

## Florida Arbovirus Surveillance

### Week 27: June 29-July 5, 2025

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV), and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease is also included. During the period of June 29-July 5, 2025, the following arboviral activity was recorded in Florida.

**WNV activity:** Two human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. One sentinel chicken tested positive for antibodies to WNV this week in Volusia County. In 2025, positive samples from three asymptomatic blood donors, one horse, and 30 sentinel chickens have been reported from 15 counties.

**SLEV activity:** No human cases of SLEV infection were reported this week. No sentinel chickens tested positive for antibodies to SLEV this week. In 2025, no cases of SLEV have been reported.

**EEEV activity:** No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. Three sentinel chickens tested positive for antibodies to EEEV this week in Orange and Walton counties. In 2025, positive samples from four horses, two emus, and 19 sentinel chickens have been reported from nine counties.

**International Travel-Associated Dengue:** One case of dengue was reported this week in a person that had international travel. In 2025, 99 travel-associated dengue cases have been reported.

**Dengue Cases Acquired in Florida:** One case of locally acquired dengue was reported this week. In 2025, three cases of locally acquired dengue have been reported from two counties.

**International Travel-Associated Chikungunya Fever Cases:** No cases of chikungunya fever were reported this week in persons that had international travel. In 2025, four cases of travel-associated chikungunya fever have been reported.

**Chikungunya Fever Cases Acquired in Florida:** No cases of locally acquired chikungunya fever were reported this week. In 2025, no cases of locally acquired chikungunya fever have been reported.

**International Travel-Associated Oropouche Fever cases:** No cases of Oropouche fever were reported this week in persons that had international travel. In 2025, no cases of travel-associated Oropouche fever have been reported.

**International Travel-Associated Zika Fever Cases:** No cases of Zika fever were reported this week in persons that had international travel. In 2025, no travel-associated Zika fever cases have been reported.

**Zika Fever Cases Acquired in Florida:** No cases of locally acquired Zika fever were reported this week. In 2025, no cases of locally acquired Zika fever have been reported.

**Advisories/Alerts:** Brevard, Escambia, and St. Johns counties are currently under a mosquito-borne illness advisory. Miami-Dade County is currently under a mosquito-borne illness alert. No other counties are currently under a mosquito-borne illness advisory or alert.

There are currently multiple travel health notices from the Centers for Disease Control and Prevention related to mosquito-borne diseases.

Dengue			Oropouche	Yellow Fever	Chikungunya		Malaria
Africa and the Middle East	Americas	Asia and the Pacific Islands	Americas	Americas	Africa	Americas	Africa
Comoros	Brazil	Austral Islands	Brazil (Espírito Santo)	Bolivia	Kenya	Bolivia	Ethiopia
Iran	Colombia	Banaba	Brazil	Brazil	Madagascar		
Samoa	Cuba	Cook Islands	Colombia	Colombia	Mauritius		
Sudan	Ecuador	Fiji	Cuba	Peru	Mayotte		
	Guadeloupe	French Polynesia	(Darién) Panama		Réunion		
	Guatemala	Kiribati	Panama		Somalia		
	Panama	Marquesas Islands	Peru		Sri Lanka		
	Saint Lucia	Moorea	Venezuela				
		Philippines					
		Tonga					

Level 1 Travel Health Notice, Level 2 Travel Health Alert: [wwwnc.cdc.gov/travel/notices](http://wwwnc.cdc.gov/travel/notices).

## 2025 Human Case Summary

**West Nile Virus Illness Acquired in Florida:** In 2025, three asymptomatic blood donors have been reported in Escambia (June) and St. Johns (June) counties.

**2025 International Travel-Associated Chikungunya Cases:** Four cases with onset in 2025 have been reported in individuals with travel history to a chikungunya-endemic area in the two weeks prior to onset. Counties reporting cases were: Broward (2), Lake, and Miami-Dade. Countries of origin were: Bolivia, Brazil, Indonesia, and Sri Lanka.

