

FIGHT the BITE

Mosquitoes are more than just a nuisance, **they spread diseases that can make you sick.** Fight the bite by taking steps to control mosquitoes and protect yourself and your family from mosquito-borne illness.

SPRAY

yourself with
mosquito repellent.

COVER

your arms and legs
with clothing.

DRAIN

standing
water.

Stop Mosquitoes from Breeding Around Your Home

At least once a week, empty or cover anything that could hold water, such as:

- Buckets
- Toys
- Child Pools and Covers
- Birdbaths
- Trash and Recycling Bins
- Boat and Car Covers
- Roof Gutters
- Pet Dishes
- Tires

Mosquitoes breed by
laying eggs in and near
standing water.

As little as one bottle cap of water
standing for more than one week is
enough for mosquitoes to multiply.

Individuals with symptoms of fever, chills, sweats, nausea/vomiting, and headache should seek immediate medical attention.
