Community Health Assessment, St. Lucie County, FL Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

## Total Population

A total of 281,015 people live in the 571.77 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2009-13 5-year estimates. The population density for this area, estimated at 491.48 persons per square mile, is greater than the national average population density of 88.23 persons per square mile.

## Population Age 65

An estimated 20.79\% percent of the population in the report area according to the U.S. Census Bureau American Community Survey 2009-13 5-year estimates. An estimated total of 58,418 older adults resided in the area during this time period. The number of persons age 65 or older is relevant because this population has unique health needs which should be considered separately from other age groups.

## Population with Any Disability

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

## Population with Limited English Proficiency

This indicator reports the percentage of the population aged 5 and older who speak a language other than English at home and speak English less than "very well." This indicator is relevant because an inability to speak English well creates barriers to healthcare access, provider communications, and health literacy/education.

## Population Geographic Mobility

This indicator reports information about population in-migration by assessing changes in residence within a one year period. Of the 278,479 persons residing in the report area, an estimated $7.35 \%$ relocated to the area, according to the latest American Community Survey 5-year estimates. Persons who moved to a new household from outside of their current county of residence, from outside their state of residence, or from abroad are considered part of the in-migrated population. Persons who moved to a new household from a different household within their current county of residence are not included.

| Report Area | Total Population | Population In-Migration | Percent Population In-Migration |

## Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 41,735 persons in the report area are of foreign birth, which represents $14.85 \%$ of the report area population. This percentage is greater than the national rate of $12.95 \%$.

## Hispanic Population

The estimated population that is of Hispanic, Latino, or Spanish origin in the report area is 47,255 . This represents $16.82 \%$ of the total report area population, which is greater than the national $16.62 \%$ rate. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be of any race.

## Social Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

## Children Eligible for Free/Reduced Price Lunch

Within the report area 27,081 public school students or $66.25 \%$ are eligible for Free/Reduced Price lunch out of 40,876 total students enrolled. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs. Additionally, when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrollment.

## Housing Cost Burden (30\%)

This indicator reports the percentage of the households where housing costs exceed 30\% of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels.

## Cost Burdened Households by Tenure, Total

This data shows the number of households that spend more than $30 \%$ of the household income on housing costs. In the report area, there were 45,576 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 200-2013 5-year estimates. The data for this indicator is only reported for households where household housing costs and income earned was identified in the American Community Survey.

| Report Area | Cost Burdened Households | Cost Burdened Rental Households | Cost Burdened Owner Occupied Households (With Mortgage) | Cost Burdened Owner Occupied Households (With No Mortgage) |
| :---: | :---: | :---: | :---: | :---: |

## Insurance - Uninsured Adults

The lack of health insurance is considered a key driver of health status.
This indicator reports the percentage of adults age 18 to 64 without health insurance coverage. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

## Insurance - Uninsured Children

The lack of health insurance is considered a key driver of health status.
This indicator reports the percentage of children under age 19 without health insurance coverage. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

## Insurance - Uninsured Population

The lack of health insurance is considered a key driver of health status.

This indicator reports the percentage of the total civilian non-institutionalized population without health insurance coverage. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

## Lack of Social or Emotional Support

This indicator reports the percentage of adults aged 18 and older who self-report that they receive insufficient social and emotional support all or most of the time. This indicator is relevant because social and emotional support is critical for navigating the challenges of daily life as well as for good mental health. Social and emotional support is also linked to educational achievement and economic stability.

## Population Receiving SNAP Benefits (ACS)

This indicator reports the estimated percentage of households receiving the Supplemental Nutrition Assistance Program (SNAP) benefits. This indicator is relevant because it assesses vulnerable populations which are more likely to have multiple health access, health status, and social support needs; when combined with poverty data, providers can use this measure to identify gaps in eligibility and enrolment.

## Poverty - Population Below 200\% FPL

In the report area $39.61 \%$ or 110,099 individuals are living in households with income below $200 \%$ of the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

| Report <br> Area | Total <br> Population | Population with <br> Income at or Below <br> 200\% FPL | Percent Population <br> with Income at or <br> Below 200\% FPL | or Below 200\% FPL |

## Teen Births

This indicator reports the rate of total births to women age of 15-19 per 1,000 female population age 15-19. This indicator is relevant because in many cases, teen parents have unique social, economic, and health support services. Additionally, high rates of teen pregnancy may indicate the prevalence of unsafe sex practices.

