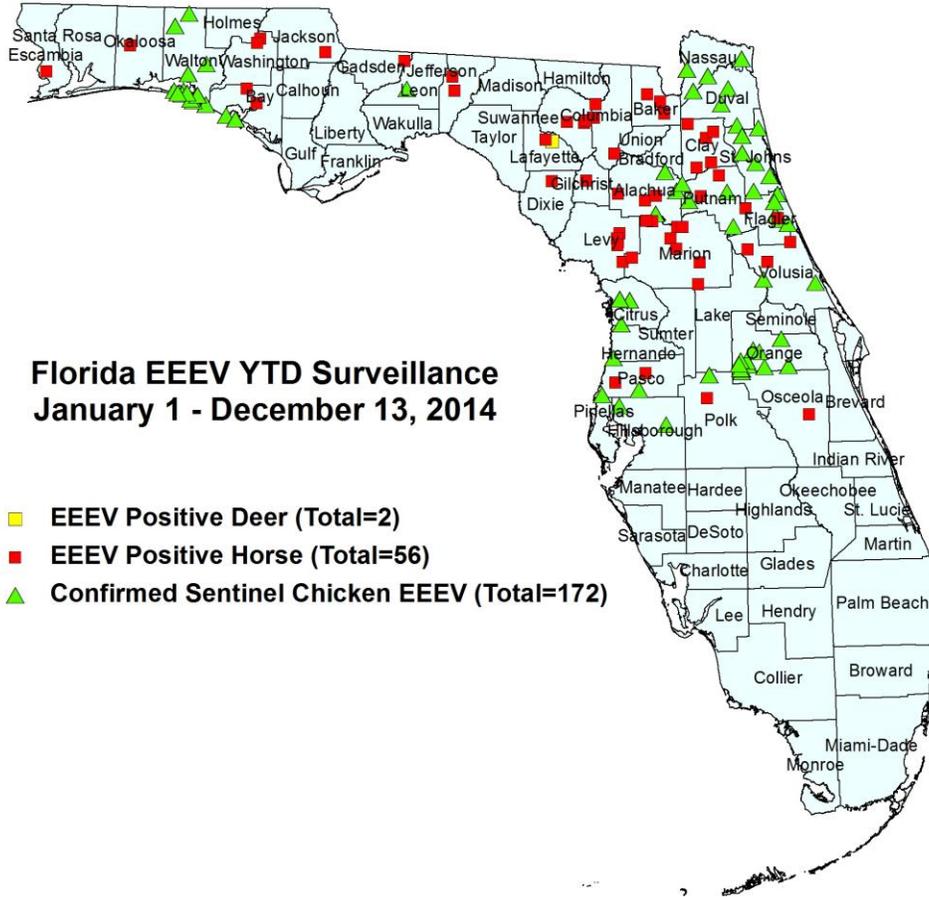

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 7 reports representing 12 dead birds including 1 crow and 4 raptors were received from 7 counties.

