MISSION

To protect, promote, and improve the health of all people in Florida through integrated state, county and community efforts.

VISION

To be the healthiest state in the nation.

VALUES

I CARE

Innovation

Search for creative solutions and manage resources wisely.

Collaboration

Use teamwork to achieve common goals and solve problems.

Accountability

Perform with integrity and respect.

Responsiveness

Achieve our mission by serving our customers and engaging our partners.

Excellence

Promote quality outcomes through learning and continuous performance improvement.

Executive Summary

The Florida Department of Health (Department) presents this report to the Governor, the President of the Senate, and the Speaker of the House of Representatives, as required by section 383.21625, Florida Statutes. Fetal and Infant Mortality Review (FIMR) is a community level, evidence-based process that reviews fetal and infant deaths, formulates programs, and influences policy that will lead to improving pregnancy and birth outcomes. The goal is to assess, monitor, and improve service systems and resources for women, infants, and families. Each FIMR committee must:

Review and

analyze rates, trends, causes, and other data related to fetal and infant mortality and morbidity in a geographic area.

Develop findings

and recommendations for interventions and policy changes to reduce fetal and infant mortality and morbidity rates.

Engage with local

communities and stakeholders to implement recommended policies and procedures to reduce fetal and infant mortality and morbidity.

Report the findings

and recommendations developed by each FIMR committee to the Department annually.

The report includes findings and recommendations developed by each FIMR committee from fetal and infant deaths that occurred in calendar year 2025, reviewed by FIMR committees during Fiscal Year 2025-2026. The report includes:

- Background of the FIMR program and related Florida Statutes
- Explanation of statewide implementation of FIMR committees
- Summary of the FIMR process, including its relevance to improving fetal and infant outcomes
- Identified factors experienced by families that may increase their risk of poor outcomes
- Summary of statewide and regional data

Background

The Florida Department of Health, Division of Community Health Promotion, Bureau of Family Health Services, Maternal and Child Health Section (MCH) is responsible for coordination and oversight of the FIMR process. The MCH Section contracts with 32 nonprofit Healthy Start Coalitions, and partners with the Department of Health in Desoto County to implement the FIMR process at the local level.

Implementation

FIMR is divided into 21 regions as indicated in Figure 1. Regional implementation allows FIMR committees to identify local opportunities for improvement and to leverage local resources. Multiple factors were considered when determining the regions. These include urban or rural areas, total number of coalitions, available funding, public access to perinatal health care, and average number of fetal and infant deaths that have occurred within the region.

Each FIMR committee will review a varying number of cases each year based on the number of fetal and infant deaths over the previous five-year span.

FIMR Structure

Figure 1. Map of FL-FIMR Regions by County

Figure 1 displays the FL-FIMR regions by county. The Lead Healthy Start Coalitions and Non-Lead Healthy Start Coalitions corresponding to each region can be found on Table 1 and listed under the detailed regional profiles.

FIMR Regional Structure

Table 1. FIMR Regions Leading and Non-Leading Healthy Start Coalitions

FIMR Region	Lead Healthy Start Coalitions	Non-Lead Healthy Start Coalitions
1	Escambia County Healthy Start Coalition, Inc.	Healthy Start Coalition of Santa Rosa County, Inc. Healthy Start Coalition of Okaloosa and Walton Counties, Inc.
2	Bay, Franklin, Gulf Healthy Start Coalition, Inc.	Chipola Healthy Start Coalition, Inc.
3	Capital Area Healthy Start Coalition, Inc.	Gadsden County Healthy Start Coalition, Inc. Healthy Start Coalition of Jefferson, Madison, and Taylor Counties, Inc.
4	Healthy Start of North Central Florida, Inc.	
5	Northeast Florida Healthy Start Coalition, Inc.	
6	The Healthy Start Coalition of Flagler and Volusia Counties, Inc.	Healthy Start Coalition of Seminole County, Inc.
7	Healthy Start Coalition of Orange County, Inc.	
8	Central Healthy Start, Inc.	
9	Healthy Start Coalition of Pasco County, Inc.	
10	Healthy Start Coalition of Pinellas County, Inc.	
11	Healthy Start Coalition of Hillsborough County, Inc.	
12	Healthy Start Coalition of Hardee, Highlands, and Polk Counties, Inc.	
13	The Healthy Start Coalition of Osceola County, Inc.	
14	Healthy Start Coalition of Brevard County, Inc.	
15	Indian River Healthy Start Coalition, Inc.	Healthy Start Coalition of St. Lucie County, Inc. Martin County Healthy Start Coalition, Inc. Okeechobee Healthy Start Coalition, Inc.
16	Healthy Start Coalition of Sarasota County, Inc.	Charlotte County Healthy Start Coalition, Inc. Desoto County Health Department Healthy Start Coalition of Manatee County, Inc.
17	Healthy Start Coalition of Southwest Florida, Inc.	
18	Healthy Start Coalition of Palm Beach County, Inc.	
19	Broward Healthy Start Coalition, Inc.	
20	Healthy Start Coalition of Miami-Dade, Inc.	
21	Florida Keys, Healthy Start Coalition, Inc.	

