FACILITY_NAME**DETAILS****TYPE:** varchar (75)**ITEM
NUMBER:** 8**YEARS
COLLECTED:** 1970 - current**DESCRIPTION**

Name of facility associated with the birth

If a birth did not occur in a hospital or freestanding birthing center, the street and number of the place where the birth occurred was entered. If a birth occurred en route, that is, in a moving conveyance, the city, town, village, or location where the child was first removed from the conveyance was entered. If a birth occurred in international air space or waters, [plane] or [boat] is entered.

CODE DEFINITION

The address where the birth occurred will be recorded for home births not transported to a hospital immediately after delivery. Otherwise, this field is populated with the name of the birthing center or hospital where the birth occurred or where the infant was transferred immediately after delivery.

EXPLANATION OF CALCULATED RACE FIELDS

There are calculated race fields in each of the vital statistics data tables (Birthmaster, Birthstat, Fetalmaster, Fetalstat, Deathmaster, and Deathstat). The field names are listed by event in the table below.

Vital Statistics Event	Calculated Race Field
Birth*	mother_calculatedrace father_calculatedrace
Fetal Death*	mother_calculatedrace
Death*	calculatedrace

Below is a translation of the SQL code used to define the Calculated Race fields in the data tables. In the following explanation, 'Mother_CalculatedRace' may be substituted with 'Father_CalculatedRace' or 'CalculatedRace'.

Mother_CalculatedRace = '01' when the mother is White Only or when the mother is Other Race and "Black" does not occur in the Other Race Literal field, but any of the following: "His" (i.e., Hispanic), "Lat" (i.e., Latin, Latina, Latino), "Mex" (i.e., Mexican), "Cub" (i.e., Cuban), "Puer" (i.e., Puerto Rican) or "Col" (i.e., Colombian) is found in the Other Race Literal field

Mother_CalculatedRace = '02' when the mother is Black Only or when the mother is Other Race and "Black" occurs in the Other Race Literal field

Mother_CalculatedRace = '03' when the mother is American Indian Only

Mother_CalculatedRace = '04' when the mother is Chinese Only

Mother_CalculatedRace = '05' when the mother is Japanese Only

Mother_CalculatedRace = '06' when the mother is Hawaiian Only

Mother_CalculatedRace = '07' when the mother is Filipino Only

Mother_CalculatedRace = '08' when the mother is Korean Only

Mother_CalculatedRace = '09' when the mother is Other Race Only and any of the following: "His" (i.e., Hispanic), "Lat" (i.e., Latin, Latina, Latino), "Mex" (i.e., Mexican), "Cub" (i.e., Cuban), "Puer" (i.e., Puerto Rican) or "Col" (i.e., Colombian) are not found in the Other Race Literal field

Mother_CalculatedRace = '10' when the mother is Vietnamese Only

Mother_CalculatedRace = '11' when the mother is Asian Indian Only

Mother_CalculatedRace = '12' when the mother is Asian Other Only

Mother_CalculatedRace = '13' when the mother is Guamanian Only

Mother_CalculatedRace = '14' when the mother is Samoan Only

Mother_CalculatedRace = '15' when the mother is Pacific Islander Only

Mother_CalculatedRace = '99' when the mother's race is Unknown Only or if no race is indicated for the mother

Mother_CalculatedRace = '20' when the mother's race is not 01-15 or 99

* This explanation contains data field names present in the birth data for years 2004 to present, in the death data for years 2005 to present, and in the fetal death data for years 2006 to present.

EXPLANATION OF CALCULATED ETHNICITY FIELDS

There are calculated ethnicity fields in each of the vital statistics data tables (Birthmaster, Birthstat, Fetalmaster, Fetalstat, Deathmaster, and Deathstat). The field names are listed by event in the table below.

