

Florida Arbovirus Surveillance

Week 48: November 23-29, 2025

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV), and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease is also included. During the period of November 23-29, 2025, the following arboviral activity was recorded in Florida.

WNV activity: No human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. Twenty sentinel chickens tested positive for antibodies to WNV in Bay, Hillsborough, Martin, Palm Beach, Pinellas, Polk, St. Johns, Volusia, and Walton counties. In 2025, positive samples from six symptomatic humans, seven asymptomatic blood donors, one horse, one duck, and 373 sentinel chickens have been reported from 29 counties.

SLEV activity: No human cases of SLEV infection were reported this week. No sentinel chicken tested positive for antibodies to SLEV this week. In 2025, positives samples from four sentinel chickens have been reported from three counties.

EEEV activity: No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. No sentinel chickens tested positive for antibodies to EEEV this week. In 2025, positive samples from nine horses, two emus, one emu flock, one goat, and 57 sentinel chickens have been reported from 22 counties.

International Travel-Associated Dengue: Five cases of dengue were reported this week in persons that had international travel. In 2025, 395 travel-associated dengue cases have been reported.

Dengue Cases Acquired in Florida: One case of locally acquired dengue was reported this week. In 2025, positive samples from 61 humans and four mosquito pools have been reported from four counties.

International Travel-Associated Chikungunya Fever Cases: Fourteen cases of chikungunya fever were reported this week in persons that had international travel. In 2025, one hundred twenty-seven cases of travel-associated chikungunya fever have been reported.

Chikungunya Fever Cases Acquired in Florida: No cases of locally acquired chikungunya fever were reported this week. In 2025, no cases of locally acquired chikungunya fever have been reported.

International Travel-Associated Oropouche Fever cases: No cases of Oropouche fever were reported this week. In 2025, one case of travel-associated Oropouche fever has been reported.

International Travel-Associated Zika Fever Cases: No cases of Zika fever were reported this week in persons that had international travel. In 2025, no travel-associated Zika fever cases have been reported.

Zika Fever Cases Acquired in Florida: No cases of locally acquired Zika fever were reported this week. In 2025, no cases of locally acquired Zika fever have been reported.

Advisories/Alerts: Alachua, Bay, Clay, Duval, Hernando, Hillsborough, Lafayette, Leon, Palm Beach, Pasco, and Pinellas counties are currently under a mosquito-borne illness advisory. Brevard, Escambia, and Miami-Dade counties are currently under a mosquito-borne illness alert.

There are currently multiple travel health notices from the Centers for Disease Control and Prevention related to mosquito-borne diseases.

Dengue			Oropouche	Yellow Fever	Chikungunya			Rift Valley Fever	Malaria

2025 Human Case Summary

West Nile Virus Illness Acquired in Florida: In 2025, six human cases of WNV illness acquired in Florida have been reported in Clay (July), Duval (August), and Escambia (August, October) counties. Seven asymptomatic blood donors have been reported in Bay (October), Escambia (June, July, August), Miami-Dade (July), and St. Johns (June) counties.

2025 International Travel-Associated Oropouche Cases: One case with onset in 2025 has been reported in an individual with travel history to an Oropouche-endemic area in the two weeks prior to onset. County reporting the case was Miami-Dade. Country of origin was Cuba.

2025 International Travel-Associated Chikungunya Cases: One hundred twenty-seven cases with onset in 2025 have been reported in individuals with travel history to a chikungunya-endemic area in the two weeks prior to onset. Counties reporting cases were: Broward (16), Charlotte, Collier (3), Hendry, Hillsborough (12), Lake, Lee (6), Miami-Dade (73), Orange (3), Osceola (2), Palm Beach (3), Pasco, Pinellas (2), Sarasota, and Seminole (2). Three cases were reported in non-FI residents. Countries of origin were: Bangladesh (2), Bolivia, Brazil (2), Cuba (116), India (2), Indonesia, Philippines, and Sri Lanka (2).

2025 International Travel-Associated Dengue Cases: Three hundred ninety-five cases with onset in 2025 have been reported in individuals with travel to a dengue-endemic area in the two weeks prior to onset. Counties reporting cases were: Bay, Brevard (2), Broward (17), Charlotte, Clay, Collier (7), Duval (5), Escambia, Hendry (2), Hernando (2), Hillsborough (24), Indian River, Lake (4), Lee (16), Manatee (2), Marion, Miami-Dade (250), Monroe (5), Okeechobee (3), Orange (9), Osceola (4), Palm Beach (12), Pasco (2), Pinellas (8), Polk (5), Sarasota (2), Seminole, St. Johns, St. Lucie (4), and Volusia (2). Eleven cases were reported in non-Florida residents. In 2025, 333 cases of dengue reported in Florida have been serotyped by PCR. Please see the table below for a breakdown of cases by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	Unknown	DENV2/ DENV3	Total
Antigua and Barbuda			1				1
Argentina	2						2
Bahamas			1				1
Bonaire			1				1

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	Unknown	DENV2/ DENV3	Total
Brazil	1	4	1			3	9
Colombia	1	1	2			2	6
Cuba		22	20	209	1	36	288
Cuba/Mexico						1	1