## Unemployment Rate

Total unemployment in the report area for the current month was 10,925, or $8.3 \%$ of the civilian noninstitutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

## Physical Environment

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

## Air Quality - Ozone

Within the report area, 0 , or $0 \%$ of days exceeded the emission standard of 75 parts per billion (ppb). This indicator reports the percentage of days per year with Ozone (O3) levels above the National Ambient Air Quality Standard of 75 parts per billion (ppb). Figures are calculated using data collected by monitoring stations and modeled to include census tracts where no monitoring stations exist. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

## Air Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

## Fast Food Restaurant Access

This indicator reports the number of fast food restaurants per 100,000 population. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

## Grocery Store Access

This indicator reports the number of grocery stores per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Included are delicatessen-type establishments. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores are excluded. This indicator is relevant because it provides a measure of healthy food access and environmental influences on dietary behaviors.

## Housing Environment - Housing Unit Age

This indicator reports, for a given geographic area, the median year in which all housing units (vacant and occupied) were first constructed. The year the structure was built provides information on the age of housing units. These data help identify new housing construction and measures the disappearance of old housing from the inventory, when used in combination with data from previous years. This data also serves to aid in the development of formulas to determine substandard housing and provide assistance in forecasting future services, such as energy consumption and fire protection.

## Housing Environment - Overcrowded Housing

This indicator reports data on overcrowded housing from the latest 5-year American Community Survey. The Census Bureau has no official definition of crowded units, but this report considers units with more than one occupant per room to be crowded.

| Report Area | Total Occupied <br> Housing Units | Overcrowded <br> Housing Units | Percentage of Housing <br> Units Overcrowded |

## Housing Environment - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1.01 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30 percent, and 5) gross rent as a percentage of household income greater than 30 percent. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard.

## Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

| Report Area | Total Occupied <br> Housing Units | Housing Units Lacking <br> Complete Plumbing Facilities | Housing Units Lacking Complete <br> Plumbing Facilities, Percent |

| United States | $115,610,216$ | 572,007 | $0.49 \%$ |

## Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

## Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

## Housing Environment - Vacancy Rate

This indicator reports the number and percentage of housing units that are vacant. A housing unit is considered vacant by the American Community Survey if no one is living in it at the time of interview. Units occupied at the time of interview entirely by persons who are staying two months or less and who have a more permanent residence elsewhere are considered to be temporarily occupied, and are classified as "vacant."

## Population with Low Food Access

This indicator reports the percentage of the population living in census tracts designated as food deserts. A food desert is defined as a low-income census tract (where a substantial number or share of residents has low access to a supermarket or large grocery store. This indicator is relevant because it highlights populations and geographies facing food insecurity.

## Clinical Care

A lack of access to care presents barriers to good health. The supply and accessibility of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

## Access to Primary Care

This indicator reports the number of primary care physicians per 100,000 population. Doctors classified as "primary care physicians" by the AMA include: General Family Medicine MDs and DOs, General Practice MDs and DOs, General Internal Medicine MDs and General Pediatrics MDs. Physicians age 75 and over and physicians practicing sub-specialties within the listed specialties are excluded. This indicator is relevant because a shortage of health professionals contributes to access and health status issues.

Access to Primary Care, Rate (Per 100,000 Pop.) by Year, 2002 through 2011

## Access to Dentists

This indicator reports the number of dentists per 100,000 population. This indicator includes all dentists qualified as having a doctorate in dental surgery (D.D.S.) or dental medicine (D.M.D.), who are licensed by the state to practice dentistry and who are practicing within the scope of that license.

