# 2021 Florida Behavioral Risk Factor Surveillance System Data Book

Florida Department of Health Division of Community Health Promotion Public Health Research Unit

Ron DeSantis Governor Joseph A. Ladapo, MD, PhD State Surgeon General

October 2022

## Introduction

The Florida Department of Health is pleased to release the 2021 Florida Behavioral Risk Factor Surveillance System (BRFSS) State Data. The Florida BRFSS has been collecting and reporting health behavior data since 1986. The 2021 BRFSS Survey interviewed 7,942 Florida adults aged 18 years and older.

This statewide telephone survey is the only source of state-specific, population-based estimates of the prevalence of various health conditions and related risk behaviors among Florida residents aged 18 and older. The purpose of this survey is to gather information regarding personal health and risk behaviors, selected medical conditions, and preventive health care practices among Florida adults. These data can be used to: (1) determine priority health issues and identify populations at risk for illness, disability, and death; (2) plan and evaluate prevention programs; (3) educate the community and policy makers about disease prevention; and (4) support community policies that promote health and prevent disease.

The following data tables present the survey data on a variety of issues related to health status, health care access, lifestyle, chronic illnesses, and disease prevention practices. Each indicator was analyzed by sex, race/ethnicity, age, education, income, and marital status.

Since BRFSS respondents are randomly selected, measures of prevalence and mean are subject to random sample errors. Each measure listed in the data tables includes the 95% confidence interval (CI). If the CIs overlap between subpopulations (e.g., males compared to females), there is no statistically significant difference in the prevalence rates. However, if the CIs do not overlap, there is a statistically significant difference. For example, if the CI for men is 21.4% - 24.5% and the CI for women is 29.4% - 32.5%, then there is a statistically higher prevalence of women having that particular indicator compared to men as the two CIs do not overlap.

The CIs are determined by many factors, sample size in particular. As the data are divided for analysis by race/ethnicity, age, etc., the sample size for each group becomes smaller, the CIs become larger, and the estimates become less reliable. The significance of measures with very wide CIs should be interpreted with caution. Measures of prevalence and mean are excluded from the tables for any subpopulation with a sample size less than 30, which would yield statistically unreliable estimates.

The prevalence rates are adjusted, or "weighted," by the Centers for Disease Control and Prevention to represent all Florida adults. Weighting is a procedure that adjusts for the chance of an adult being selected to complete the survey and for discrepancies between the adults who completed the survey and the overall population of Florida adults. The data were weighted to the respondent's probability of selection by county, as well as age, sex, marital status, race/ethnicity, education level, and housing type.

Due to a change in weighting methodology and the inclusion of cellular telephone responses starting in 2011, data from 2021 may not be comparable to data collected before 2011.

### 2021 Florida BRFSS Data Report Table of Contents

Health Status	
Arthritis	1
Asthma	3
Cancer Prevalence	5
Cardiovascular Disease	6
Cholesterol Awareness	8