Note: Some Lead Healthy Start Coalitions (Case Review Team [CRT] Leads) do not have any Non-Lead Coalitions assigned to them.

FIMR Framework

The Department adopted the national FIMR framework, illustrated in Figure 2, as the guide for implementation in Florida. The framework includes an ongoing cycle of improvement that is designed for health care providers, systems, and the community.

Figure 2. FIMR Framework

Data Gathering

- Fetal and infant death certificates and linked birth certificates are delivered electronically each month from Florida's Bureau of Vital Statistics.
- After cases are selected, they are assigned to a medical abstractor to identify pertinent medical and social histories.
- As cases are reviewed, the CRT identifies factors that are considered either protective or possibly contributing to poor outcomes.

Case Review

- The multidisciplinary CRT reviews the case to identify barriers to care and trends in service delivery and ideas to improve policies and services that affect families.
- The CRT examines de-identified cases to find protective factors and barriers to care.
- CRT members include pediatricians, obstetricians (OBs), neonatologists, social workers, Women, Infants, and Children (WIC) staff, hospital administrators, and more.

Community Action

- The Community Action Group (CAG) receives recommendations from the CRT and is charged with developing and implementing plans leading to positive change within the community.
- CAGs identify local and regional partnering organizations, agencies, and individuals who assist in advancing recommendations toward implementation. Each of the 21 regions has one CRT, coordinated by a lead coalition (33 CAGs overall).

Changes in Community Systems

- Changes implemented at the community level result in improved outcomes for families.
- FIMR coalitions demonstrate process changes at the community level that include improvements in policies, procedures, availability of services, and reduction of barriers to access services.
- Through the FIMR process, the community is empowered to positively improve fetal and infant health outcomes.

2025 Infant Mortality Overview

Infant mortality is the death of a live-born baby during the first year of life. The infant mortality rate is the number of infant deaths per 1,000 live births. In 2025, there were 1,266 infant deaths in Florida, resulting in an infant mortality rate of 5.6 deaths per 1,000 live births. This rate was slightly higher than the preliminary national estimate of 5.4 deaths per 1,000 live births (NVSS). Among the 21 Healthy Start coalitions, 11 had rates lower than the state rate, nine had higher rates, and one coalition had the same rate as the state overall. Of these, five regions had rate differences that were statistically significant (Table 2).

Table 2. Infant Mortality Rates by FIMR Region, Florida, 2025 [†] (N=1,266)

Florida[‡]	All 21 Regions	1,266	223,387	5.6	

* Indicates the region rate is statistically significantly different from the statewide rate (infant deaths per 1,000 live births).

‡ State total includes one infant death with unknown county and region.

† Source: FLHealthCHARTS; Includes 2025 provisional data.

As shown in Figure 3, the top five leading causes of infant death in Florida for 2025 were (1) congenital malformations, deformations, and chromosomal abnormalities, (2) disorders related to short gestation and low birth weight (LBW), (3) maternal complications of pregnancy, (4) unintentional injuries, and (5) sudden infant death syndrome (SIDS).

Figure 3. Top Five Leading Causes of Infant Death, Florida, 2025[†] (N=1,266)

† Source: FLHealthCHARTS; Includes 2025 provisional data.

Infant Mortality Characteristics

Table 3 displays infant mortality characteristics by infant age and sex. Infant age is stratified by neonatal period, which refers to an infant's first 27 days of life, and post-neonatal, which refers to infancy between 28 to 364 days of life.

Overall, 66% of infant deaths occurred during the neonatal period, and nearly half of those (48.9%) involved infants less than one day old. In contrast, 34% of infant deaths occurred in the post-neonatal period. Among deaths where the sex of the infant was known, 54% occurred in males and 46% occurred in females.

Infant Characteristic	Deaths	Rate [‡]	Percent
Infant Age			
Neonatal (<28 days)	4,289	3.9	66.0%
Post-neonatal (28-364 days)	2,205	2.0	34.0%
Infant Sex			
Male	3,505	6.2	54.0%
Female	2,989	5.5	46.0%

[†] Source: FLHealthCHARTS; Includes 2025 provisional data.

