

Division of Medical Quality Assurance

ANNUAL REPORT

and Long-Range Plan

FY 2023-24

Ron DeSantis
Governor

Joseph A. Ladapo, MD, PhD
State Surgeon General

How We Work

LICENSE, ENFORCE, INFORM

The Florida Department of Health, Division of Medical Quality Assurance regulates health care practitioners and facilities through professional licensure, facility permitting, and administrative enforcement in order to preserve the health, safety, and welfare of the public.

Mission

To protect, promote, and improve the health of all people in Florida through integrated state, county, and community efforts.

Vision

To be the healthiest state in the nation.

Values

INNOVATION

We search for creative solutions and manage resources wisely.

COLLABORATION

We use teamwork to achieve common goals and solve problems.

ACCOUNTABILITY

We perform with integrity and respect.

RESPONSIVENESS

We achieve our mission by serving our customers.

EXCELLENCE

We promote quality outcomes through learning and continuous performance improvement.

Message from the State Surgeon General

As Florida's State Surgeon General, it gives me great pleasure to present this annual report on behalf of the Division of Medical Quality Assurance (MQA), which captures its purpose, achievements, and impact on the landscape of health care regulation in Florida during FY 2023-24.

Every day, the health care practitioners and facilities we regulate, and the consumers who receive their services, rely on us to fulfill the purpose of our regulations. These regulations help uphold the safety and quality expected by each Floridian and visitor when receiving health care services. The success of these regulations relies on awareness, education, and compliance by the practitioners, facilities, and consumers and supporting resources to implement enforcement and programmatic activities. I am proud that MQA is among one of the divisions at the Florida Department of Health (Department) contributing to our mission to protect, promote, and improve the health of all Floridians.

MQA works hard to sustain and improve a regulatory structure that supports the state's priorities related to global competitiveness and economic growth. This year, MQA approved 123,187 initial licenses, upgraded 15,994 licenses, and renewed 514,914 licenses. These efforts are supported by dedicated employees who collaborate with 22 regulatory boards and four councils to effectively regulate 364 license types and adapt strategies to help the state respond to emergencies.

In addition to managing its daily operations, I am proud of MQA for its enforcement and programmatic activities. I hope this report highlights for readers the importance of statewide investigative work taking place with our law enforcement partners. Health care facility inspectors, investigators, program liaisons, compliance managers, and attorneys work together with the boards, councils, and Office of the General Counsel to produce an effective enforcement and compliance model for Florida's practitioners and facilities that is often looked to by other states when enacting legislation affecting health care professions. This year, MQA completed 5,250 investigations, referred 1,380 unlicensed activity (ULA) cases for investigation, and issued 505 cease and desist orders, fulfilling its commitment to the safety of health care consumers in Florida.

We have much to celebrate as we reflect on the impact our work has had in FY 2023-24. Whether educating the public about the dangers of unlicensed medical practice, offering licensure support services for veterans, or encouraging safer prescribing of controlled substances, it is clear that MQA takes its commitment to protecting the public seriously.

With the highest regards,

A handwritten signature in black ink, appearing to read "Ladapo".

Joseph A. Ladapo
MD, PhD
State Surgeon General

Message from the Division Director

It is with great pride that I share the story of MQA's journey throughout FY 2023-24. As Director, I have the distinct honor of guiding our teams through a pivotal chapter in health care innovation—where our cutting-edge technological advancements have significantly advanced the standards and practices in the industry, underscoring our unwavering commitment to safeguarding public health.

This year, MQA was defined by resilience and innovation. Rooted firmly at the heart of the health care industry's regulatory framework, MQA stands as a steadfast guardian of standards and safety. Through rigorous oversight, precise licensing, and proactive communication, we have nurtured an environment where patient safety and efficiency are paramount.

This past year has been marked by significant technological advancements, including the expansion of MQA's Virtual Agent, ELI, to handle web chats for 31 profession offices. Additionally, this year celebrates the first full year of e-licensing, with 180,300 licenses electronically downloaded towards the end of quarter four. We have not only implemented innovative oversight strategies but have also strengthened our compliance mechanisms, ensuring they are both effective and forward-thinking. These strides forward are not just milestones—they are the markers of our dedication to excellence.

As we look to the horizon, we are energized to continue our mission to protect, promote, and improve the health and safety of all Floridians through public protection and regulatory efficiency. With the collective effort of our devoted team and the invaluable support of our stakeholders, we are prepared to navigate the evolving landscape of health care regulation stamped by trends like enhanced licensure mobility, telehealth expansions, and technological advancements. We will adapt, innovate, and seize opportunities to better serve health care applicants, practitioners, and consumers.

I am deeply grateful to each member of MQA for their relentless dedication and professionalism. Their commitment fuels our collective success. To our health care associations, board and council members, and partnering agencies, your partnership is indispensable in this shared journey of enhancing health care regulation. Together, we will forge ahead, continuing to make impactful strides in safeguarding public health and ensuring the integrity of health care services for all. This story is ours, and it is one of progress, perseverance, and profound dedication.

Thank you,

A handwritten signature in black ink, appearing to read "Jennifer L. Wenhold".

Jennifer L. Wenhold
MSW, CPM
Division Director

Executive

Summary

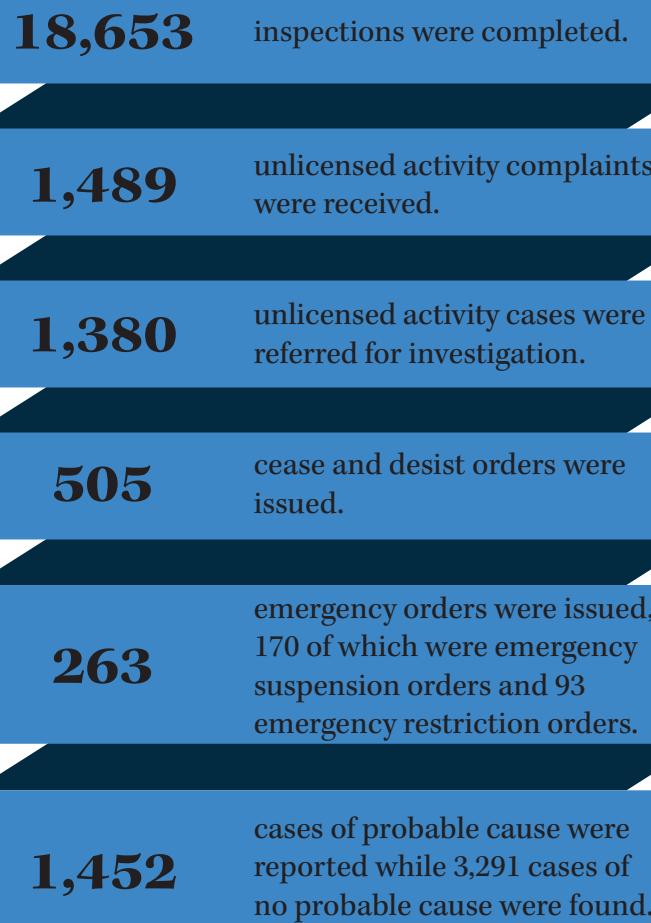

Florida's population surged by 1.98% since FY 2019-20, making it the fastest-growing state in the nation. As this dynamic population evolves, MQA is dedicated to ensuring that Florida's 1.5 million health care practitioners can begin and continue working with minimal delays in licensure.

In FY 2023-24, MQA exceeded its key performance measures, approving 123,187 initial licenses to health care practitioners and processing 514,914 renewal applications. This achievement underscores MQA's commitment to maintaining a robust and responsive health care workforce.

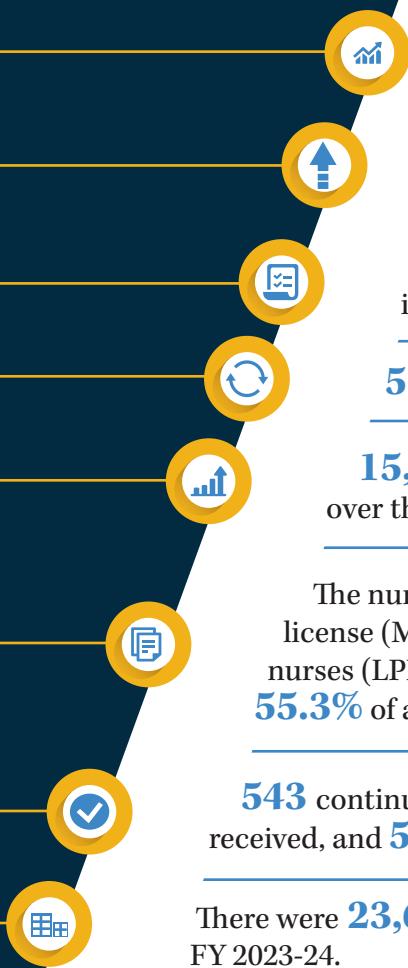

The Bureau of Enforcement received 50,130 complaints against health care practitioners and issued 263 emergency orders in response to serious violations, reflecting MQA's unwavering dedication to public safety and practitioner accountability.

Through these efforts, MQA ensures that Florida's health care system remains resilient and responsive, adapting to the needs of a growing population while safeguarding the highest standards of care.

Enforcement

Licensure

There were **1,537,549** total licensed practitioners at the end of FY 2023-24.

Licensed practitioners have experienced an average annual growth rate of **3.4%** over the last five years.

149,195 initial applications were received, and **123,187** initial licenses were approved.

514,914 renewals were processed.

15,994 licenses were upgraded, reflecting a growth of **73.7%** over the past five years.

The number of nurse licensees who upgraded to a multistate license (MSL) continued to grow, as **8,842** licensed practical nurses (LPNs) and registered nurses (RNs) upgraded; this comprises **55.3%** of all upgrade licenses issued by MQA in FY 2023-24.

543 continuing education (CE) provider applications were received, and **541** CE provider applications were approved.

There were **23,671** licensed facilities and establishments in FY 2023-24.

MQA's Virtual Agent, ELI

Embracing innovation, MQA leads state agencies in harnessing artificial intelligence (AI) technology to better serve our community. MQA's Virtual Agent, ELI, has fielded 694,800 voice calls and 222,367 web chats, providing efficient and effective support to practitioners and the public alike.