**2025 International Travel-Associated Dengue Cases:** Ninety-nine cases with onset in 2025 have been reported in individuals with travel history to a dengue-endemic area in the two weeks prior to onset. Counties reporting cases were: Bay, Brevard, Broward (10), Clay, Collier (2), Duval (2), Escambia, Hillsborough (5), Lake (3), Lee (2), Manatee, Marion, Miami-Dade (47), Okeechobee (3), Orange (6), Osceola (2), Palm Beach (5), Pasco, Pinellas, Polk, St. Johns, St. Lucie, and Volusia. Five cases were reported in non-Florida residents. In 2025, 82 cases of dengue reported in Florida have been serotyped by PCR. Please see the table below for a breakdown of cases by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	Unknown	Total
Antigua and Barbuda			1			1
Argentina	2					2
Bonaire			1			1
Brazil	1	4	1		3	9
Colombia	1	1	1			3
Cuba		1	3	34	7	45
Ecuador			2			2
El Salvador			1			1
French Polynesia					1	1
Guatemala			2			2
Guyana		2			1	3
Mexico			7			7
Nicaragua			3		1	4
Peru			1			1
Philippines					1	1
Puerto Rico			8		1	9
St. Barts			3			3

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	Unknown	Total
St. Barts/St. Martin			1			1
US Virgin Islands		1			2	3
<b>Total</b>	<b>4</b>	<b>9</b>	<b>35</b>	<b>34</b>	<b>17</b>	<b>99</b>

**2025 Dengue Cases Acquired in Florida:** In 2025, three cases of locally acquired dengue have been reported in Brevard and Miami-Dade (2) counties with onset in February, May, and June. Three cases have been serotyped by PCR. Please see the table below for a breakdown of cases by county and serotype.

County of Exposure	DENV-3	DENV-4	Total
Miami-Dade	1	1	2
Brevard	1		1
<b>Total</b>	<b>2</b>	<b>1</b>	<b>3</b>