Pakistan	1						1
Panama			1				1
Peru			1			1	2
Philippines						1	1
Puerto Rico		1	13	1		4	19
Puerto Rico/Dominican Republic		1				1	2
Sri Lanka						1	1
St. Barts			3				3
St. Barts/St. Martin			1				1
Surinam		1					1
US Virgin Islands		1				2	3
Total	7	39	76	210	1	62	395

2025 Dengue Cases Acquired in Florida: In 2025, 61 cases of locally acquired dengue have been reported in Brevard (35), Hillsborough, Miami-Dade (24), and Pasco counties with onset in February, May, June, July, August, September, October, and November. One case was reported in a non-Florida resident. Forty-seven cases have been serotyped by PCR. Please see the table below for a breakdown of cases by county and serotype.

County of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	Unknown	Total
Brevard			24		11	35
Hillsborough				1		1
Miami-Dade		6	3	12	3	24
Pasco	1					1
Total	1	6	27	13	14	61

2025 International Travel-Associated Malaria Cases: Forty-seven cases with onset in 2025 have been reported in individuals with travel history to a malaria-endemic area. Counties reporting cases were: Alachua (2), Brevard, Broward (5), Collier, Duval, Hillsborough (5), Lake, Leon, Manatee, Marion (2), Miami-Dade (5), Nassau (2), Orange (4), Palm Beach (4), Pasco, Polk (3), Sarasota, Seminole, St. Lucie (4), and Volusia (2). Eleven cases were reported in non-Florida residents. Please see the table below for a breakdown of cases by country of origin and *Plasmodium* species.

Country of Exposure	<i>Plasmodium falciparum</i>	<i>Plasmodium ovale</i>	<i>Plasmodium vivax</i>	Unknown	Total
Africa	4				4
Angola	1				1
Burkina Faso	1				1
Cameroon	1				1
Central America			1		1

Country of Exposure	<i>Plasmodium falciparum</i>	<i>Plasmodium ovale</i>	<i>Plasmodium vivax</i>	Unknown	Total
Central Africa	1				1
Central/South America			2		2
Côte D'Ivoire	1				1
Gambia	1				1

Uganda	1				1
Uganda/Kenya	1				1
Total	37	2	7	1	47

Veterinary Cases**

**Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

No veterinary cases were reported this week.

Veterinary EEEV Disease in Florida, November 2024-2025

Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Twenty sentinel chickens tested positive for antibodies to WNV in Bay, Hillsborough, Martin, Palm Beach, Pinellas, Polk, St. Johns, Volusia, and Walton counties.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Bay	11/17/2025	18.75		18.75				3 WNV	23 WNV
Hillsborough	11/17/2025	3.23		3.23				1 WNV	1 EEEV, 29 WNV
Martin	11/13/2025	2.56		2.56				1 WNV	1 EEEV, 9 WNV
Palm Beach	11/17/2025	3.85		3.85				1 WNV	35 WNV
Pinellas	11/17-11/18/2025	3.64		3.64				2 WNV	30 WNV
Polk	11/14/2025	4.55		4.55				2 WNV	2 EEEV, 16 WNV
St. Johns	11/10/2025	1.82		1.82				1 WNV	2 EEEV, 15 WNV
Volusia	11/17/2025	2.13		2.13				1 WNV	3 EEEV, 1 SLEV, 26 WNV
Walton	11/17/2025	8.60		8.60				8 WNV	11 EEEV, 4 HJ, 35 WNV

Sentinel Seroconversions to WNV in Florida, 2024–2025

Sentinel Seroconversions to EEEV in Florida, 2024–2025

Mosquito Pools

No mosquito pools tested positive for EEEV or WNV this week.

County	Collection Date	Result	Species	County YTD
--------	-----------------	--------	---------	------------

Dead Birds

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 29 reports representing a total of 109 dead birds, including seven raptors and 18 doves were received from 13 counties.

In 2025, 1330 reports representing a total of 3040 dead birds (103 crows, 48 jays, 277 raptors, 275 doves) were received from 58 of Florida's 67 counties.

2025

County	Total Dead Birds	Crows	Jays	Raptors	Doves
Bay	1	0	0	1	0
Brevard	1	0	0	0	0
Broward	1	0	0	0	0
Charlotte	4	0	0	1	0
Flagler	3	0	0	0	0
Lee	17	0	0	0	17
Miami-Dade	1	0	0	0	0
Nassau	1	0	0	0	0
Okaloosa	1	0	0	1	0
Orange	1	0	0	0	1
Palm Beach	31	0	0	4	0
Polk	39	0	0	0	0
St. Johns	8	0	0	0	0

2025 Mosquito-Borne Disease Activity by County

County	Humans	Equines	Sentinel Chickens	Other
Alachua			2 EEEV (7/24), (7/31) 18 WNV (7/24), (7/31), (8/5), (9/4), (9/8), (9/16), (9/23), (10/14), (10/23), (10/28)

For more surveillance information, please see the DOH website at: www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html

For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at: www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html. Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