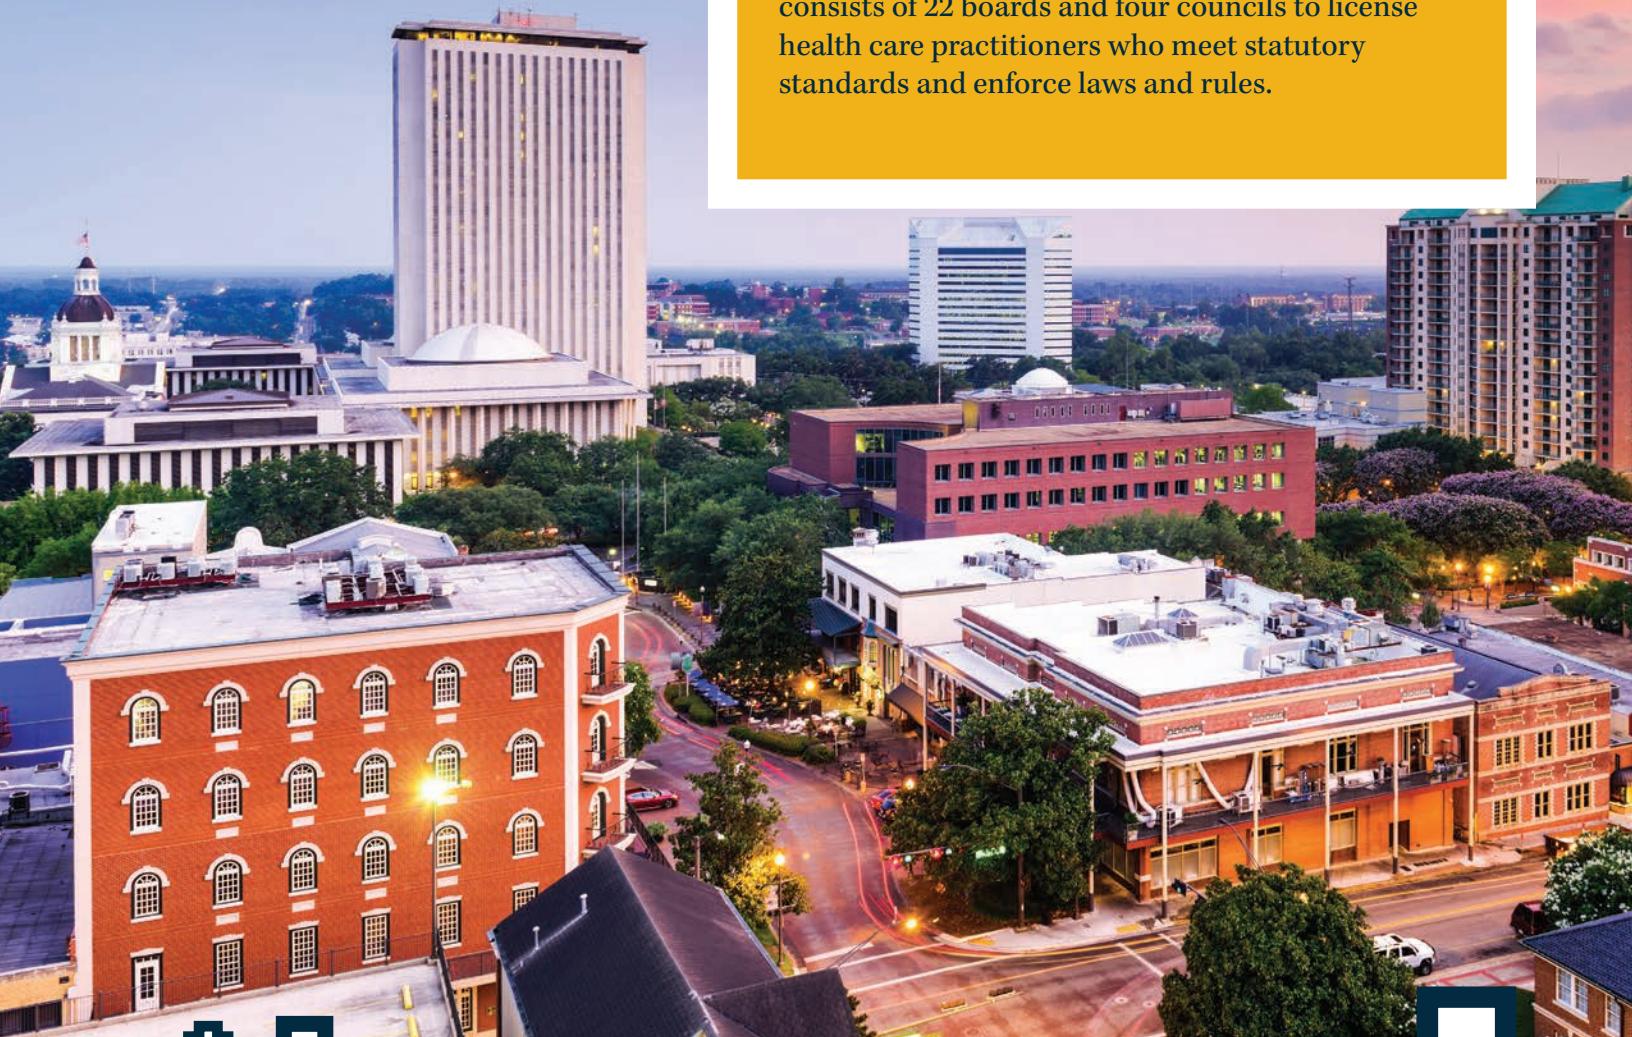

Understanding peak chat times and volumes allows the Department to optimize its workflow, reducing wait times and improving overall service quality for practitioners. The top five web chats at the end of quarter four were the Boards of Nursing, Medicine, Mental Health, Pharmacy, and Dentistry.

e-Licensing

MQA transitioned to electronic licenses (e-licenses) in 2023, replacing paper-based licenses. As of FY 2023-24, over 90% of licenses issued were e-licenses, which practitioners obtained through the MQA Online Services Portal within two business days of approval, free of charge, and seven to 10 days earlier than mailed versions.

Composition

At the heart of MQA lies three bureaus championing a safe working environment for health care practitioners and guaranteeing public health and welfare are upheld through its licensure, enforcement, and information activities. MQA consists of 22 boards and four councils to license health care practitioners who meet statutory standards and enforce laws and rules.

ABOUT MQA

Bureau of Enforcement

Acts as the compliance and investigative arm of MQA, where complaints about practitioners are received and investigated and violations and administrative actions are established according to Florida Statutes and rules. The 11 field offices throughout the state facilitate the investigations of complaints and inspections of health care facilities.

Bureau of Health Care Practitioner Regulation

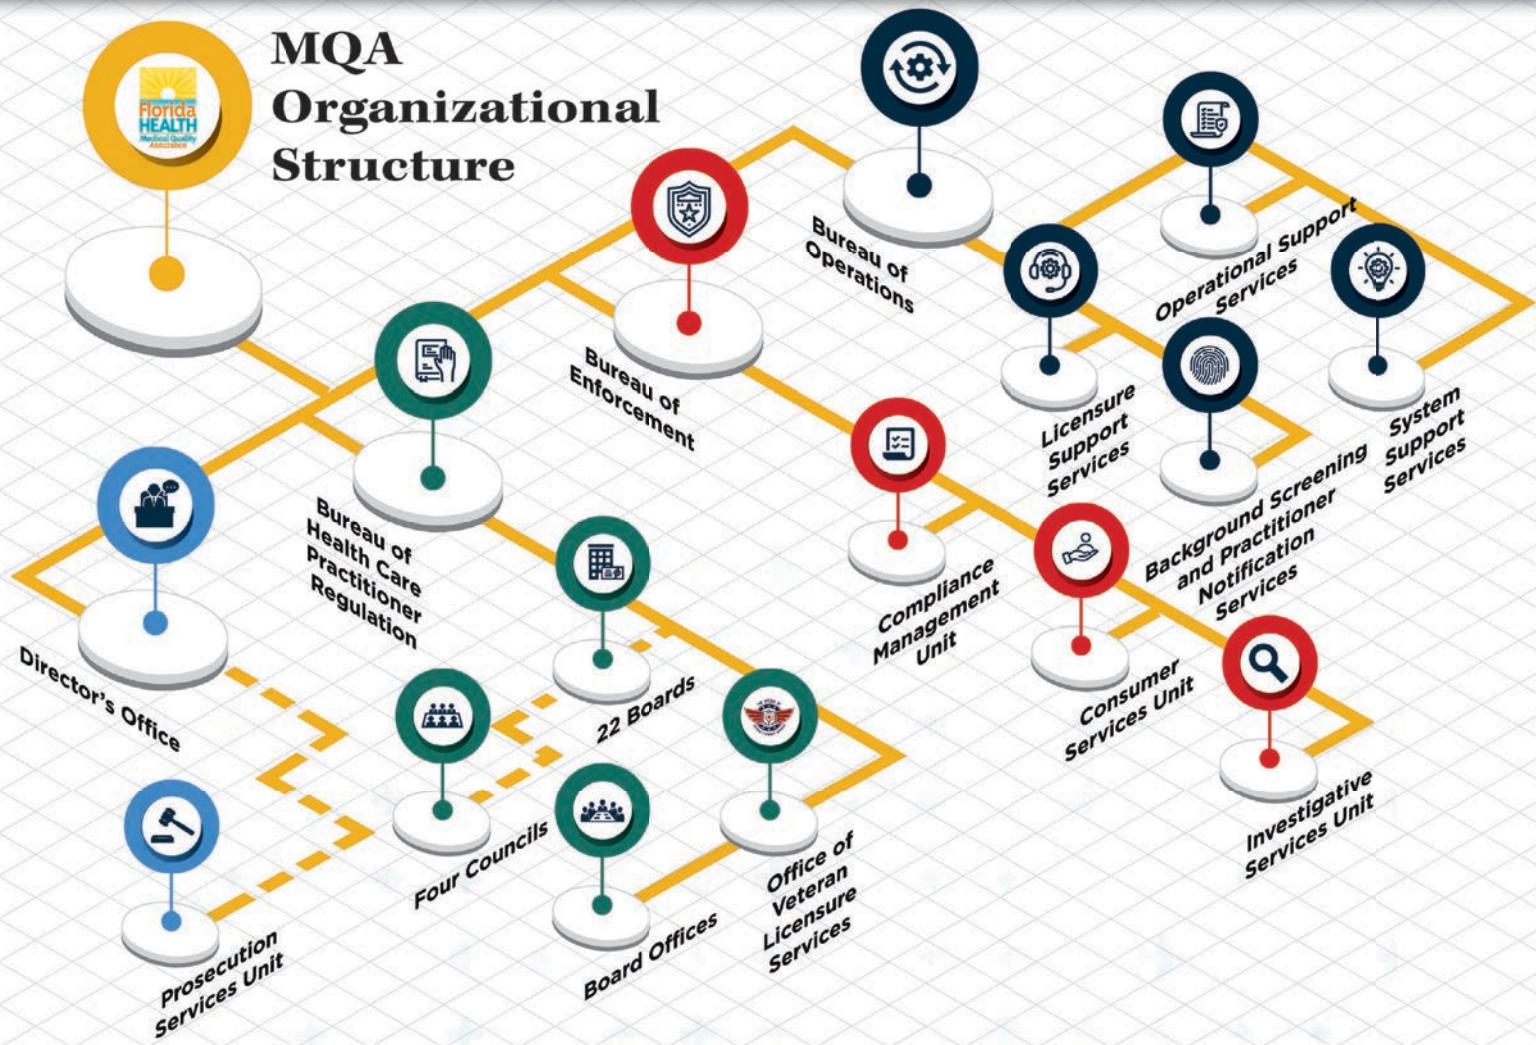

Consists of eight board offices that work with the 22 regulatory boards and four councils to implement rules into policy and advise on budget matters. Applications for licensure are reviewed, disciplinary hearings are conducted, and rules are promulgated in partnership with the boards and councils.

Bureau of Operations

Provides operational and infrastructure support to MQA and the boards and councils through the function of four main units. Key functions range from document, contract, asset, and database management to license maintenance and renewal, background screening services, and voice, email, and AI-powered customer contact.

Director's Office

Facilitates cross-functional processes so that resources and strategy are integrated, executed, and evaluated across MQA. Key functions include human resources, budget development, and strategic planning services.

BOARDS

Acupuncture

Athletic Trainers

Chiropractic Medicine

Clinical Laboratory Personnel

Clinical Social Work, Marriage and Family Therapy, and Mental Health Counseling

Dentistry

Hearing Aid Specialists

Massage Therapy

Medicine

Nursing

Nursing Home Administrators

Speech-Language Pathology and Audiology

COUNCILS

Dietetics and Nutrition Practice

Electrolysis

Licensed Midwifery

Physician Assistants

Boards and Councils

The composition of Florida's 22 boards and four councils varies but typically includes Governor-appointed members representing individual practitioners from the regulated profession, public members representing consumers, and other members from complementary professions.