# GLOSSARY

# 2021 Florida Behavioral Risk Factor Surveillance System Data

Activities of Daily Living	Usual activities, such as self-care, work, or recreation.
Adult	Individual aged 18 years or older.
Angina	Most common symptom of coronary artery disease (CAD); chest pain or discomfort that occurs if an area of the heart muscle does not get enough oxygen-rich blood.
Arthritis	Joint inflammation; term used in the public health field to describe more than 100 rheumatic diseases and conditions that affect joints, the tissues which surround the joint, and other connective tissue; pattern, severity, and location of symptoms can vary.
Asthma	Disease that affects the lungs; causes repeated episodes of wheezing, breathlessness, chest tightness, and nighttime or early morning coughing.
Binge Drinking*	For women, consumption of 4 or more drinks during a single occasion in the past 30 days; for men, consumption of 5 or more drinks during a single occasion in the past 30 days.
Blood Glucose	Also called blood sugar; refers to the level of glucose, the main sugar the body makes from the food we eat, that is found in the bloodstream.
Blood Sugar	See Blood Glucose
Body Mass Index (BMI)	A number calculated from a person's height and weight; provides a reliable indicator of body fatness for most people; used to screen for weight categories that may lead to health problems.
Cancer	General name for a group of diseases; when cells in a part of the body begin to grow out of control, forming new, abnormal cells and sometimes invading (growing into) other tissues.
Cholesterol	A substance the body uses to produce hormones, vitamin D, and food-digesting acids. Too much cholesterol in the blood over an extended period can increase the risk of coronary heart disease, heart attack, or angina.
Chronic Bronchitis	A long-term condition in which the airways that carry air to the lungs become inflamed and produce too much mucus, making it difficult to get air into and out of the lungs.
Chronic Diseases	Diseases of long duration and generally slow progression (e.g., heart disease, stroke, cancer, diabetes); represent the leading causes of mortality worldwide.
Chronic Obstructive Pulmonary	Term that refers to a group of diseases that cause airflow blockage and breathing- related problems, including emphysema and chronic bronchitis.
Coronary Artery Disease (CAD)	Most common type of heart disease; occurs when a substance called plaque builds up on the inner walls of the arteries that supply blood to the heart, called coronary arteries; most common cause of a heart attack.
Coronary Heart Disease (CHD)	See Coronary Artery Disease (CAD)
Current Smoker*	Combination of everyday smoker and some days smoker.
Depressive Disorders	Mental illnesses characterized by a profound and persistent feeling of sadness or despair and/or a loss of interest in things that once were pleasurable; disturbance in sleep, appetite, and mental processes are a common accompaniment.
Diabetes	General term for diabetes mellitus; disease in which blood glucose levels are above normal.
E-Cigarettes	An e-cigarette, also known as an electronic cigarette, is a device that allows a user to inhale nicotine and other vapors.
Emphysema	Long-term, progressive disease of the lungs that primarily causes shortness of breath; tissues necessary to support the physical shape and function of the lungs are destroyed. See also Chronic Obstructive Pulmonary Disease (COPD).
Everyday Smoker*	Adults who reported smoking at least 100 cigarettes in their lifetimes and reported smoking everyday now.

# GLOSSARY

# 2021 Florida Behavioral Risk Factor Surveillance System Data

Exercise	See Physical Activity
Fibromyalgia	A musculoskeletal condition causing widespread muscle and joint pain and fatigue.
Flu	Contagious respiratory illness caused by influenza viruses; can cause mild to severe illness, and at times can lead to death.
Flu Shot	Influenza vaccine; an inactivated vaccine (containing killed virus) that is given with a needle, usually in the arm. The flu vaccine can also be administered as an attenuated vaccine (containing weakened, live virus) by a spray, mist, or drop in the nose.
Former Smoker	Adults who reported smoking at least 100 cigarettes in their lifetimes but reported not smoking now.
Gout	A form of arthritis caused by too much uric acid in the blood that causes pain, stiffness, and swelling of a joint.
Health Behavior	An action taken by a person to maintain, attain, or regain good health and to prevent illness.
Health Care Coverage	Health insurance, pre-paid plans such as HMO's, government plans such as Medicare.
Health Care Provider	A person who by education, training, certification, or licensure is qualified to and is engaged in providing health care to patients (e.g., medical doctor, nurse practitioner, physician assistant, registered nurse).
Health Risk Behavior	An action taken by a person that is associated with higher than average rates of morbidity or mortality (e.g., lack of physical activity, poor nutrition, tobacco use, excessive alcohol consumption).
Healthy Weight	Having a body mass index (BMI) ranging from 18.5 to 24.9; BMI is calculated using self- reported height and weight.
Heart Attack	Most commonly caused by coronary artery disease (CAD); occurs when a section of the heart muscle dies or gets damaged because of reduced blood supply.
Heavy Drinking*	For women, consumption of more than 1 drink per day on average in the past 30 days; for men, consumption of more than 2 drinks per day on average in the past 30 days.
High Blood Cholesterol	Condition where there is too much cholesterol in the blood for an extended period of time; increases the risk of coronary heart disease, heart attack, or angina.
High Blood Pressure	Condition where the blood circulates through the arteries with too much force; tires the heart, harms the arteries, and increases the risk of heart attack, stroke, and kidney problems.
Hispanic	Adults of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race; self-reported demographic variable.
HIV	Human immunodeficiency virus (HIV) damages a person's body by destroying immune system cells, which are crucial to helping the body fight diseases; can lead to acquired immune deficiency syndrome (AIDS).
Hypertension	See High Blood Pressure
Influenza	See Flu
Kidney Disease	Also called renal disease; general term for any damage that reduces the functioning of the kidney.
Mental Health	A state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.
Never Smoked*	Adults who reported smoking less than 100 cigarettes in their lifetime.
Non-Hispanic Black	Adults not of Hispanic culture or origins reporting membership in only the black race category; self-reported demographic variable.
Non-Hispanic White	Adults not of Hispanic culture or origins reporting membership in only the white race category; self-reported demographic variable.