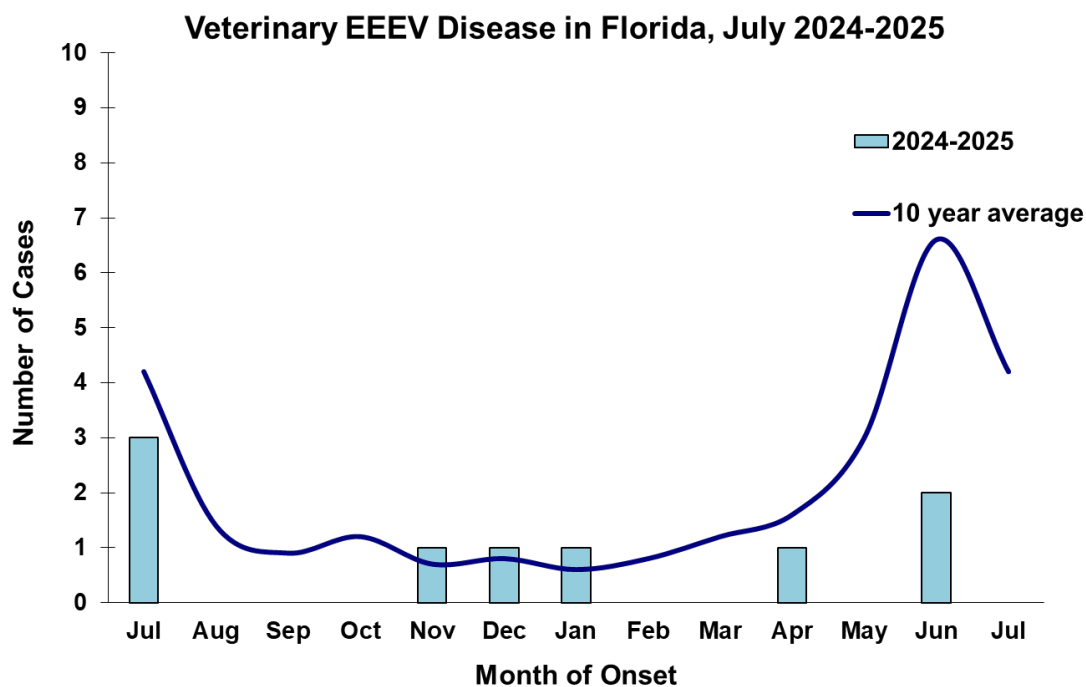

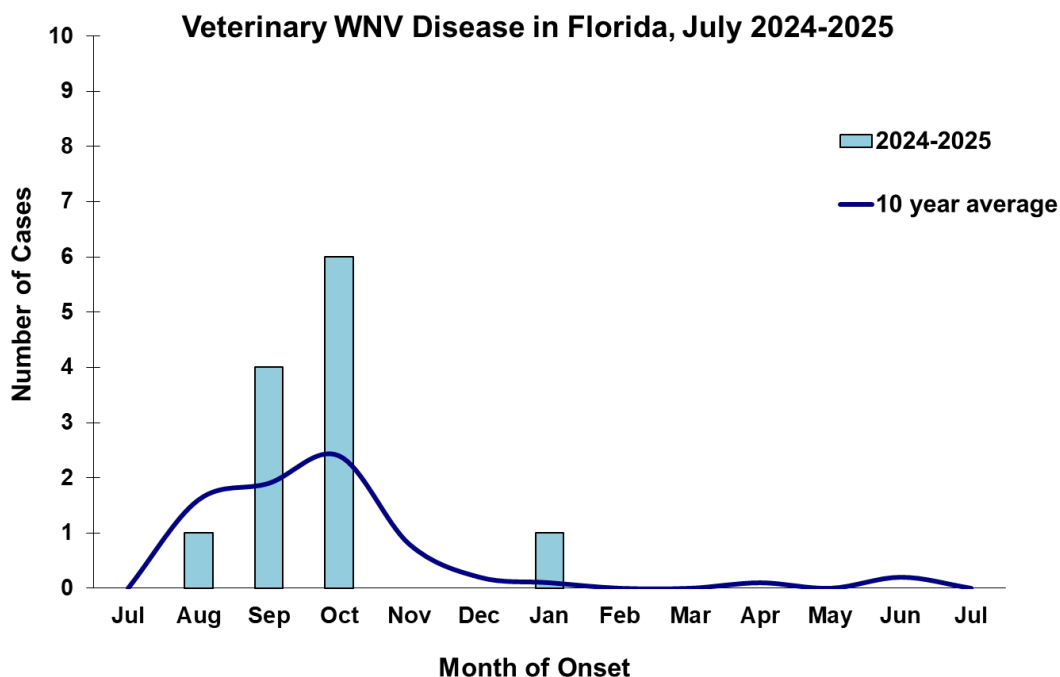

**2025 International Travel-Associated Malaria Cases:** Twenty-one cases with onset in 2025 have been reported in individuals with travel history to a malaria-endemic area. Counties reporting cases were: Alachua, Brevard, Broward (3), Collier, Hillsborough, Lake, Miami-Dade (4), Nassau, Orange (2), Palm Beach (2), Polk (2), and St. Lucie (2). Seven cases were reported in non-Florida residents. Please see the table below for a breakdown of cases by country of origin and *Plasmodium* species.

Country of Exposure	<i>Plasmodium falciparum</i>	<i>Plasmodium vivax</i>	Total
Africa	2		2
Angola	1		1
Cameroon	1		1
Central America		1	1
Central/South America		2	2
Côte D'Ivoire	1		1
Gambia	1		1
Haiti	1		1
Honduras		1	1
India		1	1
Malawi	1		1
Nigeria	5		5
Rwanda	1		1
Siera Leone	1		1
Uganda	1		1
<b>Total</b>	<b>16</b>	<b>5</b>	<b>21</b>

## Veterinary Cases\*\*

\*\*Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

No veterinary cases were reported this week.