Department Regulated Professions and Facilities

MQA inspects Department regulated facilities prior to opening, permitting and licensing, after receiving a change in ownership or location application, and routinely to ensure compliance and patient safety.

Professions

- + Certified Master Social Workers
- + Paramedics
- + Genetic Counselors
- + Radiologic Technologists
- + Emergency Medical Technicians
- + School Psychologists
- + Medical Physicists

Facilities

- + Dental Laboratories
- + Office Surgery Registrations
- + Dental Sedation Offices
- + Optical Establishments
- + Electrolysis Facilities
- + Pain Management Clinics
- + Massage Establishments
- + Pharmacies

Board or Council Appointment Interest?

If interested in an appointment to a health care regulatory board or council, complete the Gubernatorial Appointments Questionnaire at FLgov.com/Appointments for a board, or the Florida Department of Health Questionnaire at FL-Appointment.AzureWebsites.net for a council.

Program Areas

MQA's programmatic activities provide value by supporting regulatory work and ensuring that high standards of performance are maintained.

Prescription Drug Monitoring Program

The Prescription Drug Monitoring Program (PDMP), also known as E-FORCSE®, facilitates the collection, storage, maintenance, and analysis of controlled substance dispensing data reported by pharmacies and dispensing health care practitioners.

For more information about the PDMP, visit FLHealthSource.gov/FloridaTakeControl/PDMP.

Unlicensed Activity Program

The Unlicensed Activity (ULA) Program protects Florida residents and visitors from the potentially serious and dangerous consequences of receiving medical and health care services from an unlicensed person. MQA investigates and refers for prosecution all unlicensed health care activity complaints and allegations.

To learn more about the signs of unlicensed activity and the ULA Program, visit FLHealthSource.gov/ULA.

Office of Veteran Licensure Services

In 2023, Governor Ron DeSantis signed House Bill 139, establishing the Office of Veteran Licensure Services (OVLS) within MQA to assist veterans, active-duty military members, and their spouses with the health care licensure process.

In partnership with Veterans Florida, OVLS facilitates a referral program to assist veterans and their spouses with obtaining training, education, and employment in Florida's health care professions.

By implementing special fee waivers and expedited licensing, the Department can better support service members as they advance in their career, practice while stationed in their state, or settle in Florida after their service.

For more information about licensing for veterans, active-duty military members, and spouses, visit FLHealthSource.gov/OVLS.

LONG - + + + + RANGE + + + + POLICY + + + + PLANNING +

Purpose

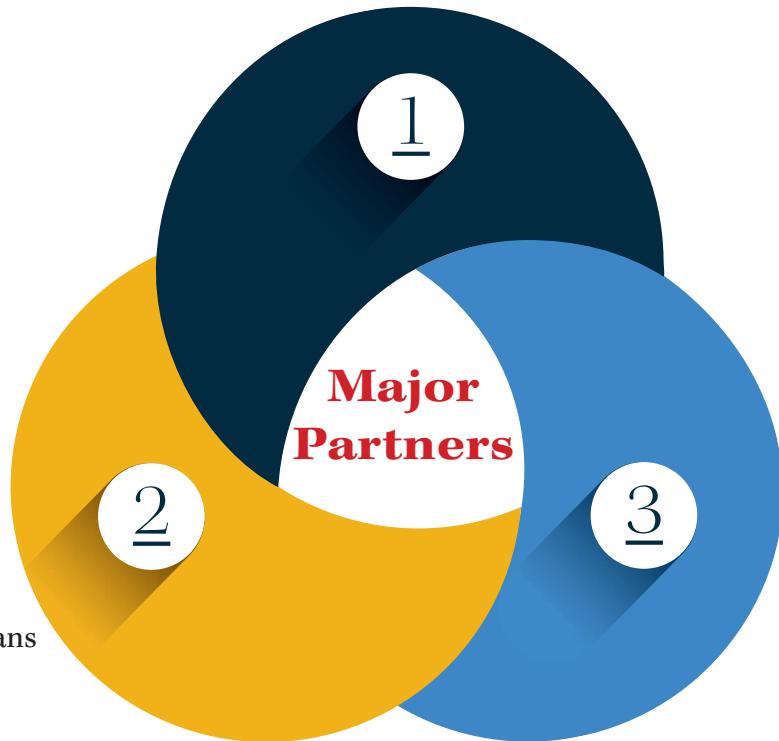

MQA plays a pivotal role in supporting Department goals and state priorities by developing and executing a long-range policy planning and monitoring framework. This ensures regulatory practices are both efficient and cost-effective, per section 456.005, Florida Statutes.

1. State

Agency for Health Care Administration
Agency for Persons with Disabilities
Bureau of Insurance Fraud
Department of Business and Professional Regulation
Department of Children and Families

Substance Abuse and Mental Health Services Administration

Strategic Goals

MQA supports the regulatory efficiency and health care workforce priorities of the state through timely, accessible, and accurate licensure, enforcement, and information activities for health care applicants, practitioners, and consumers in partnership with its 22 regulatory boards and four councils.

PRIORITY AREA: Regulatory efficiency

GOAL: Establish a regulatory structure that supports the state's strategic priorities related to global competitiveness and economic growth.

Reduce the Average Time* to Issue an Initial License to a Qualified Health Care Practitioner

FY 18-19	FY 19-20	FY 20-21	FY 21-22	FY 22-23	FY 23-24	CHANGE
57.76	51.18	50.64	47.4	50.21	47.3	↓ 18.11%

Decrease the Average Time* to Register Out-of-State Telehealth Health Care Practitioners

FY 18-19	FY 19-20	FY 20-21	FY 21-22	FY 22-23	FY 23-24	CHANGE
30.0	20.0	20.5	15.0	21.5	23.4	↓ 22.0%

Reduce the Average Time* to Issue an Initial License to a Health Care Facility

FY 18-19	FY 19-20	FY 20-21	FY 21-22	FY 22-23	FY 23-24	CHANGE
44.67	50.13	40.45	43.31	44.88	41.28	↓ 7.59%

MQA continued these efforts during FY 2023-24 while updating its strategies, goals, and objectives for the new reporting period. MQA gathered and analyzed information about internal and external factors that could impact its ability to achieve objectives, providing a clear understanding of the regulatory context in order to begin developing strategies that leverage strengths and opportunities while addressing and mitigating challenges.

* Time is referred to as average number of business days.

The Changing Landscape of Health Care Regulation

The Florida health care regulatory landscape has evolved rapidly over the past five years, where even the most seasoned MQA employees have been shaped by its trends. From the expansion of telehealth to the advancement of technology, a new era in health care oversight has unfolded.

Telehealth Expansion and Regulation

In Florida, significant legislation specifically allowing telehealth was enacted in 2019. The regulation, known as the “Florida Telehealth Act,” was signed into law on July 1, 2019. The year of 2020 accelerated the adoption of telehealth services, leading to rapid changes in health care regulations to accommodate this shift. Since then, telehealth regulations have been refined to ensure patient safety, privacy, and equitable access while integrating services like virtual consultations and remote monitoring. This legislation was a significant step in safety facilitating the expansion of telehealth services in Florida, reflecting a broader national trend towards integrating telehealth into mainstream health care delivery systems.

1

Advanced Technological Impact

The impact of advanced technology on health care regulation has been profound and multifaceted, fundamentally altering how health care is delivered, monitored, and regulated. Florida spotlighted AI during the 2024 legislative session as lawmakers in the Senate sought to draft regulatory adjustments through Senate Bill 972. While not passed, the bill’s introduction represents a pivotal moment in health care as it highlighted the growing recognition of AI’s impact on the delivery of health care and Florida’s strong commitment to ensuring accountability, transparency, and equity in AI-driven diagnostics and treatment protocols.

Despite its pending oversight and integration into health care service delivery, MQA has notably innovated Florida’s health care regulatory framework to include the introduction and continual expansion of AI through its Virtual Agent, ELI. Combining data and efficient workflows on conversational web, voice, and SMS platforms, ELI offers customers additional ways to contact MQA and provides actionable recommendations and tailored responses to customer inquiries around the clock. ELI remains the best way customers can learn about licensure requirements, initial application status, renewal requirements, fees, address updates, background screening processes, public records requests, and more. To learn more about how applicants, practitioners, and consumer are using ELI, visit FLHealthSource.gov/ELI.

2

In 2023, MQA also issued its first round of e-licenses to health care practitioners, reflecting a shift from printing and mailing paper-based licenses. For each profession regulated by MQA, the transition to paperless licensing means seamlessly retrieving licensing through the MQA Online Services Portal within two business days of an approved application. As a result of implementing e-licensing in Florida, MQA expedited licensure and verification processes so that health care practitioners can get to work quickly and continue working through successful renewal cycles without interruption. To learn more, visit MQA’s e-licensing webpage (FLHealthSource.gov/electronic-licensing) or ask MQA’s Virtual Agent, ELI.

“ELI doesn’t just keep pace with technological progress; it establishes new standards in health care regulation.” – **MQA Manager**

Enhanced Licensure Mobility

The transformation of the landscape of health care regulation over the last five years has been marked by the notable rise in licensure mobility initiatives across the nation. This trend, propelled by the imperative to enhance access to care, streamline administrative burdens, and address workforce shortages, has involved the emergence and expansion of various mechanisms facilitating the movement of health care practitioners across jurisdictions:

- At the forefront of this movement is the concept of universal licensing, which aims to remove barriers for health care practitioners seeking to practice in multiple states. With universal licensing, a health care license obtained in one jurisdiction is universally recognized, eliminating the need for redundant licensure processes. Florida is adopting universal licensing as a result of Senate Bill 1600 Interstate Mobility (2024), which streamlines the process of health care practitioners and enhances access to care across the state.
- In response to workforce shortages, the issuance of limited licenses as provisional licenses emerged as a vital tool that empowers health care practitioners to swiftly address critical needs in jurisdictions where they are not permanently licensed. Limited licenses serve as a rapid-response mechanism often due to the fewer requirements compared to standard licensure procedures, ensuring timely access to essential care. In Florida, practitioners of some professions, like medicine and dentistry, may leverage limited licenses to work in underserved areas, ensuring that all Floridians can quickly receive essential health care services.
- Licensure compacts represent a visionary approach to standardizing licensure requirements and fostering mobility across multiple states. These compacts, exemplified by initiatives like the NLC, establish uniform standards for licensure, education, and practice, enabling practitioners to obtain licenses valid in multiple compact member states. Licensure compacts promote consistency, efficiency, and reciprocity, propelling forward the agenda of licensure mobility in health care regulation. See Table 1A for a deeper look at licensure mobility in Florida, including licensure compacts statistics.

3

This bill modified several aspects of health care practitioner regulation, including broadening the range of services certain health care practitioners can provide and revising requirements for telehealth services.

This bill addressed the growing need for genetic counseling services by establishing genetic counselors as a new licensed profession and outlining criteria for their initial licensure, annual renewal, and CE.

This bill authorizes Florida to join the Interstate Compact for Licensed Professional Counselors, also known as the Counseling Compact, which facilitates the practice of licensed professional counseling across state lines and helps provide in-person and telehealth services to patients in other compact member states.

