THE FUTURE IS NOW, FLORIDA:
ELECTRONIC CASE REPORTING (eCR)

Florida HEALTH

Manual Reporting   VS   ## Electronic Case Reporting

Manual Reporting	Electronic Case Reporting
Diagnose reportable condition	Diagnose reportable condition
Enter patient information into EHR 1. Know rules for reporting 2. Complete case data manually	Enter patient information into EHR which automatically triggers and sends a case report
Send case report manually and receive delayed feedback and information from the PHA	Send case report in real time and receive a reportability response and condition information from the PHA

Feb 2025

More than 50,300 facilities in all 50 states and three territories are actively sending electronic initial case reports to PHAs [2] via eCR.

PARTICIPATION / BENEFITS

- Fulfills FL legal requirements
- Qualifies as a PIP objective (formerly Meaningful Use)
- Enhances surveillance
- Increases automation

STATE OF THE STATE

In Florida, as of February 12, 2025:

- **629** Health care systems
- **4,085** Facilities
- **65%** Coverage of hospitals (based on estimated number of FL hospitals)

Florida counties with healthcare facilities reporting eCR data

Total: 396 / 1
