Produced by: Violence and Injury Prevention Program, Division of Community Health Promotion, Florida Department of Health, Tallahassee, Florida 32399, (850) 245-4455

Data Source: Florida Agency for Health Care Administration Hospital Inpatient Data

Proposed Case Definition (ICD-10-CM): Principal Diagnosis All S Codes, T36-T50 with a 6th character of 1, 2, 3, or 4 (Exceptions: T36.9, T37.9, T39.9, T41.4, T42.7, T43.9, T45.9, T47.9, and T49.9 with 5th character of 1, 2, 3, or 4), T51-T65, T66-T77, T79. Cases with 7th character S (Sequelae) are excluded.

Note: Effective October 1, 2015, the hospital record coding system transitioned to the International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM). Increases or decreases starting in 2015 could be a result of the coding changes. Results may be subject to change. Aggregate counts less than 5 are suppressed.

Increases or decreases starting in 2015 could be a result of the coding changes. Results may be subject to change. Aggregate counts less than 5 are suppressed. Currently, there is no official definition for violence-related injury in hospital data. Epidemiologist consulted with the Centers for Disease Control and Prevention (CDC). Violence-related injuries include self-harm, assault, and legal intervention. Legal Intervention includes "Injury or poisoning caused by police or other legal authorities (including security guards) during law enforcement activities. Includes injuries and poisonings (mace, pepper spray) inflicted during legal action or execution, or while attempting to enforce the law such as arrest or restraint of arrested persons" (Centers for Disease Control and Prevention, 2007). Not all self-harm injuries are considered suicide attempts, as these two concepts are defined differently and self-harm can occur without suicidal intent.