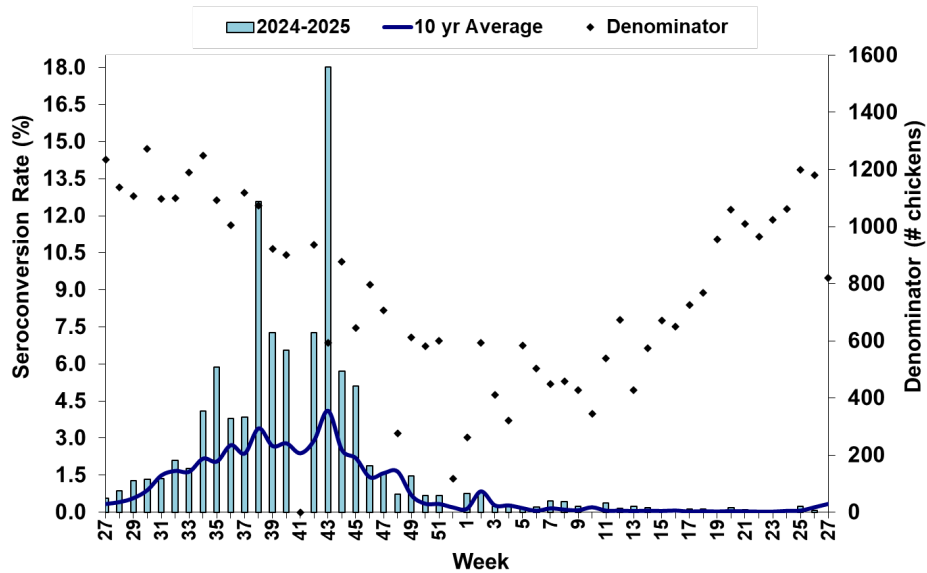

## Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

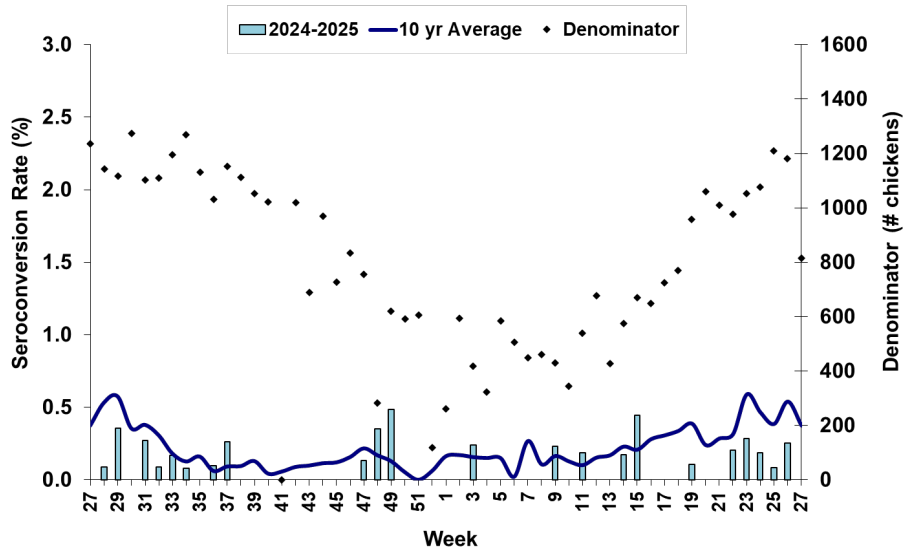

One sentinel chicken tested positive for antibodies to WNV this week in Volusia County. Three sentinel chickens tested positive for antibodies to EEEV in Orange and Walton counties.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Orange	6/23/2025				1.69	1.69		2 EEEV	7 EEEV, 1 WNV
Volusia	6/23/2025	5.00		5.00				1 WNV	2 EEEV, 1 WNV
Walton	6/23/2025				1.01	1.01		1 EEEV	3 EEEV, 1 WNV

**Sentinel Seroconversions to WNV in Florida, 2024–2025**

**Sentinel Seroconversions to EEEV in Florida, 2024–2025**

## Mosquito Pools

No mosquito pools tested positive for EEEV or WNV this week.

