

Hepatitis A Surveillance

January 1, 2018–November 21, 2020

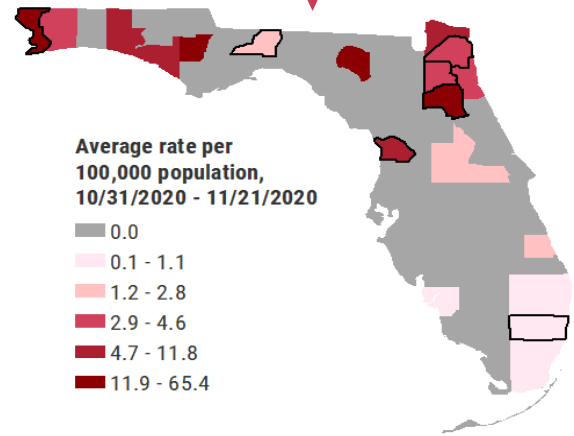

From January 1, 2018 through November 21, 2020, 4,894 hepatitis A cases were reported. ▼

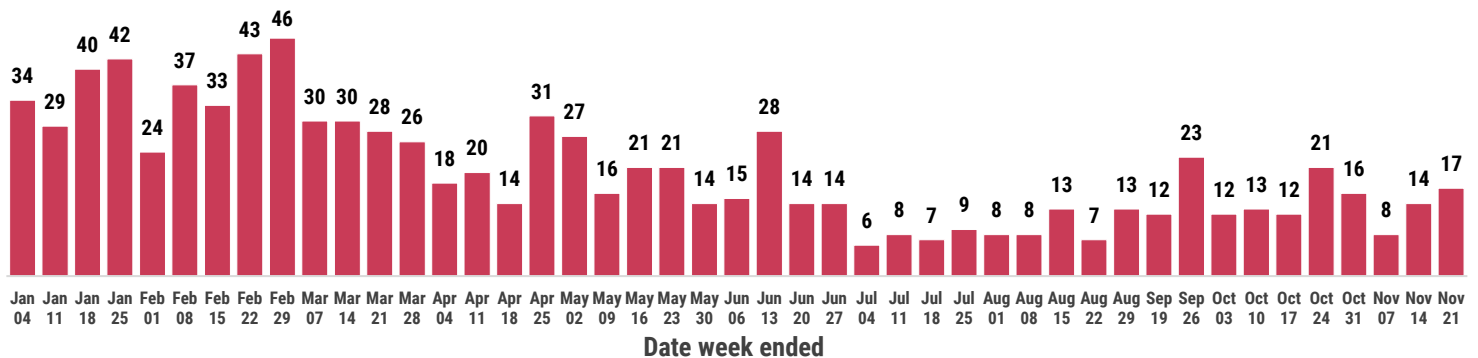

The number of reported hepatitis A cases more than doubled from 2016 to 2017 and nearly doubled again in 2018 after remaining relatively stable in previous years. Case counts in 2019 saw an over 500% increase from 2018.

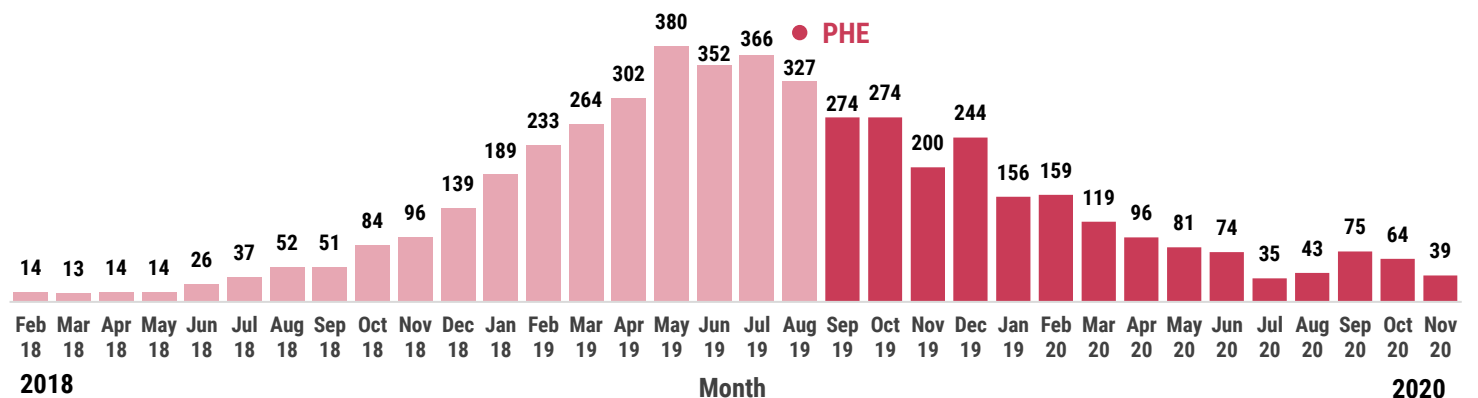

Counties that reported a hepatitis A case last week are outlined in black. Since January 1, 2018, 98% of cases have likely been acquired locally in Florida.

