Rabies Alert Issued in Franklin County

Franklin, Fla. – The Florida Department of Health in Franklin County has issued a rabies alert for Franklin County in response to a fox that tested positive on May 5, 2021. The fox attacked an individual working outside at a residence on Bluff Rd in Apalachicola. The health department is also investigating another fox attack that occurred today involving an individual and her dog on Woodill Rd in Carrabelle. While those test results are still pending, we are asking all residents and visitors to please take extra caution while outdoors and be aware of your surroundings at all times. All persons involved in the investigation are receiving appropriate medical treatment.

All residents and visitors of Franklin County should be aware that rabies is present in the wild animal population and domestic animals are at risk if not vaccinated. The public is asked to maintain a heightened awareness that rabies is active in Franklin County. Alerts are designed to increase awareness to the public, but they should not give a false sense of security to areas that have not been named as under an alert. The recent rabies alert is for 60 days.

An animal with rabies could infect other wild animals or domestic animals that have not been vaccinated against rabies. All domestic animals should be vaccinated against rabies and all wildlife contact should be avoided, particularly raccoons, bats, foxes, skunks, otters, bobcats and coyotes. Rabies is a disease of the nervous system and is fatal to warm blooded animals and humans. The only treatment for human exposure to rabies is rabies specific immune globulin and rabies immunization. Appropriate treatment started soon after the exposure will protect an exposed person from the disease.

The following advice is issued:

- Keep rabies vaccinations up to date for all pets.
- If your pet is bitten by a wild animal, seek veterinary assistance for the animal immediately and contact County Animal Services at 850-670-4733.
- Call your local animal control agency to remove any stray animals from your neighborhood.
- **Do not** handle, feed, or unintentionally attract wild animals by leaving pet food outside, or garbage cans open.
- **Never** adopt wild animals or bring them into your home.
- Teach children **never** to handle unfamiliar animals, wild or domestic, even if they appear friendly.
- Prevent bats from entering living quarters or occupied spaces in homes, churches, schools, and other similar areas, where they might come in contact with people and pets.
- Persons who have been bitten or scratched by wild or domestic animals should seek medical attention and report the injury to the Florida Department of Health Franklin County at 850-653-2111.
