INTRODUCTION

The Mission of the Florida Department of Health in Broward County (DOH-Broward) is “to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts”. In accordance with this mission, DOH-Broward engaged the Broward County community in the Mobilizing for Action through Planning and Partnerships (MAPP) process in 2012 and in 2016. MAPP is a strategic approach to community health improvement and assists communities to improve health and quality of life through community-wide strategic planning. MAPP includes four separate assessments: Community Health Status, Community Themes and Strengths, Local Public Health System, and the Forces of Change.

Broward County has a long history of collaboratively planning across multiple state, county, and local entities from the public and private sectors to ensure the highest quality of care that also reduce redundancies and duplication within the system of care. DOH-Broward utilized this existing community-based planning structure to assist in the development of the Community Health Assessment. The following agencies participated in this process:

Key Partners:

- Agency for Health Care Administration
- Aging and Disability Resource Center of Broward County
- Alliance for a Healthier Generation
- American Heart Association
- American Lung Association
- AT&T
- Audacious Inquiry
- BAND
- Baptist Health Systems
- BCHPPC Perinatal HIV Workgroup
- Berger Singerman
- Brazilian Faith Based
- Brickell Bay Realty Group
- Broward Behavioral Health Coalition
- Broward College
- Broward County Comprehensive School Health Advisory Committee
- Broward County Government
- Broward County Medical Association
- Broward County Municipalities
- Broward County Public Elementary Schools
- Broward County Public Schools
- Broward County Sheriff’s Office
- Broward Health
- Broward Health Coral Springs
- Broward Health Imperial Point
- Broward Health Medical Center
- Broward Healthy Start Coalition

METHODOLOGY

The Local Public Health System Assessment (LPHSA) was conducted in the spring of 2016 using The National Public Health Performance Standards Program (NPHPSP).

These assessments are intended to help users answer questions such as "What are the activities and capacities of our public health system?" and "How well are we providing the Essential Public Health Services in our jurisdiction?" The dialogue that occurs while answering these questions may help identify strengths and opportunities for improvement. Forty-eight organizations completed the online performance rating survey. The Healthcare Access Committee members completed the priority rating questionnaire and Florida Department of Health leadership completed the agency contribution section. The three components were compiled to develop the 10 Essential Public Health Services summary. The summary includes an average overall score of 69.9, with Evaluate Services scoring 86.7 and Link to Health Services 81.3. Areas scoring the lowest average scores included Research/Innovation (50.0), Diagnose and Investigate (63.2) and Enforce Laws (63.8). The complete Assessment Report may be found in Attachment 1.

The Forces of Change Assessment consisted of five community focus groups, three provider focus groups and fifteen key informant interviews. Major findings were grouped into five priority areas: Preventive Care/Chronic Conditions and Management, Community Health Education and Diversity, Maternal Child Health/Prenatal Care, Access to Care and Quality of Care. The complete Assessment Report may be found in Attachment 2.

The Community Themes and Strengths Assessment utilized the 2015 Community Health Needs Assessment developed by Professional Research Consultants, Inc. The Community Health Needs Assessment is a continuation of nine similar studies conducted since 1994 and is a systematic, data driven approach to determining the health status, behaviors and needs of residents in Broward County, Florida. The Assessment serves as a tool toward reaching three basic goals: to improve resident's health status, increase their life span, and elevate their overall quality of life; to reduce health disparities; and, to increase access to preventive services. A random sample of 412 Broward County residents participated in the 2015 assessment of quality of life including a health assessment. The complete Assessment Report may be found in Attachment 3.

The Community Health Status Assessment was prepared in late 2015 and early 2016. The assessment presented data on Population and Socio-Economic Characteristics, Quality of Life, Health Care Resources, Health Status, Risk Youth Behavior Survey findings, Death Indicators, Communicable Diseases, Maternal and Child Health, Vaccine-Preventable Disease and Environmental Health. The complete Assessment Report may be found in Attachment 4.

