2009 Florida BRFSS Data Report Table of Contents

Introduction	i
Alcohol Consumption	1
Arthritis	2
Asthma	3
Cancer Prevalence	4
Cardiovascular Disease	8
Cholesterol Awareness	9
Diabetes	10
Disability	14
Family Planning	16
Health Status & Quality of Life	17
Healthcare Access & Coverage	21
HIV/AIDS	23
Hypertension Awareness	23
Immunization	24
Overweight & Obesity	26
Physical Activity & Nutrition	29
Tobacco Use & Exposure	32
Glossary	Appendix I
Healthy People 2010 Objectives	Appendix II

Completed Surveys: 12,055

2009 State Adult Population: 14,668,626

The Florida Department of Health is pleased to release the 2009 Florida Behavioral Risk Factor Surveillance System (BRFSS) Data Report. This report focuses on examining state-level estimates. Each of the 64 indicators is presented by sex, race/ethnicity, age group, education level, income level, and marital status. In the data report, BRFSS survey data are adjusted, or weighted, so that the resulting estimates can be generalized to all Florida adults aged 18 years and older.

The 2009 state-level survey was developed in collaboration with state, university, and local representatives. This development method was used to better meet the needs of programs, researchers, and community planners throughout the state. Florida was the first state to add cancer prevalence questions to the BRFSS on 2008 and continued the questions on 2009.

In 2009, 12,055 adults in Florida completed the survey, which provides a rich data source to estimate the prevalence of personal health behaviors that contribute to morbidity and mortality among adults in Florida. This report presents survey data on a variety of issues related to health status, healthcare access, lifestyle, chronic illnesses, and disease prevention practices. These data can be used to: (1) determine priority health issues and identify populations at highest risk for illness, disability, and death; (2) plan and evaluate prevention programs; (3) educate the community and policy makers about disease prevention; and (4) support community policies that promote health and prevent disease.

Because BRFSS respondents are randomly selected, measures of prevalence and mean are subject to random sample errors. Each measure listed in the data tables includes the 95% confidence interval (CI). Measures of prevalence and mean are excluded from the tables for any subpopulation with a sample size less than 30, which would yield statistically unreliable estimates.

If any assistance is needed with interpretation of data or survey methods, please contact the Bureau of Epidemiology, Chronic Disease Epidemiology Section at (850) 245-4401.

Alcohol Consumption

Percentage of adults who engage in heavy or binge drinking

		Measure	95% CI
ALL	Overall	14.7	13.4 – 16.0
SEX	Men	18.5	16.3 – 20.9
	Women	11.0	9.7 – 12.4
RACE/ETHNICITY	Non-Hisp. White	17.2	15.7 – 18.8
	Non-Hisp. Black	10.1	7.0 -14.4
	Hispanic	10.5	7.6 – 14.5
SEX BY RACE/ETHNICITY	Non-Hisp. White Men	22.5	19.9 – 25.4
	Non-Hisp. White Women	12.4	11.0 – 13.9
	Non-Hisp. Black Men	9.8	5.1 – 18.1
	Non-Hisp. Black Women	10.4	6.8 – 15.5

A1C Test A blood test used as an indicator of an individual's average blood glucose level over the past three months. Usual activities, such as self-care, work, and recreation. **Activities of Daily Living** Consuming four or more alcoholic drinks for women and five or more **Binge Drinking** alcoholic drinks for men on one occasion. Taking prescribed medication, altering diet, exercising, and reducing **Blood Pressure Control Measures** body weight to control blood pressure. A measure used to estimate the amount of excess body weight. BMI is **Body Mass Index (BMI)** calculated using self-reported height and weight. Experiencing pain, aching, or stiffness in or around a joint that first **Chronic Joint Symptoms** began more than three months ago. **Current Smokers** Adults who have ever smoked at least 100 cigarettes and who smoked on some or all days in the previous 30 days. **Former Smokers** Adults who have ever smoked at least 100 cigarettes, but did not smoke on any of the previous 30 days. **Health Insurance Coverage** Includes health insurance, prepaid plans such as HMOs, and government plans such as Medicare. **Healthy Weight** Having a Body Mass Index (BMI) between 18.5 and 24.9. BMI is calculated using self-reported height and weight. In the previous 30 days, women consuming an average of one or more Heavy Drinking (also called chronic drinking) alcoholic drinks per day or men consuming an average of two or more alcoholic drinks per day. Experiencing pain, aching, or stiffness in or around a joint. Joint Symptoms Engaging in any physical activities or exercises such as running, Leisure-Time Physical Activity or Exercise calisthenics, golf, gardening, or walking for exercise, other than participation in these activities or exercise as part of a regular job. A general physical exam; not an exam for a specific injury, illness, or **Medical Checkup** condition. **Moderate Physical Activity** Engaging in activities such as brisk walking, bicycling, vacuuming, gardening, or anything else that causes some increase in breathing or heart rate for at least 30 minutes per day on five or more days per week.

