7 days a week, 9 a.m. – 5 p.m.

On January 3, 2022, Governor Ron DeSantis [called](#) on the federal government to increase the supply of monoclonal antibody treatments for COVID-19 to Florida to at least 30,000 doses per week. On January 7, 2022, Governor Ron DeSantis [announced](#) 15,000 doses of Regeneron had been secured for the people of Florida and would support new monoclonal antibody sites.

The State of Florida has successfully deployed and expanded state-run, lifesaving monoclonal antibody therapy treatment sites statewide throughout the pandemic. **A full list of state-supported or previously state-supported operational monoclonal antibody therapy sites can be found by visiting: <https://floridahealthcovid19.gov/treatments/treatmentlocator/>.**

Benefits of Treatment:

Monoclonal antibodies help the immune system recognize and respond effectively to the COVID-19 virus.

Monoclonal antibody therapy treatment is for individuals who have contracted or been exposed to COVID-19. Monoclonal antibody therapy treatment can prevent severe illness, hospitalization, and death in high-risk patients who have contracted COVID-19. Specifically, it reduces the risk of death/hospitalization by 70-85 percent.