2020: SB 1676

2021: SB 1770

2022: HB 1521

A DEEPER LOOK AT LICENSURE COMPACTS IN FLORIDA

In 2016, Florida joined the NLC, allowing nurses with MSLs to practice in other compact member states without obtaining additional licenses.

Florida joined the Counseling Compact in 2022, to facilitate the interstate practice of licensed professional counselors.

In 2023, Florida joined the Psychology Interjurisdictional Compact (PSYPACT), which enables licensed psychologists to provide telepsychology and temporary in-person services across state lines in participating compact states, enhancing access to mental health care.

Florida became involved in the following two compacts due to the passage of Senate Bill 7016 Health Care (2024): Interstate Medical Licensure Compact (IMLC) and the Audiology and Speech-Language Pathology Interstate Compact (ASLP-IC). The bill also created four additional medical licensure pathways, including one for Graduate Assistant Physicians (GAPs). For more information on bills impacting the various health care professions, visit FLHealthSource.gov/2024-bills/.

This bill authorized Florida to join the PSYPACT, enhancing consumers' access to psychological services and facilitating the practice of telepsychology and temporary in-person psychology across state boundaries. As a compact member state, eligible Florida-licensed psychologists can apply to PSYPACT for authorization to practice telepsychology or temporary in-person practice of psychology across state boundaries by obtaining an EPassport or an Interjurisdictional Practice Certificate.

This bill expanded the Florida Reimbursement for Medical Education (FRAME) Program and created a limited licensure pathway for GAPs to address health care workforce shortages in Florida.

This bill was part of a broader legislative effort to improve health care access and quality in Florida as it aimed to enhance interstate mobility for health care practitioners in Florida through the creation of the Mobile Opportunity by Interstate Licensure Endorsement Act (MOBILE) Act. The bill established a new universal process and criteria for licensure by endorsement for MQA-regulated health care professions, which helps address the growing demand for health care services by facilitating the relocation and practice of experienced practitioners from other states.

2023: HB 33

2024: SB 7016

2024: SB 1600

Annual Performance Results

Licensure

Over the past decade, Florida's health care licensee population more than doubled the state's overall population growth, increasing by 36.43% compared to 17.45%. This increase underscores the growing role of health care practitioners in Florida's demographic makeup.

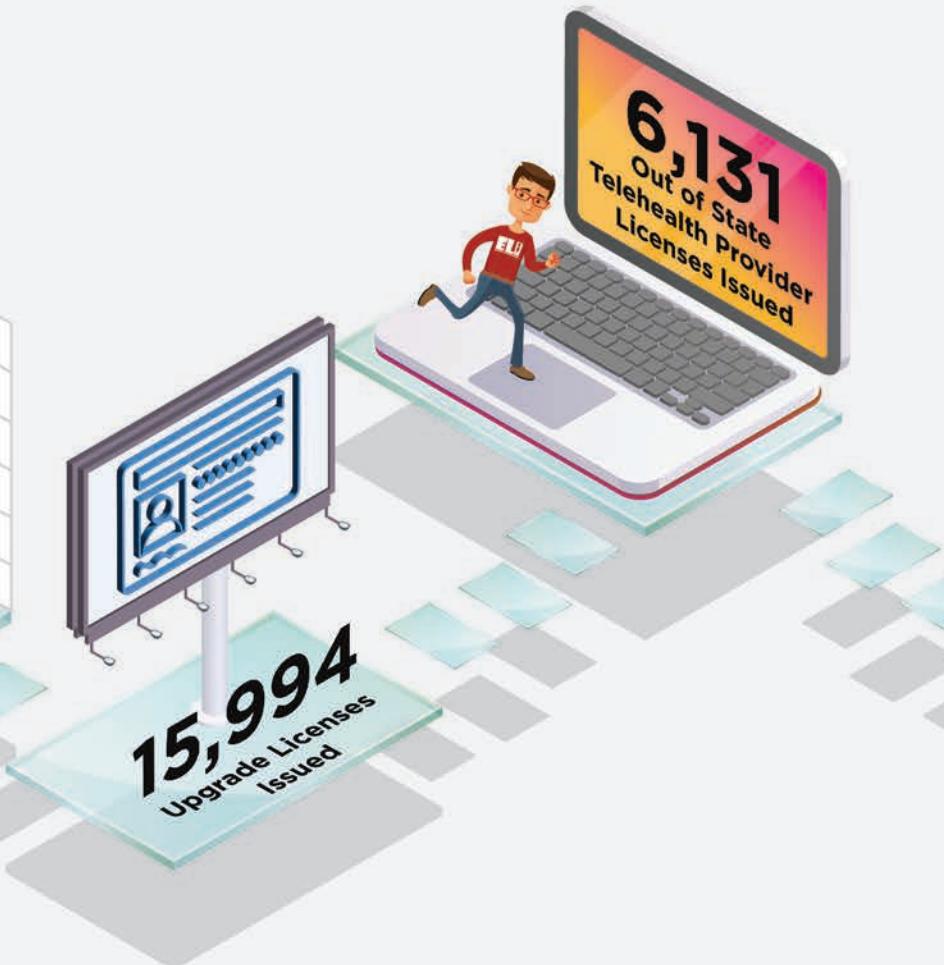

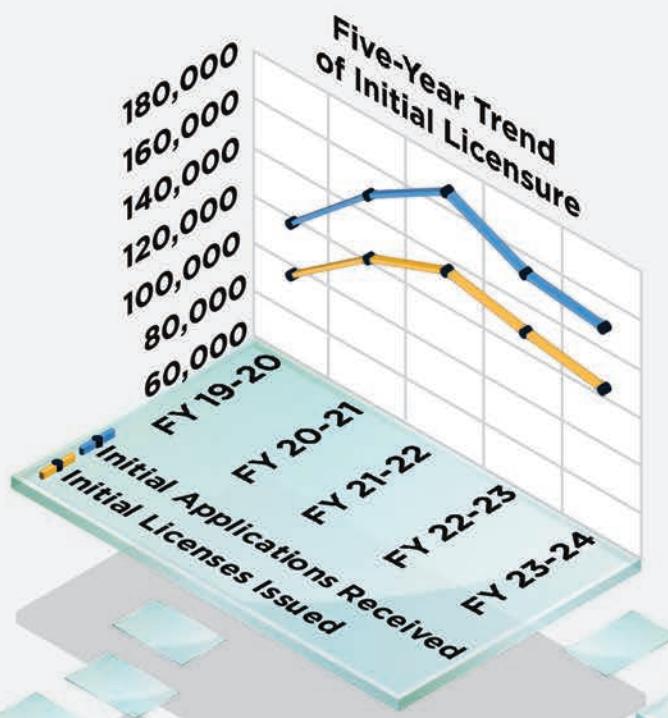

Florida's licensee population constitutes 6.78% of the state's overall total population (1,537,549 of 22,685,583), underscoring the effectiveness of the Department's initiatives and the growing interest in health care licensure. Registered nurses comprise 27.55% of the total number of licensed practitioners, while the broader nursing profession constitutes 48.64% of Florida's licensees.

This year, MQA received 149,195 initial applications and approved 123,187 initial licenses, the approval rate of which slightly increased between FY 2022-23 (84%) and FY 2023-24 (86%).

Over the last five years, the number of licenses issued to out-of-state telehealth providers more than tripled, skyrocketing by 222.51%. Specifically, the number of initial licenses granted to out-of-state telehealth providers rose from 1,901 in FY 2019-20 to 6,131 in FY 2023-24.

Did You Know ?

To avoid delays in the licensure process, health care applicants should ensure that all required components are submitted promptly, including Livescan results, criminal and discipline history records, license verifications, transcripts, and timely completion of exams.

The fastest growing license types, determined by average growth since FY 2018-19, include provisional marriage and family therapists (154.21%), out of state telehealth providers (109.28%), and provisional clinical social workers (43.53%).

The total number of renewals processed in FY 2023-24 was 514,914, which is 11.97% more than were processed in FY 2018-19. Of those processed, 98.69% were processed online.

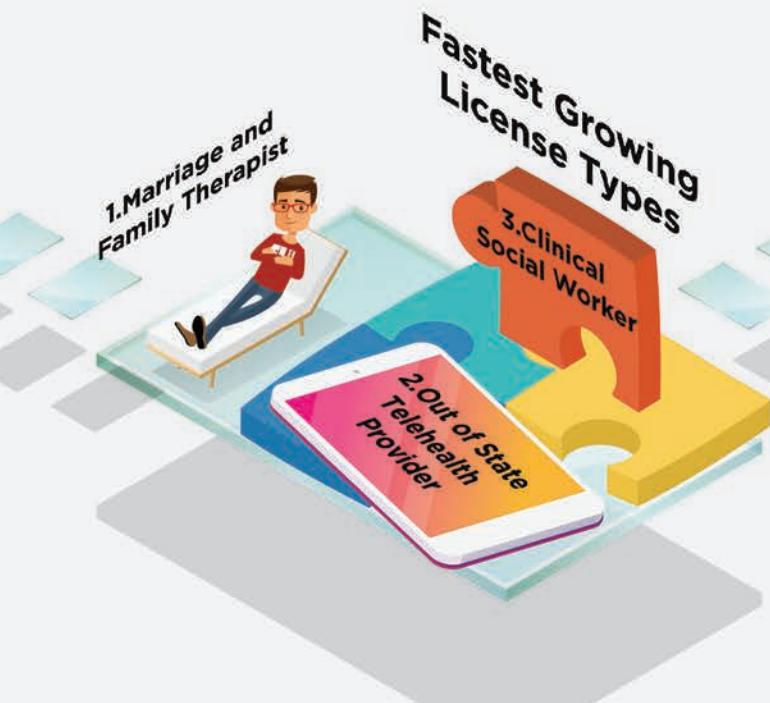

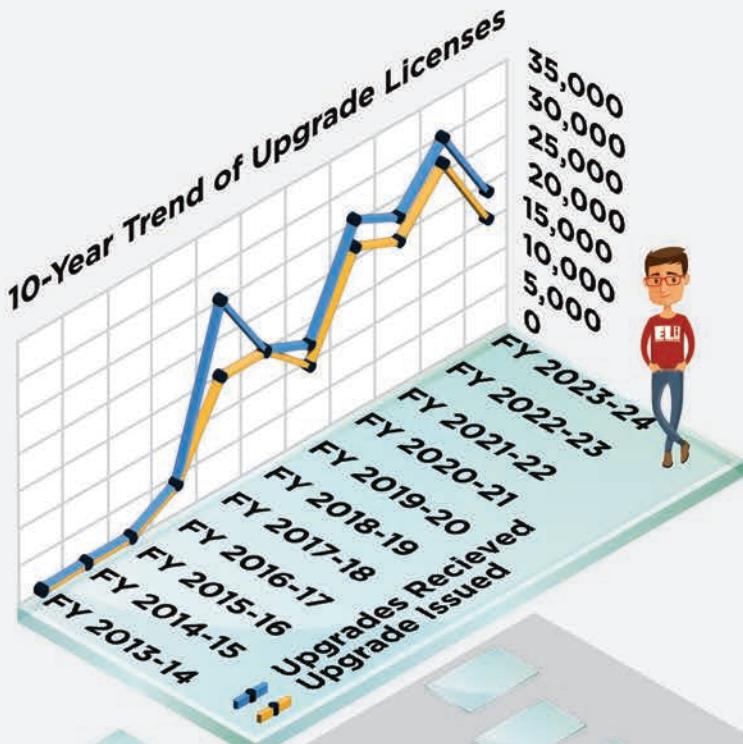

Generally, renewals are processed by the Department by even and odd years according to the size of the profession, and to facilitate timely processing by board offices. Visit FloridaHealth.gov/licensing-and-regulation/boards-and-councils to learn more about when different professions renew.