County	Collection Date	Result	Species	County YTD
--------	-----------------	--------	---------	------------

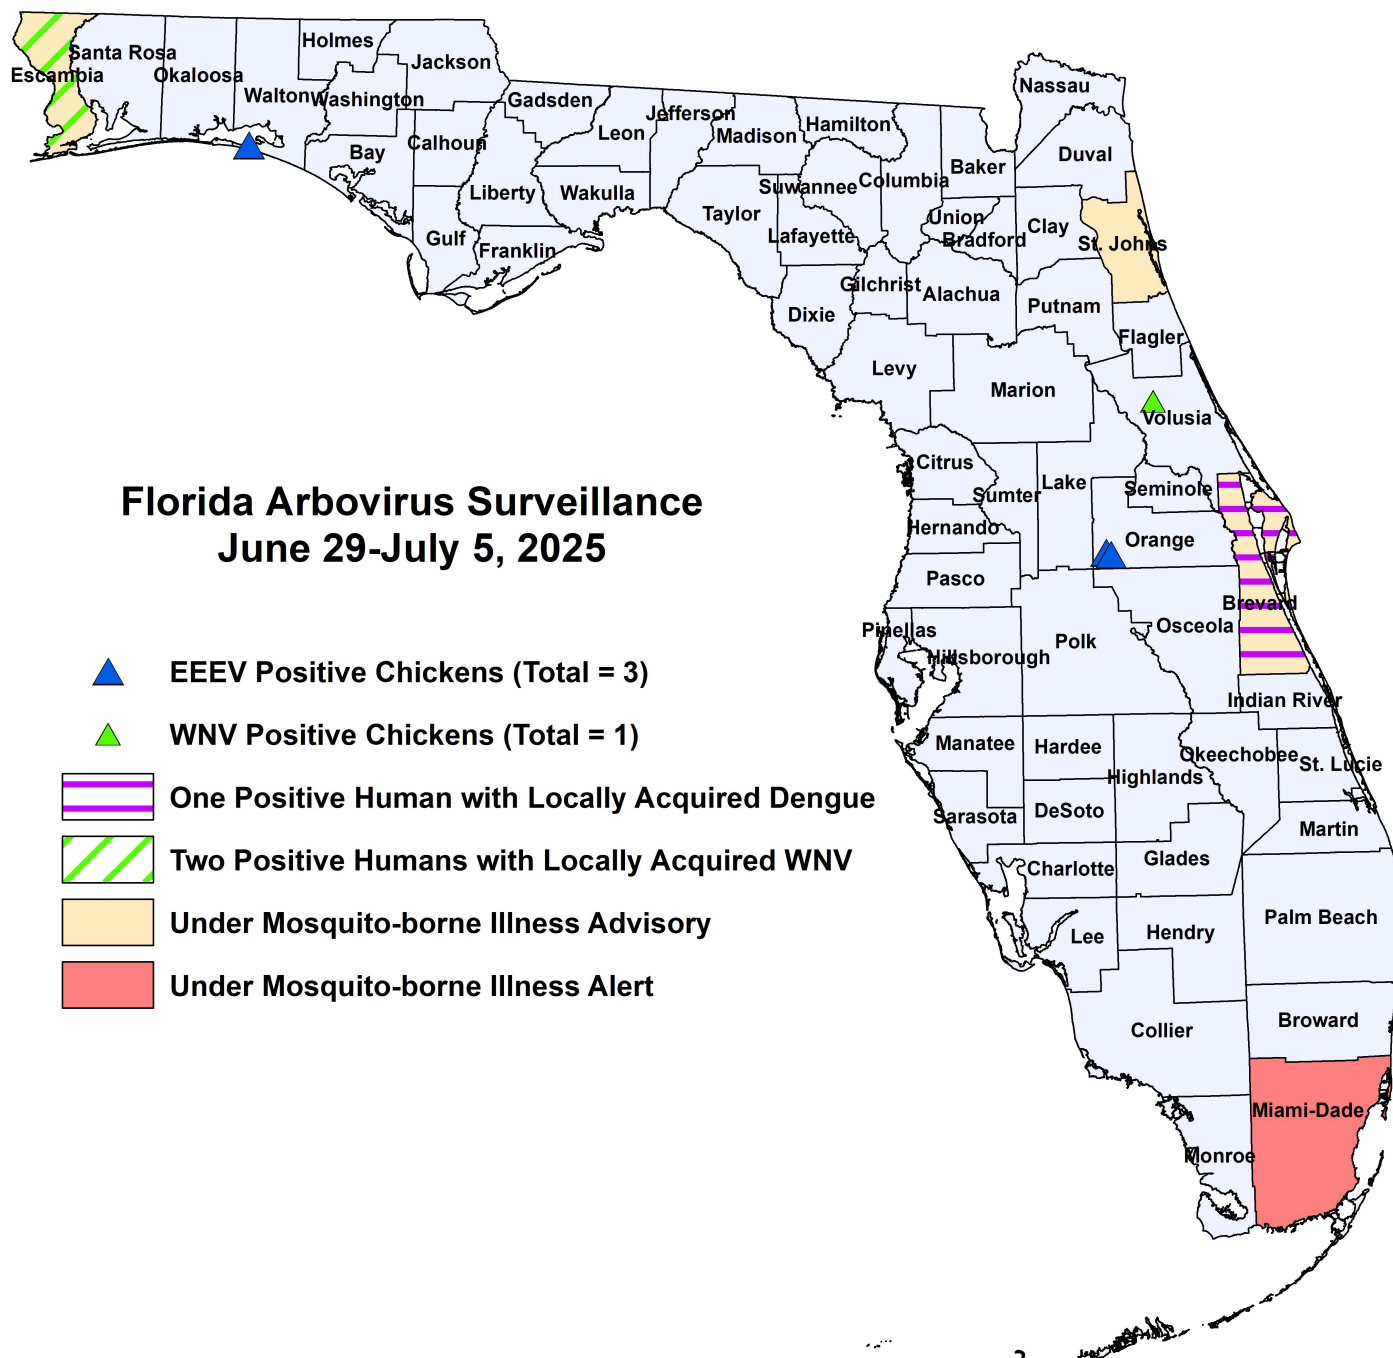

## Dead Birds

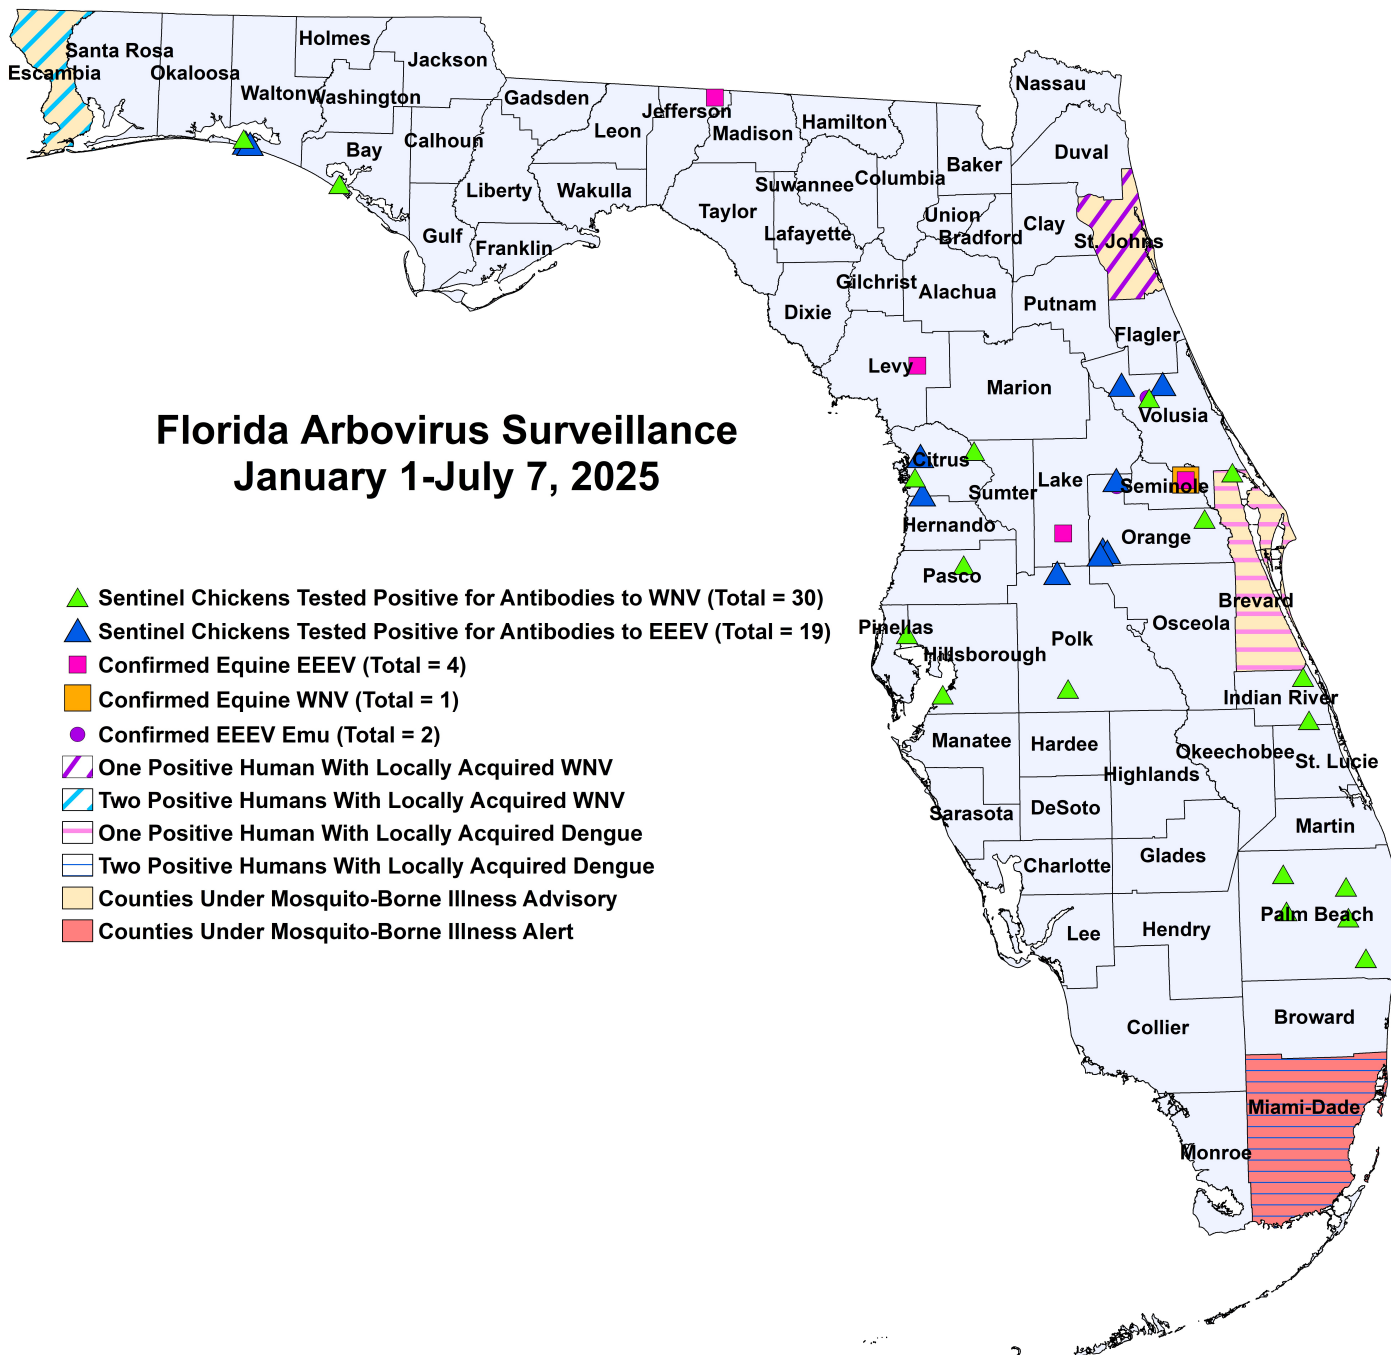

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 23 reports representing a total of 49 dead birds, including two jays, two raptors and 17 doves were received from 14 counties.

In 2025, 981 reports representing a total of 2026 dead birds (68 crows, 40 jays, 232 raptors, 135 doves) were received from 58 of Florida's 67 counties.

**2025**

County	Total Dead Birds	Crows	Jays	Raptors	Doves
Alachua	2	0	0	0	0