# GLOSSARY

2021 Florida Behavioral Risk Factor Surveillance System Data		
Non-Smoker*	Combination of former smoker and never smoked.	
Obese	Having a body mass index (BMI) that is greater than or equal to 30.0; BMI is calculated using self-reported height and weight.	
Obesity	A condition characterized by being obese.	
Overweight	Having a body mass index (BMI) ranging from 25.0 to 29.9; BMI is calculated using self- reported height and weight.	
Personal Doctor	A health care provider that an adult identifies as their personal health care provider.	
Physical Activity	Any bodily movement produced by the contraction of skeletal muscle that increases energy expenditure above basal level and that enhances or maintains physical fitness and overall health and wellness.	
Pneumococcal Vaccination	Vaccine given with a needle, usually in the arm, to prevent pneumococcal pneumonia.	
Pneumonia	Infection of the lungs, usually caused by bacteria or viruses, that can cause mild to severe illness.	
Poor Mental Health	Adults who report that their mental health, which includes stress, depression, and problems with emotions, was not good on 14 or more of the previous 30 days.	
Poor Physical Health	Adults who report that their physical health, which includes physical illness and injury, was not good on 14 or more of the previous 30 days.	
Pre-Diabetes	A condition in which an individual's blood sugar is high, but not high enough to be diagnosed as diabetes.	
Race/Ethnicity	A measure that combines an adult's ethnicity status (Hispanic/non-Hispanic) and race status (e.g., white; black; other); self-reported demographic variable.	
Routine Checkup	A general physical exam; does not include exams conducted for a specific injury, illness, or condition.	
Sedentary*	Participating in no leisure-time physical activity in the past 30 days.	
Sex	The condition or character of being male or female; self-reported demographic variable.	
Smoking	Inhalation of the smoke (gases and hydrocarbon vapors) generated by slowly burning tobacco.	
Some Days Smoking*	Adults who reported smoking at least 100 cigarettes in their lifetime and reported smoking some days now.	
Stroke	Sometimes called a brain attack; occurs when a clot blocks the blood supply to the brain or when a blood vessel in the brain bursts.	

# 2021 Florida Behavioral Risk Factor Surveillance System Data Report

# Healthy People 2030 Objectives

The U.S. Department of Health and Human Services, Office of Disease Prevention and Health Promotion's Healthy People initiative identifies public health priorities that can improve the health and well-being of individuals. Organizations and communities can use Healthy People objectives to help set and measure progress toward benchmarks. The Healthy People 2030 objectives listed in this appendix are directly or indirectly related to the data presented in this report.

# **Alcohol Consumption**

SU-10. Reduce the proportion of people aged 21 years and over who engaged in binge drinking in the past month

# Arthritis

A-02. Reduce the proportion of adults with arthritis whose arthritis limits their activities

# **Cardiovascular Disease**

HDS-01. Improve cardiovascular health in adults

HDS-02. Reduce coronary heart disease deaths

HDS-03. Reduce stroke deaths

# **Cholesterol Awareness**

HDS-06. Reduce cholesterol in adults

# Diabetes

D-01. Reduce the number of diabetes cases diagnosed yearly

D-06. Increase the proportion of people with diabetes who get formal diabetes education

D-07. Increase the proportion of adults with diabetes using insulin who monitor their blood sugar daily

# **Family Planning**

FP-01. Reduce the proportion of unintended pregnancies

# **Hypertension Awareness & Control**

HDS-05. Increase control of high blood pressure in adults

# Immunization

IID-09. Increase the proportion of people who get the flu vaccine every year

# **Kidney Disease**

CKD-01. Reduce the proportion of adults with chronic kidney disease

CKD-02. Increase the proportion of adults with chronic kidney disease who know they have it

# **Overweight & Obesity**

NWS-03. Reduce the proportion of adults with obesity

# **Physical Activity**

PA-01. Reduce the proportion of adults who do no physical activity in their free time

# Healthy People 2030 Objectives

# Tobacco Use & Exposure

- TU-01. Reduce current tobacco use in adults
- TU-02. Reduce current cigarette smoking in adults
- TU-03. Reduce current cigarette, cigar, and pipe smoking in adults
- TU-11. Increase past-year attempts to quit smoking in adults
- TU-14. Increase successful quit attempts in adults who smoke
- TU-15. Increase successful quit attempts in pregnant women who smoke