To learn more about military data and the evolution of the military licensure pathways in Florida, visit FLHealthSource.gov/OVLS or scan the QR Code.

A total of 543 CE provider applications were received this fiscal year, 541 of which were approved. Visit FloridaHealth.gov/licensing-and-regulation/ce.html for more information regarding CE.

Health care practitioners may upgrade their licenses for a variety of reasons, including to further education and professional advancement, which enables practitioners to stay current with evolving medical standards and practices and offer better care to patients. MQA issued about 25 times more upgrade licenses in FY 2023-24 than it did a decade ago, starting with 629 upgrade licenses and surging to 15,994 by FY 2023-24.

The increase in the number of nurse MSLs issued over time has contributed to the overall rise in upgrade licenses issued, as 55.48% (or 8,842) of the total number of upgrade licenses issued in FY 2023-24 were nurse MSLs.

In FY 2019-20, there were 23,360 licensed facilities and establishments. By FY 2023-24, this number had grown to 23,671, representing a modest increase of 1.33% since FY 19-20.

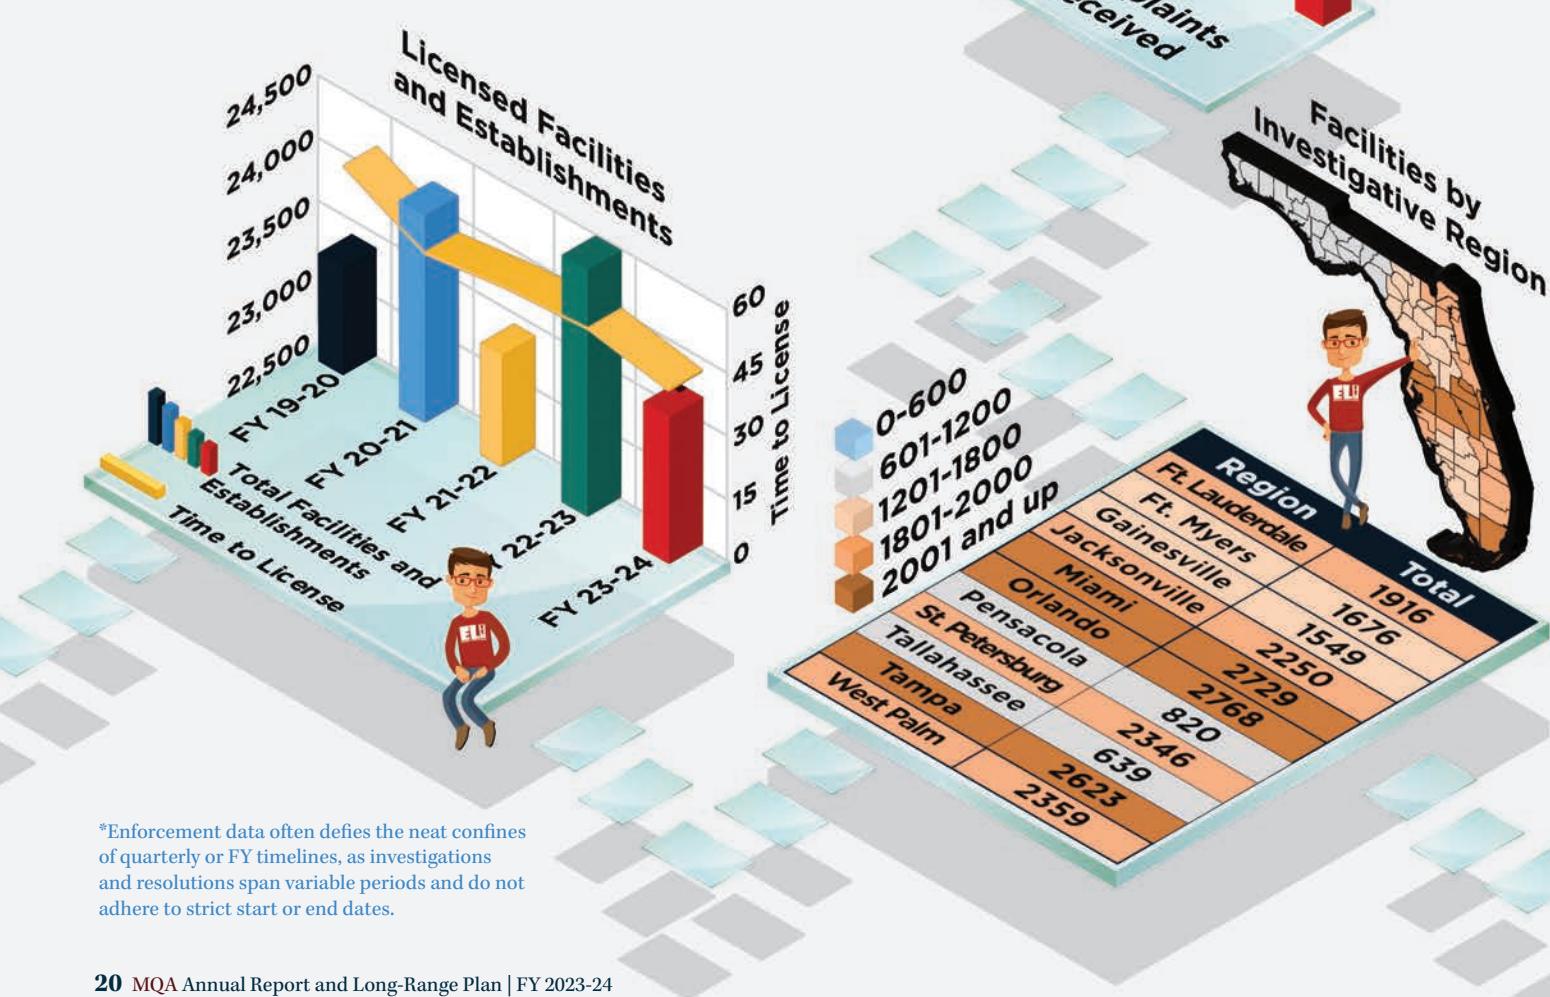

From FY 2019-20 to FY 2023-24, the average time to license a facility was 44 days. This trend indicates a 4.16% decrease in the processing time since FY 2018-19, reflecting MQA's efficiency and adjustments in licensing procedures.

Enforcement*

In FY 2023-24, the number of complaints rose to 50,130, representing a 17.13% increase since FY 2019-20. This rise in complaints aligns with a 3.44%