Vital Statistics Event	Calculated Ethnicity Field
Birth*	mother_calculatedhisp father_calculatedhisp
Fetal Death*	mother_calculatedhisp
Death*	calculatedhisp

Below is an explanation of the codes used to define the calculated ethnicity fields in the vital statistics data tables. In the following explanation, 'Mother_CalculatedHisp' may be substituted with 'Father_CalculatedHisp' or 'CalculatedHisp'.

Mother_CalculatedHisp = '00' when mother is Not Hispanic; ethnicity is known, but mother is not Mexican, Puerto Rican, Cuban, Central/South American, Other Hispanic, or Haitian

Mother_CalculatedHisp = '01' when mother is Mexican Alone or Mexican with Unknown Ethnicity

Mother_CalculatedHisp = '02' when mother is Puerto Rican Alone or Puerto Rican with Unknown Ethnicity

Mother_CalculatedHisp = '03' when mother is Cuban Alone or Cuban with Unknown Ethnicity

Mother_CalculatedHisp = '05' when mother is Other Hispanic Alone, Other Hispanic with Unknown Ethnicity, or 2 or more Hispanic ethnicities indicated**

Mother_CalculatedHisp = '06' when mother is Haitian Alone or Haitian with Another Ethnicity

Mother_CalculatedHisp = '99' when mother is Unknown Ethnicity Alone or when responses to all separate ethnicity fields are No, Unknown, or NULL

* This explanation contains data field names present in the birth data for years 2004 to present, in the death data for years 2005 to present, and in the fetal death data for years 2006 to present.

** Prior to 2011, the code '04' was used to denote persons who were of Central/South American ethnicity. As of January 1, 2011, individuals who fall into to Central/South American ethnic group will be coded as '05'.

EXPLANATION OF CALCULATED MONTH OF PREGNANCY THAT PRENATAL CARE BEGAN*

This document provides a description of the codes used to define the Calc_MonthOfPrenatalBegan fields in the Birth and Fetal Death vital statistics data tables. The following table displays the vital statistics table fields described in the text below.

Field Name	Equivalent Description Used in Text
PRENATAL_DATE_BEG_MONTH	Month that prenatal care began
Calc_MonthOfPrenatalBegan	Calculated months of pregnancy that prenatal care began
MENSES_DATE_MONTH	Month of the last menses

When the month that prenatal care began = 88, indicating that no prenatal care was received; then the calculated month of pregnancy that prenatal care began is 0.

When the last menses and first prenatal care visit occur in the same year, then the calculated month of pregnancy that prenatal care began is the month of the first prenatal visit minus the month of the last menses.

When the first prenatal care visit occurs in the year following the last menses, then the calculated month of pregnancy that prenatal care began is 12 + the month of the first prenatal visit minus the month of the last menses.

When the last menses and first prenatal care visit occur in the same month and year, then the calculated month of pregnancy that prenatal care began is 1.

The calculated month of pregnancy that prenatal care began is 9 when the difference between the month of the first prenatal visit minus the month of the last menses is 10.

The calculated month of pregnancy that prenatal care began is unknown (i.e. = 99) when the difference between the month of the first prenatal visit minus the month of the last menses is less than 0, greater than 10, or NULL.

* This explanation references data fields present in the birth data for years 2004 to present and in the fetal death data for years 2006 to present.

LINKING BIRTH RECORDS TO INFANT DEATH RECORDS

Create Birth Extract File

- Select all Births from a particular calendar year (e.g. Event_Year = 2008).

Create Infant Death Extract File

- Select all Infant Deaths (age_code = 2, 4, 5, or 6) associated with a birth occurring in Florida (Birth_State_Code = 10) from the same calendar year [e.g. Link_Bir_DOB_Year in (2008, 2009); some infants born in one calendar year may die during the following calendar year].

Match the Death_SFNN field on the Birth record to the State_File_Number (or the Event_Year concatenated with Certnumber) on the Death record; **OR** match the Birth_SFNN field on the Death record to the State_File_Number (or the Event_Year concatenated with Certnumber) on the Birth record.