[‡] Rate = Number of infant deaths per 1,000 live births.

The Florida infant mortality rate declined by 3.3% from 2021 to 2025 (5.9 to 5.7 deaths per 1,000 live births, respectively). During this period, the rate decreased for non-Hispanic White infants (3.9 to 3.4; 12.8%) and non-Hispanic Black infants (11.1 to 10.5; 5.1%), while the rate for Hispanic infants increased (4.8 to 4.9; 2.9%), as shown in Figure 4. Trend analyses showed no statistically significant changes within racial/ethnic groups over time. However, significant differences between groups were identified. Non-Hispanic Black infants exhibited higher mortality than all racial/ethnic groups and the statewide rate, whereas Hispanic infants exhibited higher mortality specifically relative to non-Hispanic White infants.

Figure 4. Infant Mortality Rates by Race and Ethnicity, Florida, 2021-2025[†] (N=6,494)

[†] Source: FLHealthCHARTS; Includes 2025 provisional data.

2025 Fetal Mortality Overview

Fetal mortality, or stillbirth, is the death of a fetus at 20 weeks or more of gestation. The fetal mortality rate is the number of fetal deaths per 1,000 live births plus fetal deaths. In 2025, there were 1,451 fetal deaths in Florida, which translates to a fetal mortality rate of 6.4 deaths per 1,000 live births and fetal deaths. This rate was slightly higher compared to the provisional national rate of 5.4 fetal deaths in 2024 ([NVSS](#)). Among the 21 Healthy Start coalitions, 10 had a lower fetal mortality rate than the state overall rate and 11 had a higher rate. Of these, two regions had rate differences that were statistically significant (Table 4).

REGION	LEAD COALITION	DEATHS	LIVE BIRTHS	RATE	VS. FL
1	Escambia County Healthy Start Coalition, Inc.	54	9,490	5.6	▼
2	Bay, Franklin, Gulf Healthy Start Coalition, Inc.	36	3,694	9.6*	▲
3	Capital Area Healthy Start Coalition, Inc.	36	4,082	8.7	▲

‡ State total includes five fetal deaths with unknown county and region.

† Source: FLHealthCHARTS; Includes 2025 provisional data.

As shown in Figure 5, the top five leading causes of fetal death in Florida for 2025 were (1) complications of placenta, cord, and membranes, (2) unspecified cause, (3) maternal complications of pregnancy, (4) maternal complications that may be unrelated to the present pregnancy, and (5) congenital malformations, deformations, and chromosomal abnormalities.

Figure 5. Top Five Leading Causes of Fetal Death, Florida, 2025[†] (N=1,451)

Fetal Mortality Characteristics

Maternal Characteristic	Deaths	Rate [‡]	Percent
Mother's Age			
Less than 20 years old	328	8.2	4.4%
20-29 years old	2,994	6.2	39.9%
30-39 years old	3,544	6.5	47.3%
More than 39 years old	516	10	6.9%
Mother's Education			
Less than high school	939	8.5	12.5%
High school graduate or GED	2,447	7.1	32.6%
Some College/Associate's Degree	1,748	6.1	23.3%
Bachelor's Degree or Higher	1,611	4.5	21.5%
Trimester Prenatal Care Started			
1st Trimester	4,168	5.6	55.6%
2nd Trimester	774	3.7	10.3%
3rd Trimester	97	1.5	1.3%
No Prenatal Care	746	19.1	10.0%
Interpregnancy Interval			
<18 Months	665	2.8	8.9%
18+ Months	2,179	5.3	29.1%
No Prior Pregnancies	280	0.7	3.7%
High-risk Pregnancy			
Yes	1,567	6.5	20.9%
No	5,929	6.8	79.1%
Pre-pregnancy BMI			
Underweight (<18.5)	170	5.3	2.3%
Normal Weight (18.5-24.9)	1,980	4.8	26.4%
Overweight (25.0-29.9)	1,704	5.5	22.7%
Obese (≥30)	2,437	7.9	32.5%

Table 5 provides an overview of fetal deaths stratified by maternal characteristics. Some maternal characteristics were associated with a higher rate of fetal death, including mothers 40 years old and older, having less than a high school education, receiving no prenatal care, and having a pre-pregnancy BMI greater than or equal to 30.

Table 6 displays fetal deaths stratified by fetal characteristics. Some fetal characteristics were associated with a higher rate of fetal death, including having a weight at delivery of less than 1,500 grams, which is considered very low birth weight (VLBW), as well as having an estimated gestation of less than 32 weeks.