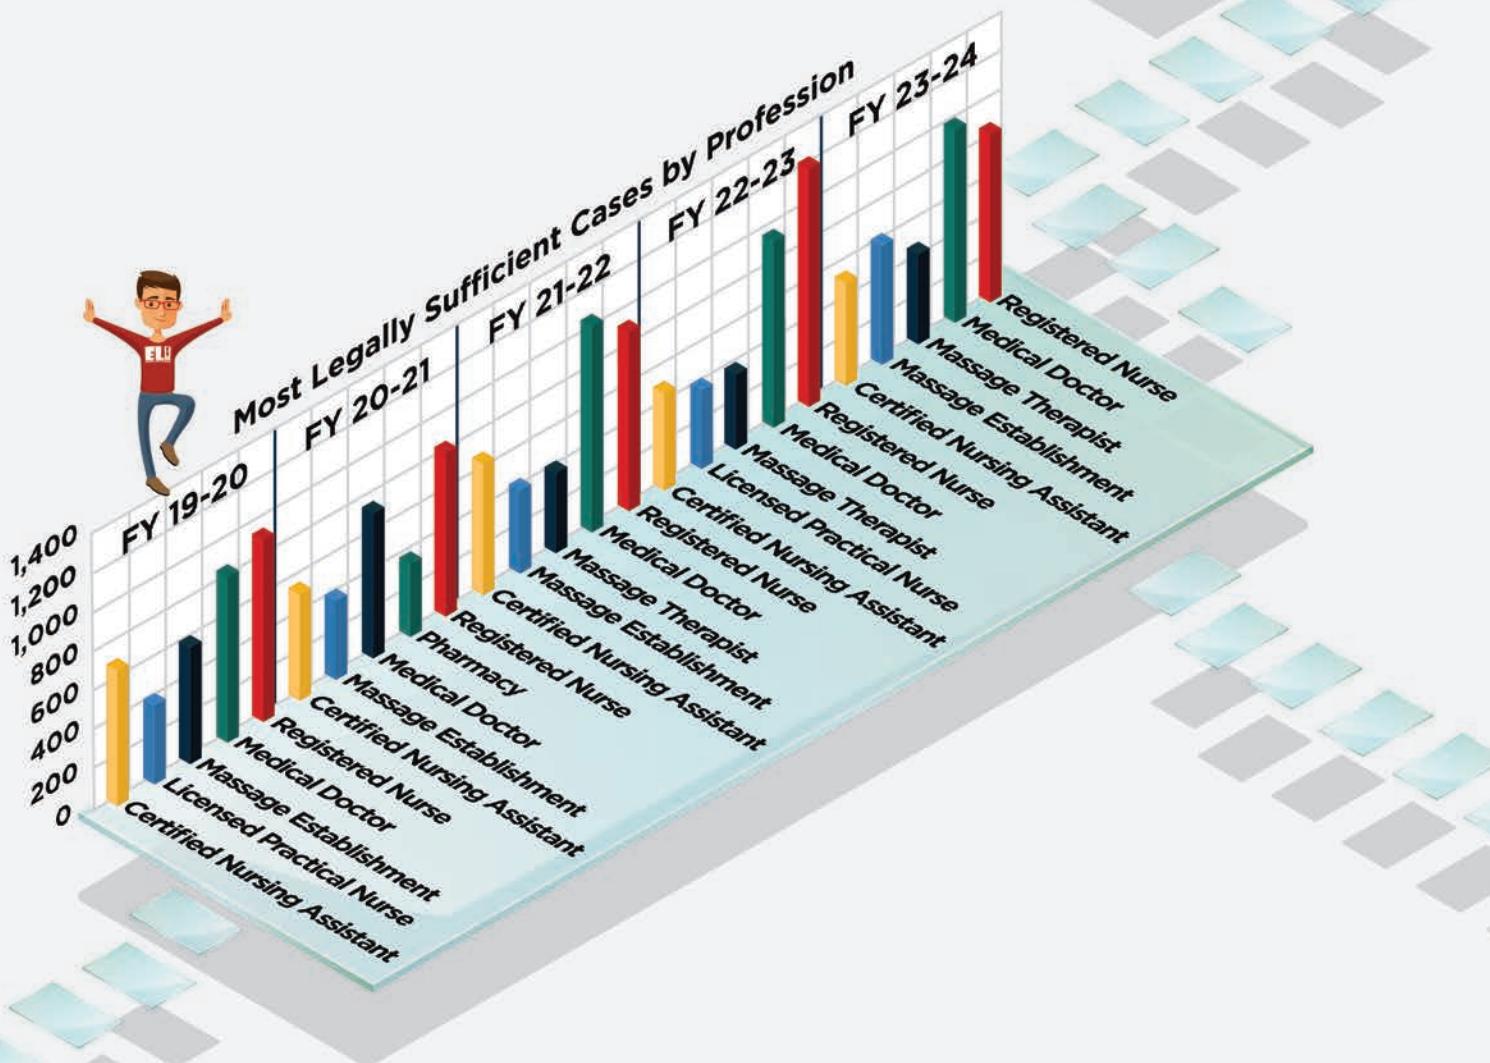

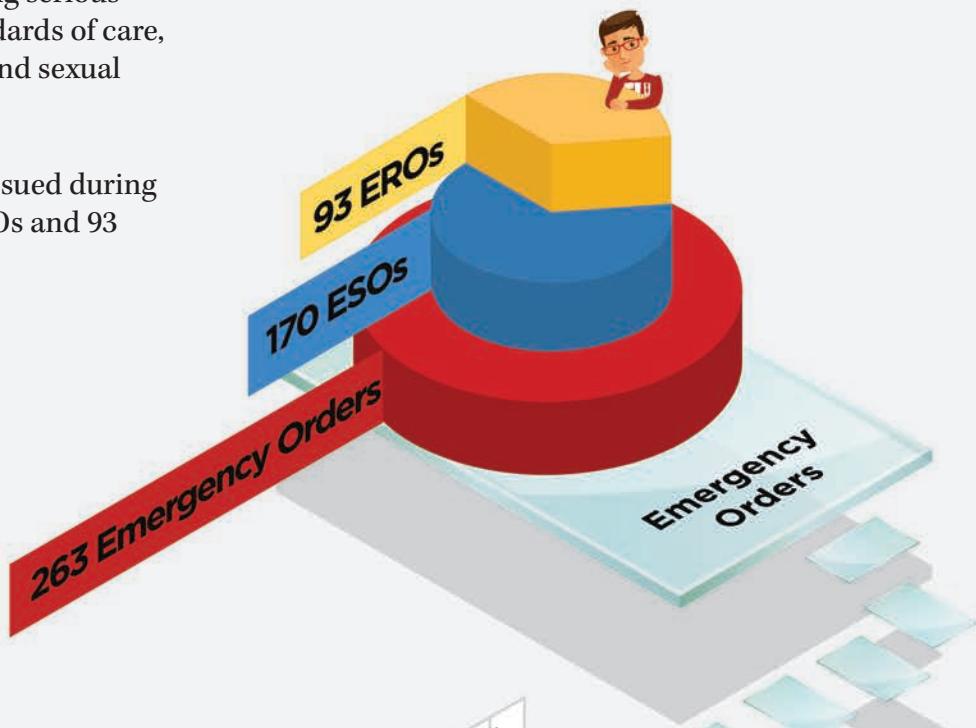

growth in the total number of licensees, suggesting a potential link between the increase in licensees and the volume of complaints.

The emergency action process is applicable to any licensed Florida health care practitioner who poses an immediate danger to public health, safety, or welfare, in accordance with sections 456.073(8) and 120.60(6), Florida Statutes.

If an act by a licensee constitutes an immediate serious danger to the public, then emergency action can be taken under the Practice Acts or the Department's regulations for committing serious crimes, egregious violations of the standards of care, drug use/impairment, drug diversion, and sexual misconduct.

A total of 263 Emergency Orders were issued during FY 2023-24, with 170 (64.64%) being ESOs and 93 (35.36%) being EROs.

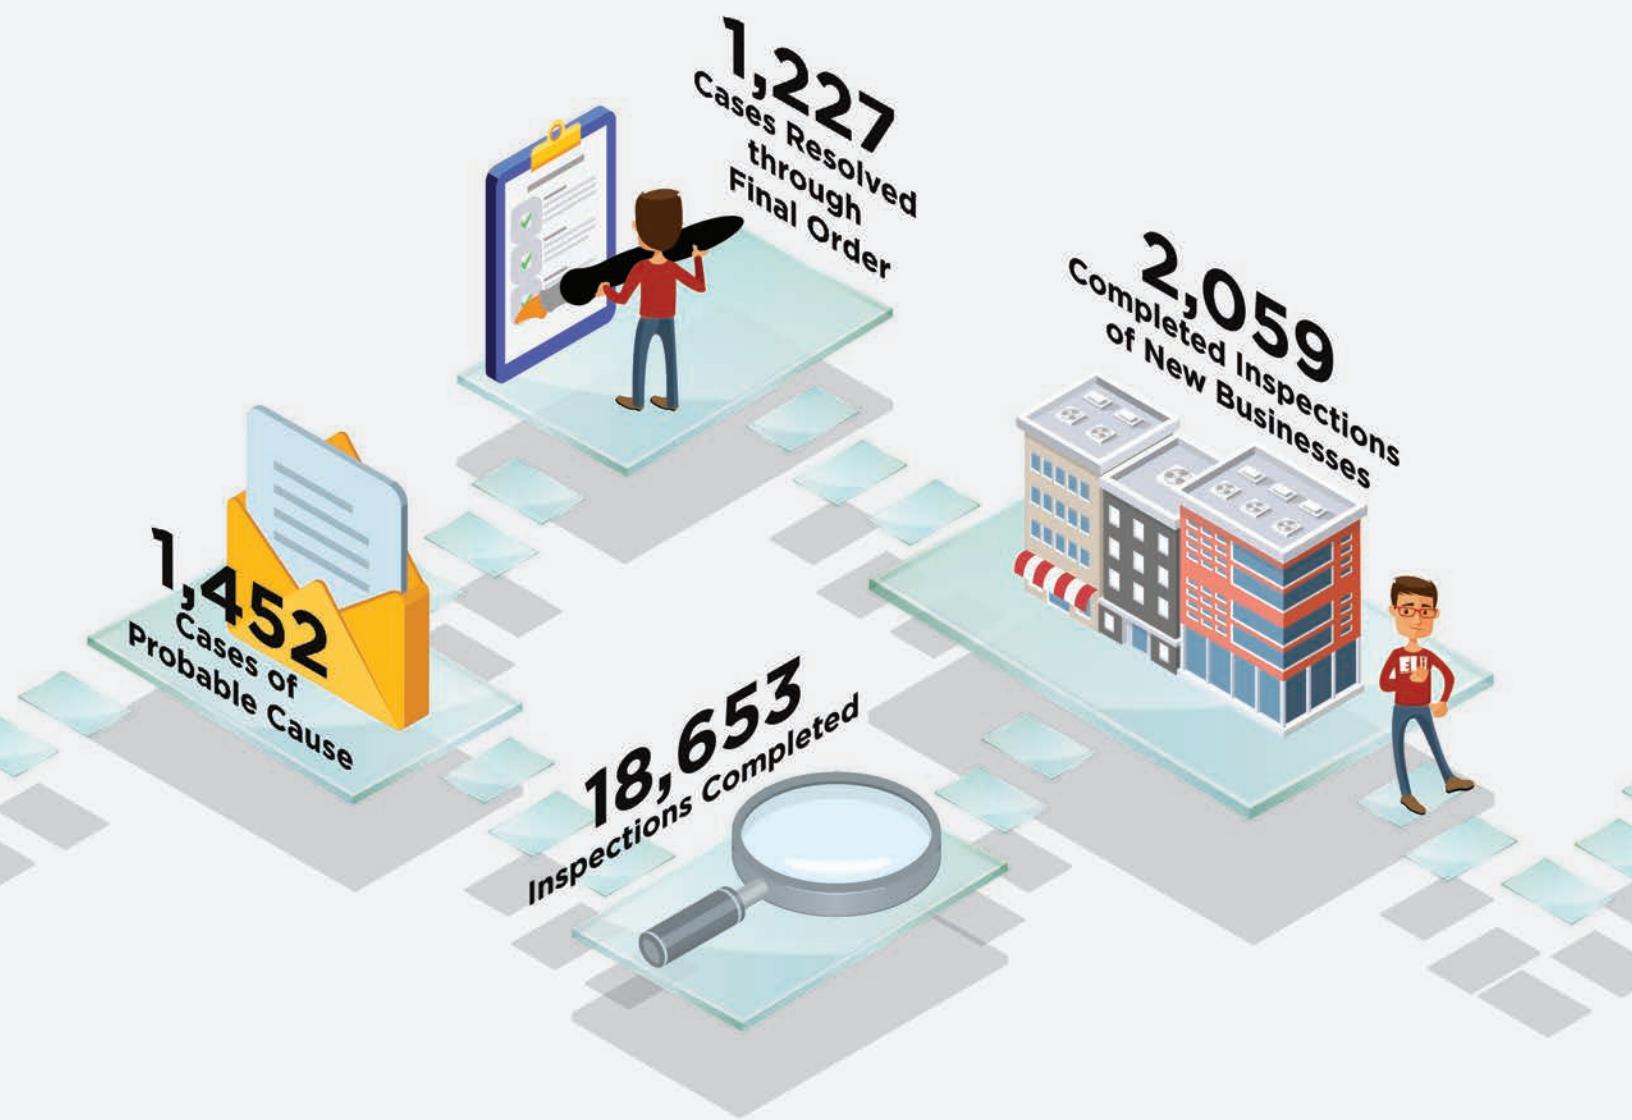

In FY 2023-24, 1,452 cases of probable cause were reported, continuing a 8.04% decline since FY 2019-20. Meanwhile, 3,291 cases of no probable cause cases were reported, declining 13.1% over the same period. Together, these trends reflect a positive shift towards greater accountability and efficiency within the MQA regulatory framework, ultimately enhancing the integrity of health care professions and safeguarding public trust.

In FY 2023-24, 1,227 cases were resolved through final order. Cases resolved through final order have been decreasing at 8.71% since FY 2019-20.

Inspections and ULA Activity

Over the past five years, the rate of inspections has grown substantially by 19.71%, culminating in the completion of 18,653 inspections of health care facilities and establishments by MQA during FY 2023-24.