Brevard	1	0	0	0	0
Broward	12	0	0	0	11
Collier	1	0	0	0	1
Flagler	1	0	0	0	0
Hillsborough	7	0	0	0	0
Lee	1	0	0	0	0
Leon	1	0	0	1	0
Miami-Dade	3	0	2	0	0
Palm Beach	4	0	0	0	2
Pasco	1	0	0	1	0
Pinellas	10	0	0	0	3
Polk	1	0	0	0	0
Sarasota	4	0	0	0	0

## 2025 Mosquito-Borne Disease Activity by County

County	Humans	Equines	Sentinel Chickens	Other
Bay			1 WNV (3/24)	
Brevard	1 dengue (May)		1 WNV (2/7)	
Citrus			5 EEEV (3/11), (4/1), (4/8), (5/28) 4 WNV (1/6), (2/10), (2/17)	
Escambia	2 asymptomatic WNV blood donors (June)			
Hillsborough			1 WNV (4/21)	
Indian River			2 WNV (1/2)	
Jefferson		1 EEEV (6/12)		
Lake		1 EEEV (4/2)		
Levy		1 EEEV (6/20)		
Miami-Dade	2 dengue (February, June)			
Orange			7 EEEV (2/24), (4/7), (6/2), (6/9), (6/16), (6/23) 1 WNV (3/31)	1 EEEV emu (1/1)
Palm Beach			15 WNV (1/7), (1/21), (1/27), (2/10), (2/17), (2/24), (3/10), (3/17), (4/29), (5/13), (6/16)	
Pasco			1 WNV (1/13)	
Pinellas			1 WNV (1/6)	
Polk			2 EEEV (6/2), (6/9) 1 WNV (6/16)	
Seminole		1 EEEV (1/5) 1 WNV (1/5)		
St. Johns	1 asymptomatic WNV blood donor (June)			
Volusia			2 EEEV (1/14), (4/8) 1 WNV (6/23)	1 EEEV emu (1/2)
Walton			3 EEEV (5/5), (6/2), (6/23) 1 WNV (5/19)

**For more surveillance information, please see the DOH website at:** [www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html](http://www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html)

**For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at:** [www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm](http://www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm)

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: [www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html](http://www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html). Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of

Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