## Cancer Screening - Mammogram

This indicator reports the percentage of female Medicare enrollees, age 67-69, who have received one or more mammograms in the past two years. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

## Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. In the report area, 3,472 Medicare enrollees with diabetes have had an annual exam out of 4,071 Medicare enrollees in the report area with diabetes, or $85.31 \%$. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

## High Blood Pressure Management

In the report area, 20.75\% of adults, or 43,294, self-reported that they are not taking medication for their high blood pressure according to the CDC's Behavioural Risk Factor Surveillance System (2006-2010). This indicator is relevant because engaging in preventive behaviors decreases the likelihood of developing future health problems. When considered with other indicators of poor health, this indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

| Report <br> Area | Total <br> Population <br> (Age 18) | Total Adults Not Taking <br> Blood Pressure Medication <br> (When Needed) | Percent Adults <br> Not Taking <br> Medication | Percent Adults with High Blood <br> Pressure Not Taking Medication |

## Federally Qualified Health Centers

This indicator reports the number of Federally Qualified Health Centers (FQHCs) in the community. This indicator is relevant because FQHCs are community assets that provide health care to vulnerable populations; they receive extra funding from the federal government to promote access to ambulatory care in areas designated as medically underserved.

## Lack of Prenatal Care

This indicator reports the percentage of women who do not obtain prenatal care during their first trimester of pregnancy. This indicator is relevant because engaging in prenatal care decreases the likelihood of maternal and infant health risks. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

## Lack of a Consistent Source of Primary Care

This indicator reports the percentage of adults aged 18 and older who self-report that they do not have at least one person who they think of as their personal doctor or health care provider. This indicator is relevant because access to regular primary care is important to preventing major health issues and emergency department visits.

## Preventable Hospital Events

This indicator reports the discharge rate (per 1,000 Medicare enrollees) for conditions that are ambulatory care sensitive (ACS). ACS conditions include pneumonia, dehydration, asthma, diabetes, and other conditions which could have been prevented if adequate primary care resources were available and accessed by those patients. This indicator is relevant because analysis of ACS discharges allows demonstrating a possible "return on investment" from interventions that reduce admissions (for example, for uninsured or Medicaid patients) through better access to primary care resources.

## Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

## Physical Inactivity

Within the report area, 55,660 or $24.6 \%$ of adults aged 20 and older self-report no leisure time for activity, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?". This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health.

## Fruit/Vegetable Consumption

In the report area an estimated 146,388 , or $74 \%$ of adults over the age of 18 are consuming less than 5 servings of fruits and vegetables each day. This indicator is relevant because current behaviors are determinants of future health, and because unhealthy eating habits may cause of significant health issues, such as obesity and diabetes.

| Report <br> Area | Total <br> Population <br> (Age 18) | Total Adults with <br> Inadequate Fruit / <br> Vegetable Consumption | Percent Adults with <br> Inadequate Fruit / <br> Vegetable Consumption |

## Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

## Depression (Medicare Population)

This indicator reports the percentage of the Medicare fee-for-service population with depression.

## Asthma Prevalence

This indicator reports the percentage of adults aged 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This indicator is relevant because asthma is a prevalent problem in the U.S. that is often exacerbated by poor environmental conditions.

Cancer Incidence - Lung
This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of colon and rectum cancer adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older). This indicator is relevant because cancer is a leading cause of death and it is important to identify cancers separately to better target interventions.

## Low Birth Weight

This indicator reports the percentage of total births that are low birth weight (Under 2500 g ). This indicator is relevant because low birth weight infants are at high risk for health problems. This indicator can also highlight the existence of health disparities.

## Mortality - Premature Death

This indicator reports Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death, age-adjusted to the 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

## Mortality - Cancer

This indicator reports the rate of death due to malignant neoplasm (cancer) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because cancer is a leading cause of death in the United States.

## Mortality - Unintentional Injury

This indicator reports the rate of death due to unintentional injury (accident) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because accidents are a leading cause of death in the U.S.

|  |  |  |  |  | Unintentional Injury (Accident) Mortality, Age-Adjusted Death Rate <br> (Per 100,000 Pop.) St. Lucie County, FL (45.24) Florida (44.17) United States (38.85) |

## Mortality - Motor Vehicle Accident

This indicator reports the rate of death due to motor vehicle crashes per 100,000 population, which include collisions with another motor vehicle, a nonmotorist, a fixed object, and a non-fixed object, an overturn, and any other non-collision. This indicator is relevant because motor vehicle crash deaths are preventable and they are a cause of premature death.