Obese

Having a Body Mass Index (BMI) that is greater than or equal to 30.0.

BMI is calculated using self-reported height and weight.

Overweight Having a Body Mass Index (BMI) ranging from 25.0 to 29.9. BMI is calculated using self-reported height and weight.

Overweight or Obese Having a Body Mass Index (BMI) that is greater than or equal to 25.0.

Poor Mental Health

Adults who report that their mental health, which includes stress, depression, and problems with emotions, was not good on 14 or more of the previous 30 days.

Poor Physical Health

Adults who report that their physical health, which includes physical illness and injury, was not good on 14 or more of the previous 30 days.

Secondhand Smoke

Being exposed to someone else's tobacco smoke in a room (at work or home) during the past seven days.

Sedentary Engaging in no leisure-time physical activity.

Vigorous Physical Activity

Engaging in vigorous activities, such as running, aerobics, heavy yard work, or anything else that causes large increases in breathing or heart rate for at least 20 minutes per day on three or more days per week.

Healthy People 2010 Objectives

Alcohol Consumption

- 26-11. Reduce the proportion of persons engaging in binge drinking of alcoholic beverages.
- 26-12. Reduce the average annual alcohol consumption.
- 26-13. Reduce the proportion of adults who exceed guidelines for low-risk drinking.

Arthritis

2-2. Reduce the proportion of adults with chronic joint symptoms who experience a limitation in activity due to arthritis.

Cholesterol Awareness

- 12-14. Reduce the proportion of adults with high total blood cholesterol levels.
- 12-15. Increase the proportion of adults who have had their blood cholesterol checked within the preceding 5 years.

Diabetes

- 5-1. Increase the proportion of persons with diabetes who receive formal diabetes education.
- 5-3. Reduce the overall rate of diabetes that is clinically diagnosed.
- 5-13. Increase the proportion of adults with diabetes who have an annual dilated eye examination.
- 5-14. Increase the proportion of adults with diabetes who have at least an annual foot examination.
- 5-17. Increase the proportion of adults with diabetes who perform self-blood-glucose-monitoring at least once daily.

Healthcare Access & Coverage

- 1-1. Increase the proportion of persons with health insurance.
- 1-5. Increase the proportion of persons with a usual primary care provider.

Hypertension Awareness & Control

- 12-9. Reduce the proportion of adults with high blood pressure.
- 12-10. Increase the proportion of adults with high blood pressure whose blood pressure is under control.
- 12-11. Increase the proportion of adults with high blood pressure who are taking action (for example, losing weight, increasing physical activity, or reducing sodium intake) to help control their blood pressure.
- 12-12. Increase the proportion of adults who have had their blood pressure measured within the preceding 2 years and can state whether their blood pressure was normal or high.

Immunization

- 14-28. Increase hepatitis B vaccine coverage among high-risk groups.
- 14-29. Increase the proportion of adults who are vaccinated annually against influenza and ever vaccinated against pneumococcal disease.

Healthy People 2010 Objectives

Overweight & Obesity

- 19-1. Increase the proportion of adults who are at a healthy weight.
- 19-2. Reduce the proportion of adults who are obese.

Physical Activity & Nutrition

- 19-5. Increase the proportion of persons aged 2 years and older who consume at least two daily servings of fruit
- 19-6. Increase the proportion of persons aged 2 years and older who consume at least three daily servings of vegetables, with at least one-third being dark green or orange vegetables.
- 22-1. Reduce the proportion of adults who engage in no leisure-time physical activity.
- 22-2. Increase the proportion of adults who engage regularly, preferably daily, in moderate physical activity for at least 30 minutes per day.
- 22-3. Increase the proportion of adults who engage in vigorous physical activity that promotes the development and maintenance of cardiorespiratory fitness 3 or more days per week for 20 or more minutes per occasion.

Tobacco Use & Exposure

- 27-1d. Reduce other tobacco products use by adults.
- 27-4b. Increase the average age of first use of tobacco products by young adults.
- 27-5. Increase smoking cessation attempts by adult smokers.
- 27-10. Reduce the proportion of non-smokers exposed to environmental tobacco smoke.

The Healthy People 2010 objectives listed in this appendix are directly or indirectly related to the data presented in this report.