Fetal Characteristic	Deaths	Rate [‡]	Percent
Weight of Fetus at Delivery			
<1,500 grams (VLBW)	4,350	198.1	58.0%
1,500-2,499 grams (LBW)	1,119	13.4	14.9%
2,500+ grams	1,127	1.1	15.0%
Estimated Gestation			
<32 weeks	4,789	200.8	63.9%
32-36 weeks	1,385	13.7	18.5%
37 or more weeks	1,015	1.0	13.5%

[†] Source: FLHealthCHARTS; Includes 2025 provisional data.

[‡] Rate = Number of fetal deaths per 1,000 live births and fetal deaths.

The fetal mortality rate in Florida declined by 10.6% from 2021 to 2025 (7.2 to 6.5 deaths per 1,000 live births and fetal deaths, respectively). During this period, the rate also declined across non-Hispanic White (5.3 to 5.2; 8.1%), non-Hispanic Black (11.4 to 10.7; 5.4%), and Hispanic infants (5.9 to 5.2; 12.2%) (Figure 6). Trend analyses showed no significant changes within racial/ethnic groups; however, significant differences between groups were found. Both non-Hispanic Black and Hispanic infants had an increased risk of death.

Figure 6. Fetal Mortality Rates by Race and Ethnicity, Florida, 2021-2025[†]

[†] Source: FLHealthCHARTS; Includes 2025 provisional data.

Local Level Recommendations

Local CAGs submit annual action plans to the Department. These action plans contain goals, activities, and measurable outcomes. Below is a list of the 10 most common recommendations from the CAG action plans.

1

Provide Consistent Safe Sleep Education: Offer Safe Sleep training at every community event, home visit, and provider encounter.

2

Expand Community Outreach and Partnerships: Engage prenatal and OB providers, county health departments, local restaurants and businesses to deliver infant safety and maternal health education.

3

Increase Distribution of Safety Resources: Provide pack-and-plays, Safe Sleep materials, blood pressure cuffs, fetal movement tools, and multilingual educational content.

4

Strengthen Local Provider Education: Train pediatricians, OBs, midwives, and clinic staff on Safe Sleep, motivational interviewing, and respectful care.

5

Improve Local Care Coordination: Standardize referral scripts, ensure cross-referrals, and coordinate care among home visiting, social work, and medical providers.

6

Enhance Mental Health and Substance Use Screening: Increase depression screening during prenatal and postpartum period, substance use education, and referrals to mental health services.

7

Expand Bereavement Support for Families: Provide memory boxes, grief groups, follow-up near due dates, and support for families after loss.

8

Promote Preconception and Interconception Education: Offer workshops on nutrition, oral health, sexually transmitted infection (STI) prevention, healthy weight, and birth spacing.

9

Increase Infant and Maternal Safety Education: Teach fetal movement tracking, CPR awareness, water safety, illness prevention, and Safe Sleep for all caregivers.

10

Improve Awareness of Local Resources: Update and distribute resource guides, rack cards, waiting-room videos, and social media content to connect families with services.

State Level Improvement Strategies

The Department implements programs and initiatives to improve fetal and infant health outcomes, including the following:

- **Partner With Florida Perinatal Quality Collaborative (FPQC):** Maintain a statewide contract with the FPQC to support birthing hospitals through training and quality improvement initiatives that strengthen maternal and infant health outcomes.
- **Support Local Efforts Through Florida's Healthy Babies Program:** Provide funding to county health departments to enhance maternal and child health activities that directly impact fetal and infant outcomes.
- **Implement and Strengthen Florida's Healthy Start Program:** Deliver statewide care coordination, education, and risk reduction services for pregnant women, infants, and families.
- **Advance Statewide Maternal and Infant Health Initiatives:** Carry out statewide programs such as the Child Abuse Death Review, the State Health Improvement Plan, the Pregnancy Care Network, and A Safe Haven for Newborns to reduce preventable infant deaths and improve family support.
- **Expand Access Through Screening, Home Visiting, and Telehealth:** Implement electronic prenatal screening, support Nurse Family Partnership home visiting, promote stillbirth prevention, and provide telehealth maternity care to reduce barriers and improve pregnancy and birth outcomes.

FL-FIMR Region 1 Activities

Priority	Activity	Outcome
Maternal Health	Through the Healthy Start Fatherhood Program and partnership with local organizations, education on preeclampsia and toxic stress will be provided to the people in mom's social support circles like her partner and parents.	Ten fatherhood clients were educated on how to recognize preeclampsia in their partners.
Safe Sleep	Incorporate 'teach back' in the form of 'Sasha and Sammi' Safe Sleep demonstrations into community outreach events, in particular targeting grandparents and siblings attending the events.	Held 10 community outreach events with Safe Sleep demonstrations using the 'Sasha and Sammi' Cribs for Kids Demonstration Dolls.