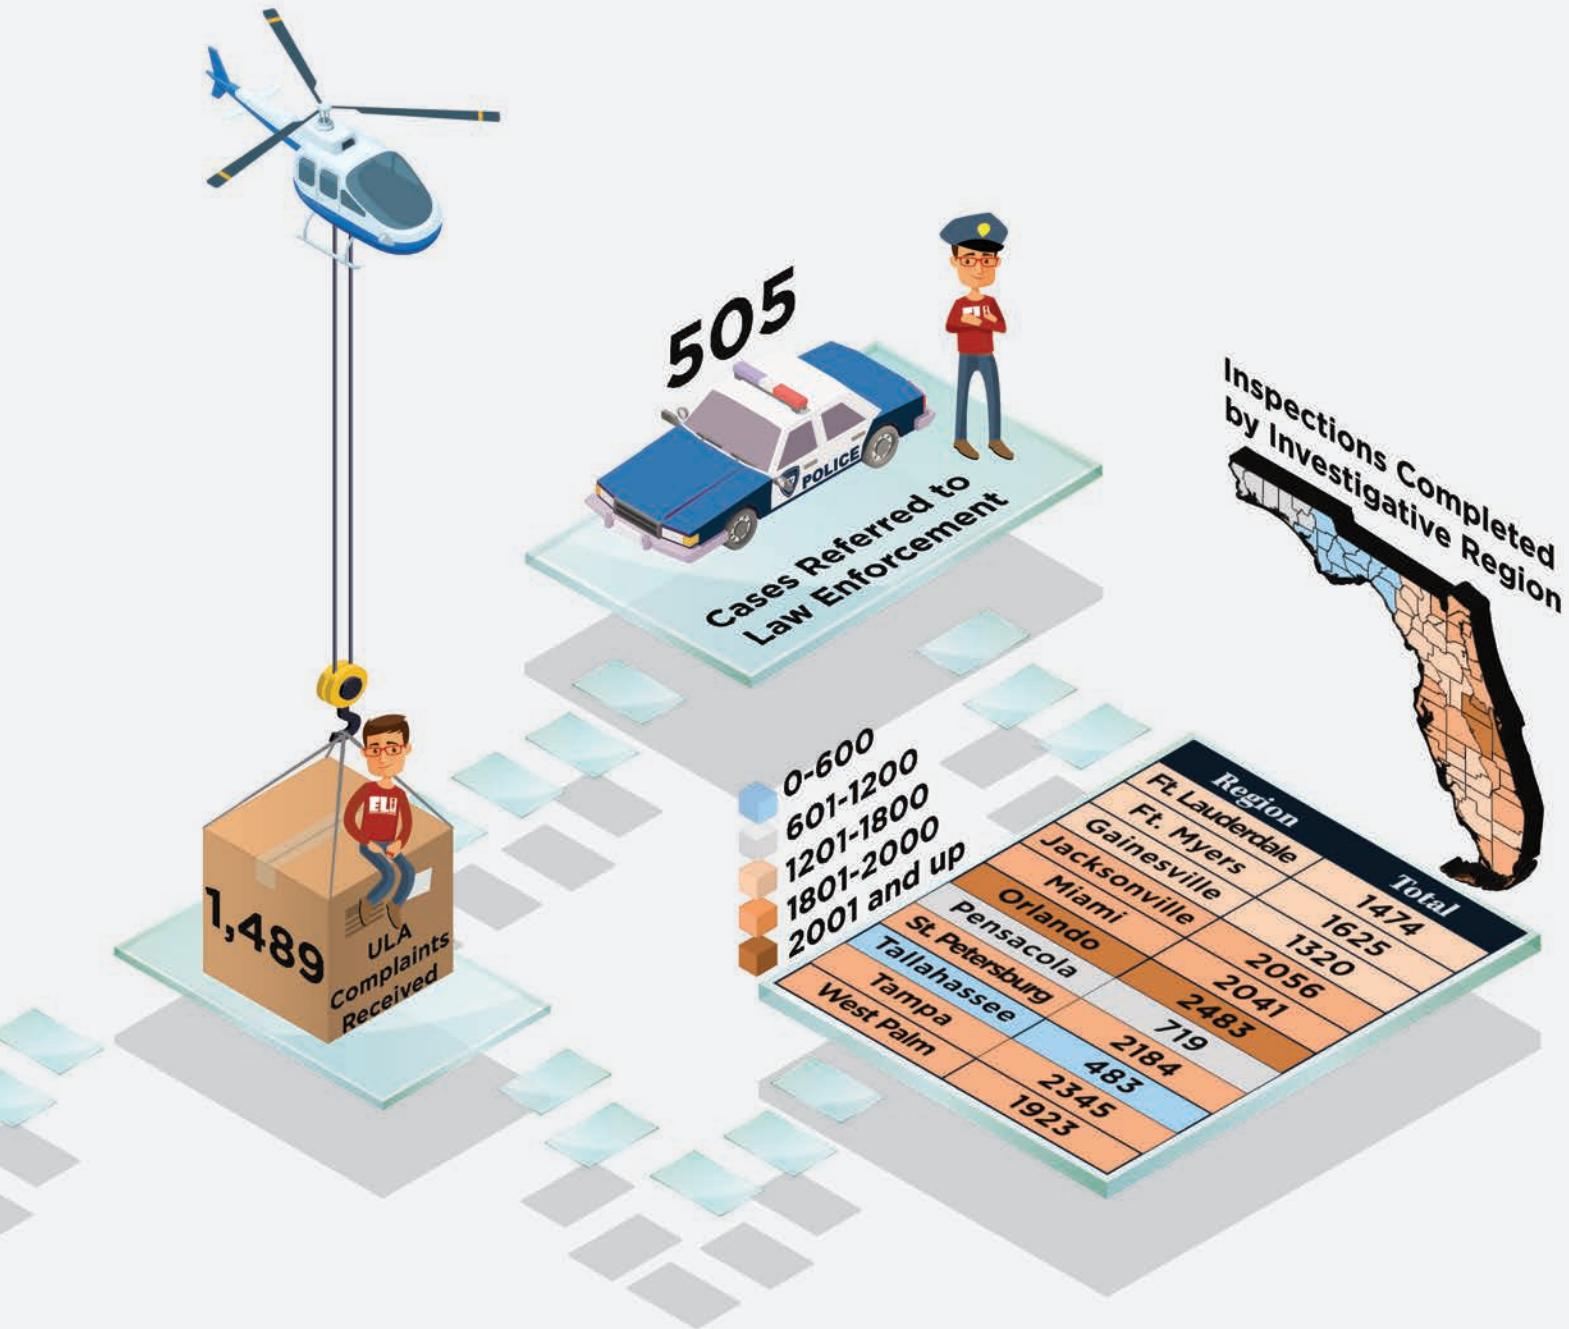

Of the health care facilities and establishments inspected, 13,140 were routine, ensuring ongoing compliance and safety across established businesses, and 2,059 were conducted for new businesses, reflecting a vibrant and expanding industry.

Meanwhile, 565 inspections were completed due to a change in location. The increase in inspections for new businesses and location changes underscores our role in supporting growth and transition, ensuring that every step is monitored for quality and compliance.

During FY 2023-24, the Department received 1,489 ULA complaints and 1,380 ULA cases were referred for investigation, reflecting MQA's commitment to thoroughly examining complaints. Of these, 1,380 cases were referred for investigation, reflecting MQA's unwavering commitment to thoroughly examining each complaint.

MQA's proactive measures lead to the issuance of 505 cease-and-desist orders, swiftly addressing and halting potentially harmful activities. Additionally, 528 cases were referred to law enforcement, demonstrating MQA's dedication to collaborating with authorities to uphold public safety and integrity.

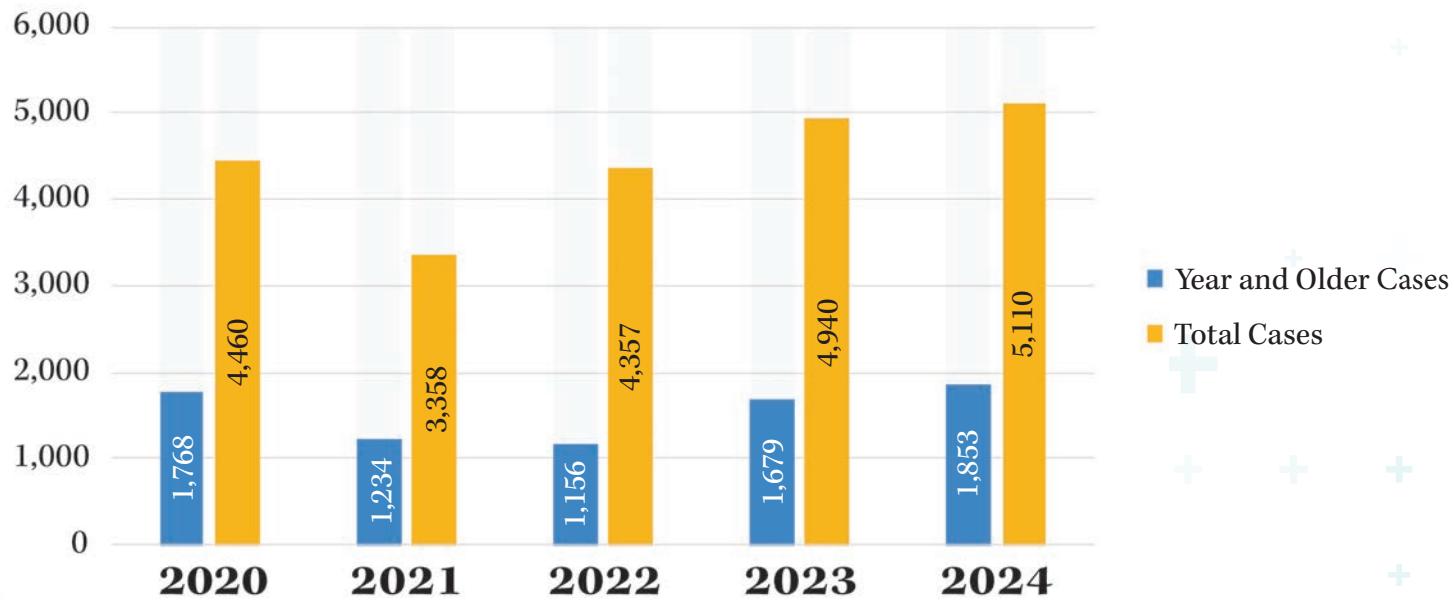

Reduction of Year-Old Cases

The Prosecution Services Unit's (PSU) workload was largely determined in FY 2023-24 by the influx of legally sufficient complaints received by the Department. While one PSU attorney typically manages between 70-90 cases, each attorney handled an average of 150 cases at various stages of litigation while PSU processed over 5,000 new complaints this year.

Despite this surge, the number of cases over one year old increased only slightly to 1,853 (8%) compared to last fiscal year's 31% increase. The total case inventory also grew by 170 cases (3%), revealing PSU's ability to effectively balance prosecuting new cases while processing older ones as 91% (1,691) of the year-and-older cases were received in 2021 or later. Notably, the inventory of cases received before 2021 shrunk by 50%, from 332 to 164, in the last fiscal year. Of these cases, approximately 16% (27) were resolved through referral to the Division of Administrative Hearings (DOAH) for formal hearings.

While a significant portion of the year-and-older cases are awaiting referral to DOAH for final hearings, DOAH has recently implemented Alternative Dispute Resolution (ADR) to help parties reach amicable resolutions without formal hearings. ADR has proven to be an effective tool for PSU, resolving the majority of referred cases before they reach formal hearings.

Total Cases Compared to Year and Older Cases

Disciplinary Guidelines

MQA, in partnership with the boards and councils, reviews disciplinary guidelines for compliance with the legislative intent set forth in section 456.079, Florida Statutes. This report outlines the development and implementation status of rules which provide disciplinary guidelines.

BOARD OR COUNCIL	Rule Number	Description	Rule Development Published	Notice Published	Adopted	Effective
Acupuncture	64B1-9.001	Disciplinary Guidelines	07/09/2021	07/26/2021	09/02/2021	09/22/2021

Table 1: Summary of Licensed Practitioners

Over 1.5 million health care practitioners were licensed by the end of FY 2023-24, which is a 2.3% increase from the previous year. This growth reflects the Department's ongoing commitment to enhancing technology and streamlining licensure processes, enabling practitioners to enter the workforce more efficiently and effectively. The Department remains dedicated to continuous improvement, ensuring that the licensing experience is as seamless and swift as possible and supporting the vital role health care practitioners play in Florida communities.

- IN-STATE ACTIVE - Total number of in state practitioners in active status for the correlating profession as of the end of the FY.
- IN-STATE DELINQUENT - Total number of in state practitioners in a delinquent status for the correlating profession at the end of the FY.
- IN-STATE INACTIVE - Total number of in state practitioners in an inactive status for the correlating profession as of the end of the FY.
- MILITARY ACTIVE - Total number of practitioners in a military status for the correlating profession as of the end of the FY.
- OUT-OF-STATE ACTIVE - Total number of out of state practitioners in an active status for the correlating profession as of the end of the FY.
- OUT-OF-STATE INACTIVE - Total number of out of state practitioners in an inactive status for the correlating profession as of the end of the FY.
- OUT-OF-STATE DELINQUENT - Total number of out of state practitioners in a delinquent status for the correlating profession as of the end of the FY.
- PROFESSION - Description that identifies the specific profession.
- RETIRED - Total number of practitioners in a retired status for the correlating profession as of the end of the FY.
- TOTAL - Total number of practitioners in a renewable status for the correlating profession as of the end of the FY.