## Infant Mortality

This indicator reports the rate of deaths to infants less than one year of age per 1,000 births. This indicator is relevant because high rates of infant mortality indicate the existence of broader issues pertaining to access to care and maternal and child health.

# Improving Breastfeeding through Social Marketing - Phase 2 

Presentation to Healthy St. Lucie Coalition
Task 4.1.4 - Deliverable 4.2.5
SOW- 10408989

Submitted to:
Jennifer Harris
Contract Manager
The Department of Health
St. Lucie County

## Presentation to Healthy St. Lucie Coalition

A presentation of the formative research plan and findings was provided to the Healthy
St. Lucie Coalition on Wednesday, June 27, 2018. The PowerPoint slides from the presentation are included in the following section.

PowerPoint Presentation Slides

## Steps of a Social Marketing Campaign

## A Social Marketing Approach

- Do I really understand my priority audience and see things from their perspective?
- Am I clear about what I would like my priority audience to do?
- For my priority audience, do the benefits of doing what I would like them to do outweigh the costs or barriers to doing it?
- Am I using a combination of activities in order to encourage people to achieve the desired action?

Step 1: Describe the Background, Purpose and Focus for the Planning Effort

# Step 3: <br> Select and Describe the Priority Audience 

Does their behavior contribute to solving the problem?

Is the segment large enough to make a measurable difference?

Is the segment small enough for us to reach effectively with our resources?

# Step 4: Set Marketing Objectives and Goals 

| Priority Audience | Behavior Objective | Knowledge Objective | Belief Objective | Target Goal |
| :--- | :--- | :--- | :--- | :--- |
| African American | To sustain breastfeeding | To know where to get <br> support/advice about | To believe that any <br> amount of breastmilk is | Increase the number of <br> African American <br> monder age 25) <br> for 6 months |
| County |  |  |  |  |

Step 5: Identify Audience Benefits, Barriers and the Competition

- Information is first sought from the community, and subsequent programs and campaigns are tailored to the people being served

## Focus Groups

To understand African American mothers' perceptions of breastfeeding

- Benefits and barriers to engaging in breastfeeding
- The competition to breastfeeding
- The audiences that are influential to mothers to initiate and sustain breastfeeding
- 3 focus groups conducted in June, 2018
- 21 total participants
- Groups held at In the Image of Christ
- 90 minutes
- Participants received a \$50 Visa gift card

## Breastfeeding <br> Experience

- Most mothers had tried breastfeeding, but were unsuccessful
- Latching issues
- Pain/discomfort
- Did not produce enough milk

She didn't latch on it that well. So I needed to pump and breastfeed, but it was bad, I was blistering and stuff, so I stopped.

I didn't breastfeed him because he didn't latch on, so I got out of the hospital and went to the doctor and I got cream to stop leaking because it was so much milk and it hurt.

## Decision to Breastfeed

Like half way through [pregnancy]. Like the whole time I've always thought about it, but like the halfway through I probably really decided I was going to try breastfeeding as long as I could, but I didn't know what I was in store for... I just wanted to try it at least and see how long I could keep going. I knew it was healthy for the baby. It was beneficial. So it's my first child, so I was just trying to do what I thought was best for her.

I didn't decide until the hospital only because every WIC visit you go to, they talk to you about it. My concern was not having enough milk. I don't want to breastfeed and then turn down the WIC and then don't have enough milk. So in the hospital I'm like, I don't want to go through not having it so I just went straight to bottle.

## Child's Father/Partners

He [partner] used to help me. He used to actually help me on the pump because I was flowing like really, really steady so it was coming out fast so he will have to hold it. I will have to hold the pump, so yeah, he was supportive.

