

# Hepatitis A Surveillance

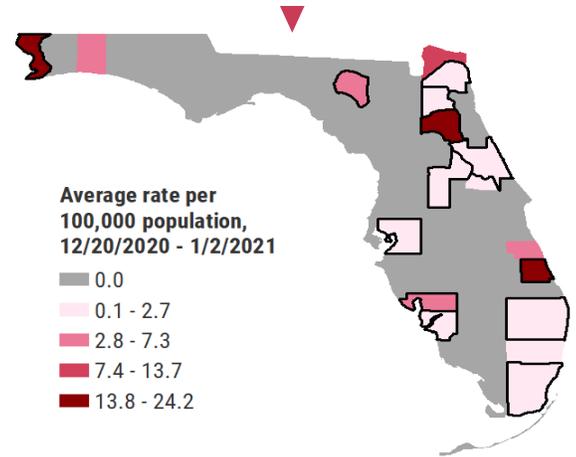

January 1, 2018–January 2, 2021

From January 1, 2018 through January 2, 2021, 4,962 hepatitis A cases were reported.

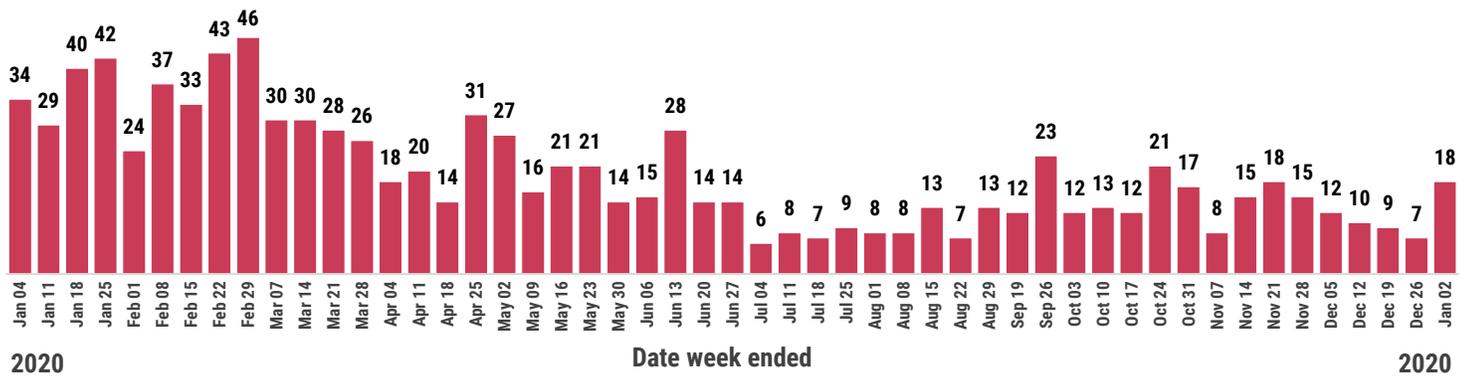

The number of reported hepatitis A cases more than doubled from 2016 to 2017 and nearly doubled again in 2018 after remaining relatively stable in previous years. Case counts in 2019 saw an over 500% increase from 2018.

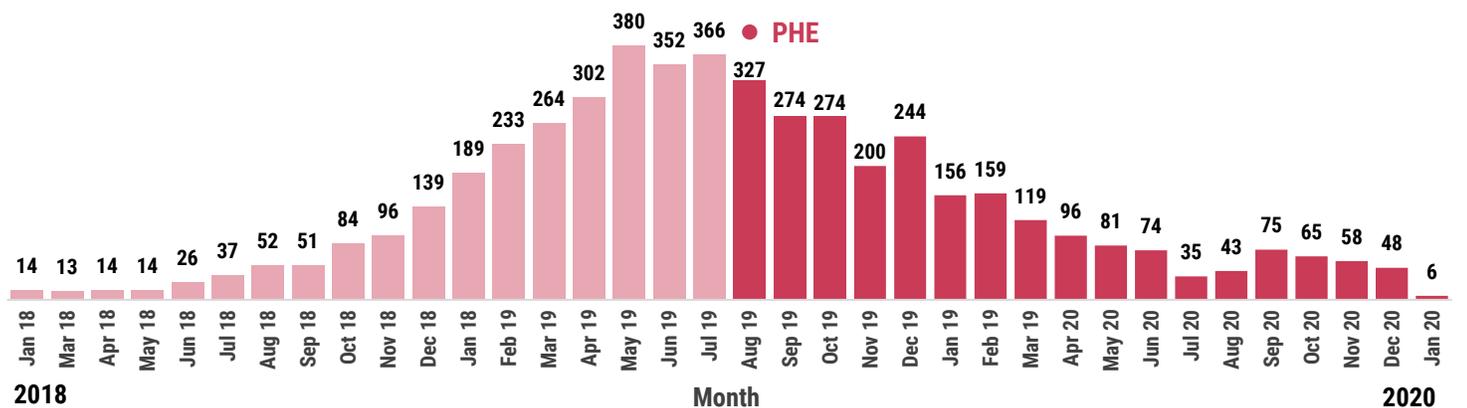

Counties that reported hepatitis A cases in the past two weeks are outlined in black. Since January 1, 2018, 98% of cases have likely been acquired locally in Florida.

The graph below represents hepatitis A cases by week from December 29, 2019 to January 2, 2021. There were 25 hepatitis A cases reported in the past two weeks.

The graph below represents hepatitis A cases by month from January 1, 2018 to January 2, 2021. Case counts in weeks prior to the public health emergency declaration are shown in light red, while case counts in weeks since are shown in red.

# Hepatitis A Vaccination Surveillance

January 1, 2019–January 2, 2021

From December 20, 2020 to January 2, 2021, county health departments (CHDs) administered 190 (23%) of the total 816 first doses of hepatitis A vaccine administered to adults age 18 years and older, as recorded in Florida SHOTS.

In 2019 CHDs have administered 164,596 vaccinations and non-CHDs have administered 228,538 vaccinations for a total of 393,134 vaccinations. Vaccinations given before the public health emergency declaration are shown in lighter colors than those given after. Since declaration of the PHE, CHDs have administered 98,969 and non-CHDs have administered 135,990 vaccinations.
