Attempted the Exam: Number of graduates that make at least one attempt at the exam.

First Attempt Pass: The candidates' very first exposure to the certification examination for each level after the completion of their first education program (i.e., eligible attempt = total attempts) for each level.

Cumulative Third Attempt: Includes the candidates first, second, and third exposure to the certification examination after the completion of their first education program for each level.

Cumulative Sixth Attempt: Includes the candidates first, second, third, fourth, fifth, and sixth exposure to the certification examination after the completion of their first education program for each level. It should be noted that some candidates who failed the certification examination did not attempt the examination again.

Failed All Six Attempts: Number and percent of those who fail the exam six times.

Still Eligible: Candidates who failed the certification examination, once or five times, but are still within their two-year timeframe to attempt the examination again.

Not Eligible: Candidates who failed the certification examination and are no longer within their two-year timeframe to attempt the examination again.

Inclusion Criteria: All candidates seeking initial certification at the EMT level and who completed a certification examination are included in this report. The date the candidate completed their first education program is used to define their cohort. The date range control filters the data based on the date the candidates completed their first education program for a given level.

Exclusion Criteria: Certification examination attempts for which candidates did not show up, refused to sign the non-disclosure agreement required for the examination, were recertifying by examination, transitioning from another level, not seeking national certification (i.e. proficiency evaluation), or related to a lapsed certification were excluded from the current report. For more information on Transitions, see: <https://www.nremt.org/Policies/Certification-Policies/Transition-Policy>.

Data Source: The data for this report is obtained from the National Registry's Internal Database March 2026.