Well, the way I look at it, when you're going to WIC office, you don't see many males. We're the ones who sit there and wait on those vouchers and everything else. So you can't tell me how to feed this baby. You just better be lucky it's eating. Because they don't do the stuff, so I mean, understand it's your baby too, but you're not going to sit at the WIC office for hours and hours and hours. You're probably coming up for about 30 minutes and then after that you go, oh, I've got to run up here and do this and that. I'm going to be sitting there with the child. I'm going to be the one waiting on the vouchers. I'm going to be the one handling all the business, so I'll figure out how to eat.

## Breastfeeding Benefits

Because everyone's different, but I felt like from breastfeeding those couple of days that I did, it kind of sped up the process [of healing].

I mean like with breastfeeding, with my son, I think it's better because from my experience, my son, I breastfed him, everybody in the house was sick and he never caught anything. Never. And he was a baby so you know like they can catch things more easily when they're a baby.

It's healthier. It helps their immune system and them being more advanced.

## Barriers to Breastfeeding

- I know I have to read it and stuff, but I have a crying baby sitting right here. I'm out of it and taking drugs to relieve my pain, you know what I'm saying? So it's like, it's not like we don't want to read it's just like after we have the baby, there's a lot of stuff that you have to deal with.
- Yeah, I know like the little bottles that say like two milliliters formula. I didn't know how much he was getting. I was just like, he was getting big, like fat and heavy. I can't, I can't hold him. But I was like, I was telling my mom, I was like maybe he's eating too much and then her and my grandma's like maybe he's not eating enough if he wants more feed him more. That's why I was like, no, that's done.
- So I used to have to do it in public sometimes. You know people like it's just the way people look at you weird. They see you breastfeeding. I don't know why, but I was like, Dang, it's only breast milk.
- The nurses at the hospital, they told me like, you know, you have to eat healthier and stuff like that.
- Black people I don't think it is very common because, I know like a lot of my friends I know who have kids, they did not want to breastfeed, because they believe it messes up their breasts and makes them look saggy.
- That's another thing. I'm like, why y'all want me to. I hate when my bra get wet and I'm embarrassed and y'all want me to keep doing this?
- I would have to wake up at five in the morning then I wouldn't get home until four in the afternoon [from work]. So breastfeeding was just not an option.

## Postnatal Healthcare Experiences

I don't think the pediatrician pushed the issue about breastfeeding. I think it's the, your prenatal doctor, you know, before you had the baby and then your family and stuff after because they don't. The pediatrician. I told her. Oh yeah. What's she, what kind of milk is she on? That's the question they ask. They don't ask if you're breastfeeding.
Since I did breastfeed my whole hospital stay, they gave me like this bag with coupons. Different websites that are for breastfed mothers that you could get like basically cheaper items on sale, and they did give me like a nice breastfeeding package. They gave me the mother's milk tea. They gave me coupons for it too. Like they were kind of, well they were very like pro breastfed. But then they gave me a regular bag too with just coupons for diapers and wipes and stuff like that. So I mean I enjoyed the hospital that I delivered at and since I feel like if I wasn't breastfeeding I probably would've never got that little package.
Oh, I thought I was the only one that they used to do that too. They was helpful, but that morning, like, no, that's not okay. Like your baby just went to sleep. Everyone knows the baby got to wake up between three and five and then they go at 9:00. Banging on the door. She didn't do no soft knock or ring the doorbell, "It's Healthy Start Mommy".

## Competition: Formula

## Different varieties to try if baby isn't tolerating one

## Referred to as "milk"

## Viewed as healthy

## Can add oatmeal/rice to bottle

Reaching African
American Mothers

- Facebook - 19 of 21 participants actively use Facebook
- Word of mouth
- Doctor's appointments immunizations

## Other Moms with Breastfeeding Experience

## Trustworthy Sources of Information

But if you know that they don't have
kids, then you're really not going to believe them.

## African American Mothers

## Community Members

Health Professionals
$\qquad$

## Campaign

 Strategy Ideas- Monthly community groups for new moms
- Peer support
- Assistance ordering free breast pumps through insurance
- Video chat with nurses/lactation specialists
- More follow-up through text and email
- Talk to someone about breastfeeding while waiting at WIC office

I would go if there was like a bunch of moms that did it with a personal experience and then the doctors to like explain, you know, the growth and the different stages of breastfeeding.