The graph below represents hepatitis A cases by week from December 29, 2019 to November 21, 2020. There were 17 hepatitis A cases reported last week. ▼

The graph below represents hepatitis A cases by month from January 1, 2018 to November 21, 2020. Case counts in weeks prior to the public health emergency declaration are shown in light red, while case counts in weeks since are shown in red. ▼

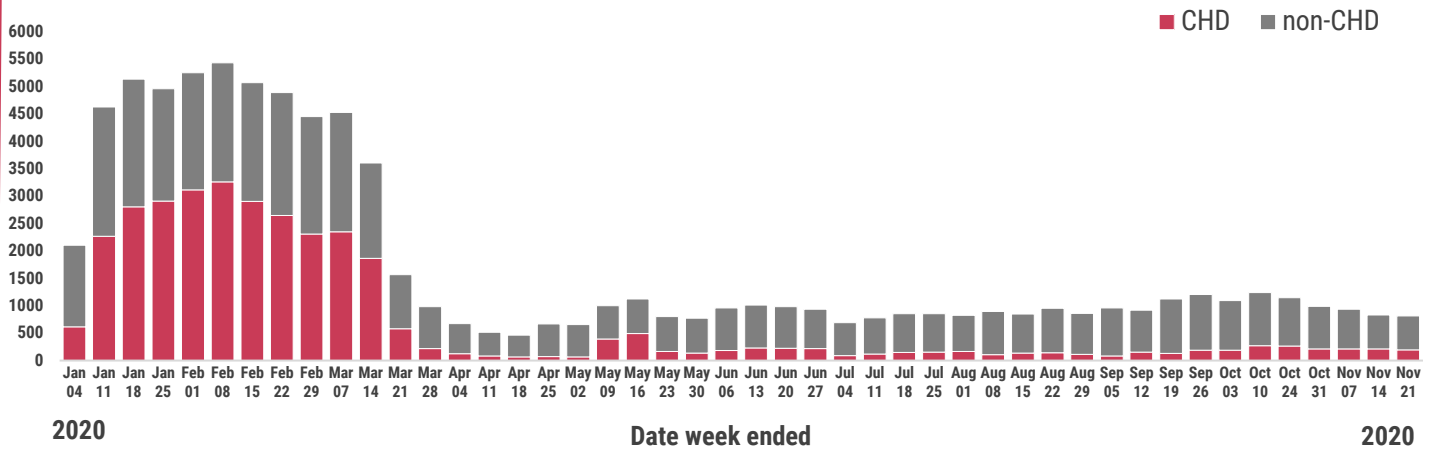

*Public health emergency (PHE) issued August 1, 2019

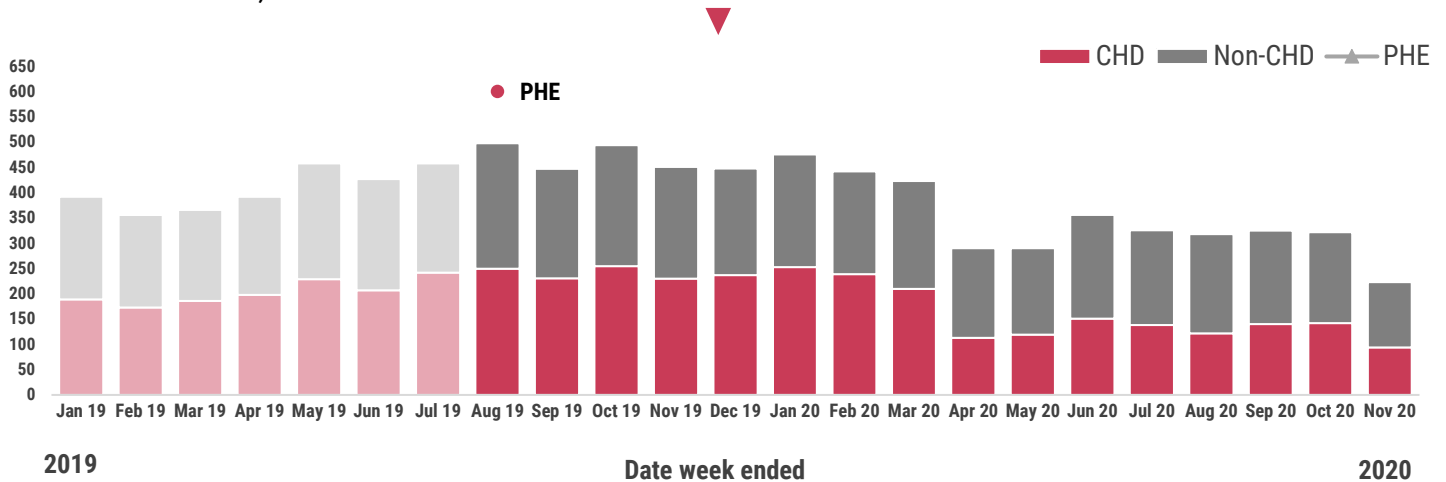

Hepatitis A Vaccination Surveillance

January 1, 2019–November 21, 2020

 From November 15, 2020 to November 21, 2020, county health departments (CHDs) administered 194 (24%) of the total 816 first doses of hepatitis A vaccine administered to adults age 18 years and older, as recorded in Florida SHOTS.

In 2019 CHDs have administered 163,616 vaccinations and non-CHDs have administered 225,376 vaccinations for a total of 388,992 vaccinations. Vaccinations given before the public health emergency declaration are shown in lighter colors than those given after. Since declaration of the PHE, CHDs have administered 97,984 and non-CHDs have administered 132,813 vaccinations.
