

ANTIBIOTIC STEWARDSHIP PROFILE

FLORIDA

This report was created to assess antibiotic stewardship programs and activities in Florida acute care hospitals. Antibiotic stewardship data was evaluated using responses from the 2022 NHSN Patient Safety Component, Annual Hospital Survey. A total of 212 facilities in Florida completed this survey.

Percentage and Count of Facilities with Antibiotic Stewardship Programs (ASP)

ASP No ASP

Percent of Facilities Meeting Specific Core Elements

YES NO

ASP Leadership Distribution (% of Facilities)

Antibiotic resistance patterns are monitored by their stewardship team (% of facilities)

Antibiotic use in defined daily doses (DDD) is monitored by stewardship team (% of facilities)

Antibiotic expenditures monitored at least quarterly by stewardship team (% of facilities)

Antibiotic use in days of therapy (DOT) monitored by stewardship team (% of facilities)

Stewardship program engages nurses to track antibiotic duration of therapy (% of facilities)

% of facilities with preauthorization for specific antibiotic agents

% of facilities with facility-specific treatment recommendations

% of facilities with formal procedure for shortest effective duration monitoring

ASP provides reports on antibiotic use to prescribers, at least annually (% of facilities)

ASP provides unit or service reports to prescribers, at least annually (% of facilities)

Pharmacists receive at least annual education on appropriate antibiotic use (% of facilities)

Prescribers receive at least annual education on appropriate antibiotic use (% of facilities)

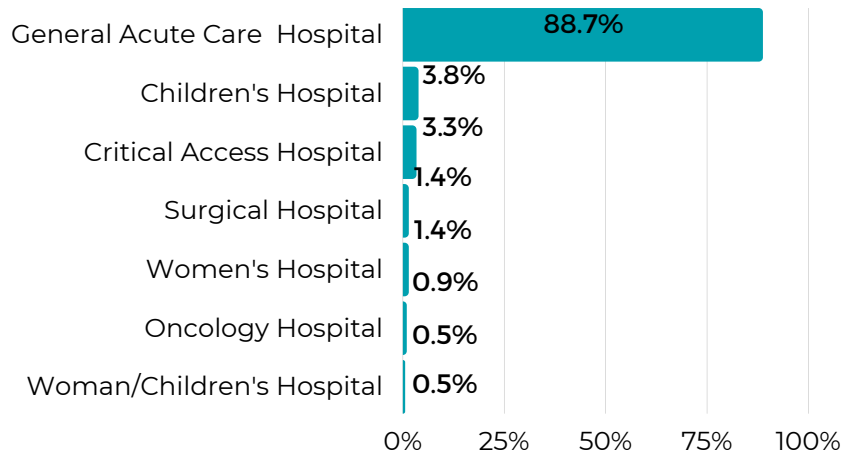

Nursing staff receive at least annual education on appropriate antibiotic use (% of facilities)

Patients are provided education on important side effects of prescribed antibiotics (% of facilities)

Percentage of Facilities Surveyed, by Type

Percentage of Facilities by Number of Beds

ANTIBIOTIC STEWARDSHIP PROFILE

FLORIDA

Acute care hospitals/facilities have the option to report **antibiotic utilization (AU)** and **resistance (AR)** using the **NHSN Antimicrobial Use and Resistance Module (AUR Module)**. Data reporting is optional but is beneficial to assess a facility's antibiotic stewardship program. Data provided in this section is reporting period **9/1/2022 - 3/31/2023**.

116

Facilities reporting at least one month of AU data **(55% of eligible facilities)**