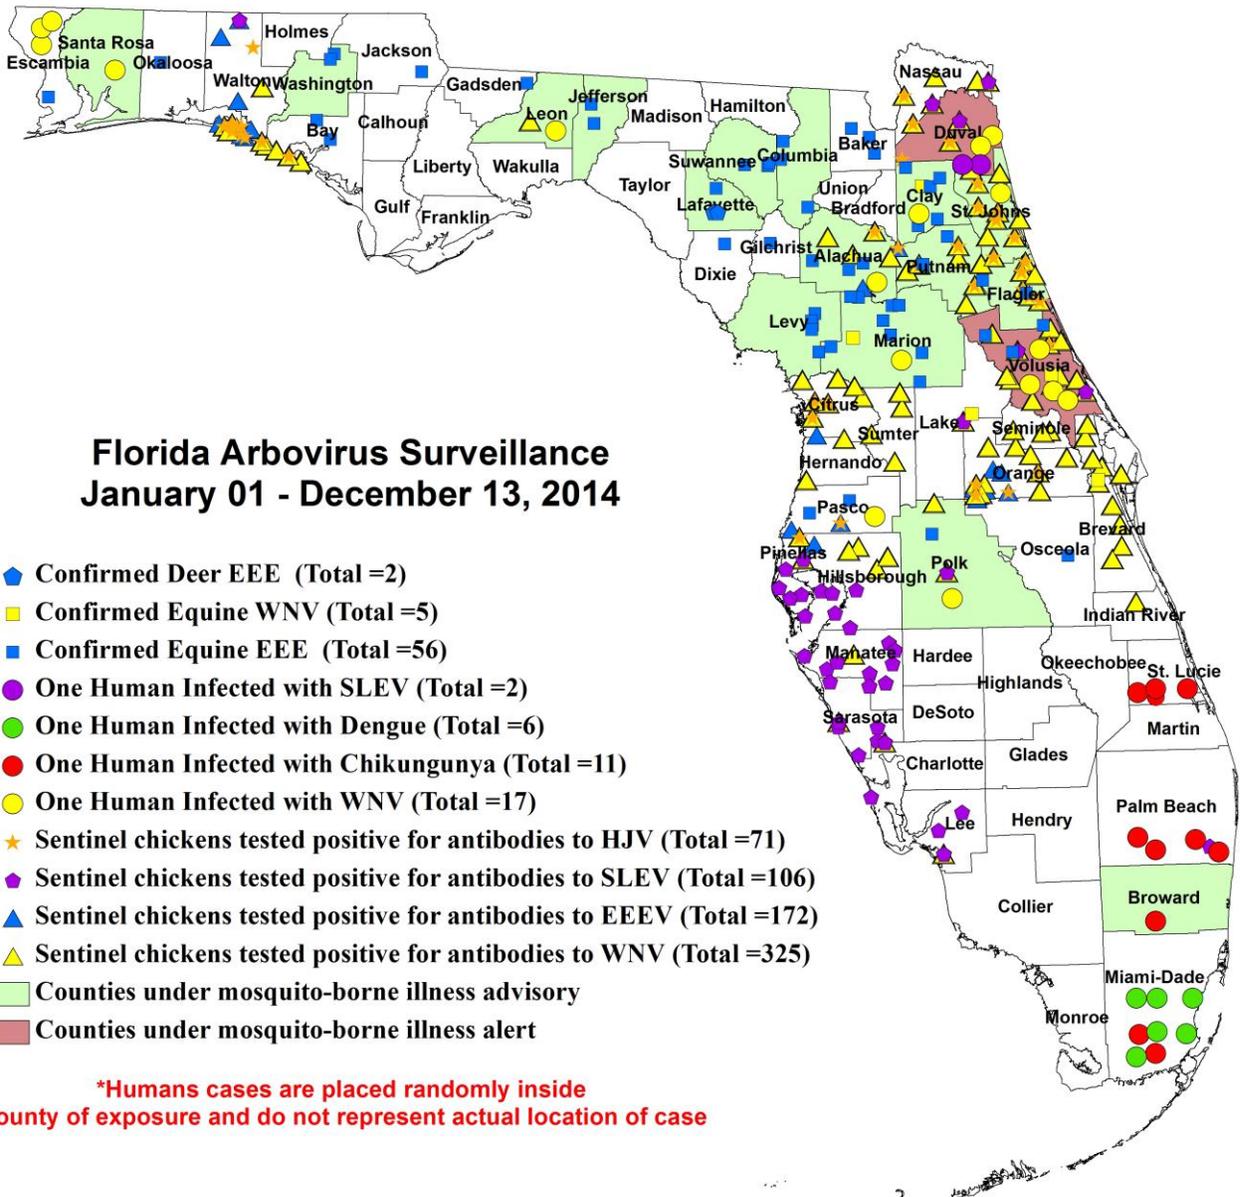

In 2014, 369 reports representing a total of 1015 dead birds (29 crows, 7 jay, 81 raptors, and 34 doves) were received from 48 of Florida's 67 counties. Please note that FWC collects reports of birds that have died from a variety of causes, not only arboviruses. Dead birds should be reported to [www.myfwc.com/bird/](http://www.myfwc.com/bird/)