ISSUE SYNTHESIS

An analysis of the four MAPP assessments identified nine health related challenges (highlighted in yellow) in Broward County that were identified in two or more of the 4 assessments and were validated in the Community Health Status Assessment. These challenges were then categorized into four broad categories each containing one or more of the identified health challenges.

PEER COUNTY COMPARISONS

A peer comparison group was selected based on the closeness of the match between these counties and socio-demographic indicators for Broward County. Broward County's peer group was composed of the following Florida counties: Hillsboro, Miami-Dade, Orange and Palm Beach.

Table 2
Comparison of Peer Counties
Broward County and the State of Florida to the Community Themes and
Strengths Survey Population

Population and Sample Characteristics									
	Men		Women		TOTAL				
PRC Survey		47.7%		52.3%

ISSUE ANALYSIS

Data for each of the identified health challenges were then compared to a peer group average and a state average value. In addition, the Healthy People 2020 goal and indicator were included for each identified challenge (Appendix 2). Healthy People 2020 tracks approximately 1,200 objectives organized into 42 topic areas, each of which represents an important public health area.

HEALTHCARE ACCESS

LACK OF HEALTH INSURANCE

- The uninsured rate for Broward County is lower than that of the peer county average and the state.
- The uninsured rate for Broward County is higher than that of the United States.
- Broward County has not met the Healthy People goal of 0.0% uninsured by 2020.

LACK of Healthcare Insurance Coverage								
Healthy People 2020 Goal: Increase the proportion of people with medical insurance								
GOAL:		Peer Counties				Peer Average	Florida	U.S.
Healthy People 2020 0.0% (100% coverage)	Broward	Hillsboro	Miami-Dade	Orange	Palm Beach			
2013	21.3	19.1	32.0	26.2	20.3	24.4	22.9	13.4

INFECTIOUS DISEASES

HIV/AIDS INFECTIONS & RATES

- The Broward County HIV rate per 100,000 is higher than that of the peer county average and the state.
- The Broward County HIV rate per 100,000 is higher than that of the United States.
- Broward County has not met the Healthy People goal of 3.5 new infections per 100,000 by 2020.

New HIV Infections and Rates per 100,000, 2014								
Healthy People 2020 Goal: Reduce the rate of HIV Transmission among Adolescents and Adults								
	Broward	Peer Counties				Peer Average	Florida	U.S.
		Hillsboro	Miami-Dade	Orange	Palm Beach			
Healthy People 2020 = 3.5 new infections per 100,000	694	340	1,187	382	320	557	4,613	44,073

INFECTIOUS SYPHILIS

- The Broward County Infectious Syphilis Rate per 100,000 is higher than that of the peer county average and the state.
- The Broward County Infectious Syphilis Rate per 100,000 for males is higher than that of the United States.
- Broward County has not met the Healthy People goal of 1.3 new cases of infectious syphilis for females nor 6.7 for males per 100,000 by 2020.

Infectious Syphilis Rate per 100,000, 2015								
Healthy People 2020 Goal: Reduce sustained domestic transmission of primary and secondary syphilis								
	Broward	Peer Counties				Peer Average	Florida	U.S.
		Hillsboro	Miami-Dade	Orange	Palm Beach			
Healthy People 2020	15.5	16.1	17.1	17.3	7.1	14.4	8.9	6.3
Females: 1.3 new cases	2.0	2.4	2.5	1.4	2.1	2.1	1.4	1.1
Males: 6.7 new cases	29.8	30.5	32.7	33.7	12.4	27.3	16.8	11.7

MATERNAL AND CHILD HEALTH

CERVICAL CANCER SCREENING

- The Broward County rate of women aged 18 and older who have had a Pap test in the past 1 year is lower than that of the United States.
- Broward County has not met the Healthy People goal of 93% by 2020.

Women aged 18+ Who Have Had a Test Smear in the Past 1 Year								
Healthy People 2020 Goal: Increase the Proportion of Women Who receive cervical cancer screening based on the most recent guidelines								
Healthy People 2020 Goal = 93%	Broward	Peer Counties				Peer Average	Florida	U.S.
		Hillsboro	Miami- Dade	Orange	Palm Beach