Table 1A: Licensure Compact Statistics

A medical licensure compact is a multijurisdictional licensing model best known for its agreement among states to mutually recognize each other's medical licenses, which allows health care practitioners to practice across state lines without having to obtain separate licenses in each state. Florida participates in licensure compacts to improve licensure mobility for health care practitioners and increase consumers' access to health care services.

Florida joined the NLC upon the passage of House Bill 1061 during the 2016 regular legislative session and PSYPACT in 2023. While the NLC allows registered nurses and licensed practical nurses who hold licensure in one compact state to practice in any of the other compact states without having to obtain additional licenses, the PSYPACT allows for the purchase of permissions which authorize psychologists to practice telepsychology with the APIT credential and temporary in-person practice with the TAP credential.

A nurse with a MSL must adhere to the laws and regulations of the state in which he or she is practicing, and a PSYPACT psychologist must ensure he or she meets and adheres to the standards set by PSYPACT when purchasing additional privileges.

Florida was also authorized to join the ASLP-IC and IMLC upon the passage of Senate Bill 7016 following the 2024 legislative session, as well as the Counseling Compact upon the passage of House Bill 1521 in 2022. Florida will be able to issue or accept compact privileges once the compacts become operational, strengthening its commitment to high-quality health care and regulatory efficiency.

Whereas Table 1 captures the Florida licensees, the following Table 1A reflects those coming to Florida from other states through a compact.

Compact and Practitioner Type	Number of Practitioners Authorized to Practice in Florida through a Compact ¹
NLC²	
Registered Nurse Multistate License (MSL)	4,640
Licensed Practical Nurse Multistate License (MSL)	518
PSYPACT³	
Authority to Practice Interjurisdictional Telepsychology (APIT)	12,999
Temporary Authorization to Practice (TAP)	767
TOTAL	18,924

¹The data presented in this table are subject to potential inaccuracies due to the absence of mandatory and uniform collection and reporting requirements for compact commissions. As such, variations in reporting practices and data availability across jurisdictions may impact the comprehensiveness and precision of the statistics provided. These figures should be interpreted with caution, recognizing the inherent limitations associated with the voluntary nature of data submission by compact commissions.

²These MSLs differ from those recorded in Table 5: Upgrade Licenses Issued; This number reflects the number of nurses from other compact states that have voluntarily reported practicing in Florida whereas Table 5 reflects the total number of Florida nurses who have upgraded their licenses to include MSL. While the NLC does represent the number of nurses who have the privilege to practice in Florida, it does not indicate the number of those who are actively utilizing that privilege.

³Practicing unlimited telepsychology under the authority of PSYPACT requires that a psychologist obtain an APIT. Conducting temporary practice under the authority of PSYPACT requires that a psychologist obtain a TAP, which allows for 30 days of face-to-face practice in Florida per calendar year.

Table 2: Summary of Licensed Facilities and Establishments

MQA is responsible for the licensure and regulation of 10 unique types of health care facilities and establishments, ensuring the health, safety, and welfare of the public. To maintain high standards and public trust, MQA continuously enhances its processes for licensing and regulating 23,671 health care facilities and establishments. By implementing advanced technologies and refining regulatory practices, MQA strives to provide a more efficient and effective system, supporting the critical infrastructure of Florida's health care system and ensuring that facilities meet stringent safety and quality standards.

- PROFESSION – Description that identifies the specific profession.
- ACTIVE – Total number of facilities and establishments in Florida in an active status for the correlating profession as of the end of the FY.
- DELINQUENT – Total number of facilities and establishments in Florida in a delinquent status for the correlating profession as of the end of the FY.
- TOTAL – Total number of facilities and establishments in a renewable status for the correlating profession as of the end of the FY.

Table 3: Recognized Continuing Education Providers

CE requirements, also referred to as continuing medical education (CME) requirements are designed to encourage practitioners to maintain their competence, broaden their knowledge base, and stay informed about new and emerging developments in their fields. These requirements ensure that health care professionals remain current with advancements and best practices, ultimately enhancing the quality of care they provide to patients. Health care practitioners must report completed CE/CME course hours to renew their licenses.

- APPROVED AND RULE/STATUTE - Total number of providers, both those that have board approval and those that are approved under rule.
- APPROVED FULL-SINGLE - Providers specifically approved by the board and includes ones that are only approved to offer a single course.
- APPROVED NATIONAL - Number of applications that were approved by rule.
- RECEIVED APPLICATIONS - Number of applications that were received.
- APPROVED APPLICATIONS - Number of applications that were approved.
- APPROVED OUTSIDE - Number of applications that were approved after the ending date of the report request that were received during the fiscal year.
- SUBMITTED COURSES - Number of new courses that were submitted.
- APPROVED NEW COURSES ROUTED - Number of courses that were approved (courses that had to route to board staff for approval).
- APPROVED NEW AUTOACCEPT - Number of courses that were automatically accepted and did not have to have rule approval.
- APPROVED OLD COURSES - Number of courses that were submitted prior to the start of the fiscal year but were approved during the fiscal year.

Table 4: Initial Applications Received and Initial Licenses Issued

In FY 2023-24, MQA received a total of 149,195 initial applications and successfully issued 123,187 initial licenses. This meticulous yet efficient approach underscores MQA's commitment to both maintaining high standards of care and supporting the timely integration of qualified practitioners into the health care system.

- INITIAL LICENSES ISSUED - Number of initial licenses issued during the FY for the correlating profession.
- Professions not listed have no data to report.

Table 5: Upgrade Applications Received and Upgrade Licenses Issued

Health care practitioners have the option to upgrade their licenses to reflect greater qualifications and expanded expertise after their initial license is issued. An upgrade license not only demonstrates the practitioner's advanced skills and knowledge but also enhances the level of care available to the public by providing additional professional services and options. During FY 2023-24, MQA issued 15,994 upgraded health care practitioner licenses, enhancing the qualifications and capabilities of the health care workforce and ensuring higher standards of care for the public.

Table 6: Online Renewals

MQA provides an efficient online renewal process for health care practitioners and facility owners in Florida. Most practitioners and facility owners are required to renew their licenses every two years to remain in good standing. In FY 2023-24, MQA successfully renewed 514,914 licenses, 98.69% of which were renewed online. This streamlined digital process reduces paperwork and administrative tasks, allowing practitioners to focus on patient care, while ensuring they maintain up-to-date credentials.

Table 7: Emergency Orders Issued

PSU reviews cases where a health care practitioner may pose an immediate danger to the health, safety, or welfare of the public. If a health care practitioner is found to be a threat to themselves or others, as outlined under section 120.60(6), Florida Statutes, the Department may restrict or suspend their license through an emergency order. In FY 2023-24, the Department issued a total of 263 emergency orders, where 35.4% were EROs and 64.6% were ESOs. This careful intervention maintains the integrity of the disciplinary process, which is essential for maintaining professional standards within the health care community and helps prevent potential harm to patients that could otherwise lead to severe consequences.

Table 8: Reports Received, Complaints Received, and Investigations Completed

As part of its mission, MQA protects the public by enforcing federal and state laws and rules governing the practice of health care professions and reviewing and investigating complaints against health care practitioners and facilities. In FY 2023-24, MQA received 50,130 complaints and completed 5,250 investigations. There were 5,407 legally sufficient cases, ensuring that only valid concerns are pursued to maintain the integrity and safety of the health care system.

- STATUTORY REPORTS - Number of statutorily required reports during the FY for the correlating profession.
- COMPLAINTS RECEIVED - Number of complaints received during the FY for the correlating profession.
- LEGALLY SUFFICIENT - Number of legally sufficient complaints received during the FY for the correlating profession.
- COMPLETED INQUIRIES - Number of completed inquiries during the FY for the correlating profession.
- COMPLETED INVESTIGATIONS - Number of completed investigations during the FY for the correlating profession.
- COMPLETED INSPECTIONS - Number of completed inspections during the FY for the correlating profession.
- Professions not listed have no data to report.

Table 9: Probable Cause Actions

The Department or each board is tasked with determining probable cause, or sufficient evidence, to initiate formal disciplinary charges against licensed health care practitioners. During FY 2023-24, probable cause was determined in 1,452 cases, representing a 7.9% decrease compared to the previous fiscal year.

- Professions not listed have no data to report.

Table 10: Disciplinary Cases

When licensed health care practitioners and facilities violate the law, the Department or boards have the authority to enforce disciplinary actions. These actions may include fines, reprimands, probation, or suspensions. In FY 2023-24, 1,227 cases were resolved through a final order against health care practitioners, reflecting a 12.8% increase from the prior fiscal year.

Table 11: Medical Malpractice Claims

The Office of Insurance Regulation grants the Department electronic access to all information related to persons licensed under Chapters 458, 459, 461, or 466, as mandated by section 627.912(3), Florida Statutes. The Department examines each report to ascertain whether any incidents leading to a claim involve conduct by the licensee that may warrant disciplinary action, in accordance with section 456.073, Florida Statutes.

- COMPLAINTS RECEIVED - Number of complaints received during the FY for the correlating profession based on unlicensed activity.
- REFERRED FOR INVESTIGATIONS - Number of complaints referred for investigation during the FY for the correlating profession based on unlicensed activity.
- COMPLETED INQUIRIES - Number of completed inquiries during the FY for the correlating profession based on unlicensed activity.
- COMPLETED INVESTIGATIONS - Number of completed investigations during the FY for the correlating profession based on unlicensed activity.
- CEASE AND DESISTS ISSUED - Number of cease and desist orders issued during the FY for the correlating profession based on unlicensed activity.
- REFERRED TO LAW ENFORCEMENT - Number of complaints referred to law enforcement during the FY for the correlating profession based on unlicensed activity.
- Professions not listed have no data to report.

Table 14: Student Loan Defaults

The 2020 legislative session eliminated the requirement that a health care practitioner's license must be suspended if they defaulted on a student loan guaranteed by the state or federal government. This provision was removed by HB 713 (2020)/HB 115 (2020) and was implemented by MQA, effective July 1, 2020.

Table 15: Revenues, Expenditures, and Cash Balances

MQA is required to evaluate revenues, expenditures, and cash balances for the previous fiscal year, as mandated by section 456.026(1), Florida Statutes.

PROFESSION	BEGINNING CASH BALANCE	REVENUES	EXPENDITURES	ENDING CASH BALANCE	UNLICENSED ACTIVITY CASH BALANCE

- NICA is a pass through and is excluded. PRN Student Pilot Project not included.

Table 16: Projected Cash Balances

As part of its long-range planning, MQA provides projected, profession-specific cash balance reports to boards and councils in accordance with section 456.005, Florida Statutes. MQA is dedicated to ensuring that the administrative costs of regulation do not hinder licensed health care practitioners from practicing their profession in Florida.

Pathologist and Audiologist Assistant		2,706		No Cap	\$50	
TOTAL FUND	\$181,867,905	1,142,899	\$159			

- Cost to regulate is computed by adding FY 2024-25 and FY 2025-26 projected expenditures and dividing by the total number of non-delinquent active and inactive licensees eligible to renew as of June 30, 2024.
- Two amounts in the column for fee caps and/or current fees represent two different amounts for active and inactive licensees.
- If there is a projected positive cash balance at June 30, 2030, then the current renewal fee is deemed to be sufficient.