FL-FIMR Region 2 Activities

Priority	Activity	Outcome
Substance Use	Create a social media campaign to educate women/families monthly on the risks of using THC during pregnancy and while breastfeeding.	Since 7/1/25, there were 12 posts shared on Healthy Start Facebook and Instagram pages.
Maternal Health	Create interactive activities to promote healthy lifestyle behaviors at the annual baby shower hosted in Bay, Gulf, and Franklin counties. Create a social media campaign highlighting safe activities to do while pregnant to prevent chronic disease and hypertension.	Engaged 336 attendees in pregnancy safe pre-natal exercises and education at the April 16th Healthy Start Baby Shower. Made 25 social media posts, resulting in 3,672 views and 42 shares.
Safe Sleep	Provide Safe Sleep education at the annual baby shower.	Provided education to 336 baby shower attendees.

FL-FIMR Region 3 Activities

Priority	Activity	Outcome
Safe Sleep	Expand the number of Traveling Cribs and their location and create an interactive element that allows participants to receive additional Safe Sleep education and resources.	The Leon County Traveling Crib visited 11 locations, and the Wakulla County crib visited seven.
Maternal Health	Provide education on the importance of seeing postpartum providers to address health concerns, including urgent maternal warning signs, preconception health, breastfeeding support, and mental health.	Education was provided to 1,138 clients by the perinatal navigators on the importance of attending their postpartum appointments.
Preconception Health	Perinatal navigators will provide education related to interconception care to clients at OB offices.	Education was provided to 1,138 clients on interconception care and healthy spacing between pregnancies.

FL-FIMR Region 5 Activities

Priority	Activity	Outcome
Maternal Health	The Northeast Florida Healthy Start Coalition (NEFHSC) will submit a Memorandum of Agreement (MOA) proposal to the Jacksonville Sheriff's Office (JSO) Department of Corrections to establish a pilot Perinatal Project.	An MOU was signed 7/14/25 formalizing terms of our collaboration on a pilot perinatal sustainability project, WHICH, an acronym for Women Heal in Corrections' Healthcare, or TWITCH – Targeting Women in Today Corrections' Healthcare.
Policy Recommendations	Establish an Annual Safe Sleep Education Shopping Depot—a centralized location where community agencies, service providers, and partner organizations can “shop” for educational materials and resources at no cost.	There were 25 community programs, several doulas, and many pregnant and newly delivered moms, and 10 daycare staff from ZIP code areas 32208 and 32209 in attendance at the Annual Safe Sleep Depot.

FL-FIMR Region 6 Activities

Priority	Activity	Outcome
Infant Safety	Distribute Safe Sleep Simulators to agency partners, including training for use.	There were eight Safe Sleep Simulator presentations and 100+ caregivers educated
Safe Sleep	Participate in community events to promote CONNECT, a coordinated referral and navigation system that links families to maternal and child health resources, support home visitation services, and share relevant maternal and child health information with the community.	FIMR participated in eight community events, where staff promoted maternal child health information.
Provider Education	Establish a "CONNECT Zone" or staff placement in at least one additional provider/community office.	FIMR established seven CONNECT Zones.

FL-FIMR Region 7 Activities

Priority	Activity	Outcome
Maternal Health	Implement education regarding prenatal and post-natal care in a variety of formats (e.g., language, audio, visual) throughout community partner facilities (three major hospitals and two local community health centers) by 2026.	Three major hospitals have compiled material and education on Healthy Start services and are ready to share videos. Three hospitals and 60+ OBs have received information on Healthy Start services in languages available. A radio news blast in Orange County was completed earlier this year and a second is in development.

FL-FIMR Region 8 Activities

Priority	Activity	Outcome
Safe Sleep	Conduct a minimum of one Safe Sleep focused media push monthly [includes: push notifications on My Healthy Start app, social media posts, and community events].	Twenty social media posts; One annual report reaching approximately 75 board members, legislators, and community partners.
Preconception Health	Identify or develop a minimum of one educational material that addresses preconceptional and interconceptional health topics commonly found in cases reviewed by regional FIMR. This could include a home visitors field guide, infographics, community presentation materials, handouts, and/or social media posts.	Seven approved social media posts; One flip book obtained and distributed to all counties.

FL-FIMR Region 10 Activities

Priority	Activity	Outcome
Maternal Health	Continue to grow the countywide network of doulas desiring additional support and guidance during pregnancy, delivery, and postpartum.	The doula network has expanded to serve any resident in Pinellas County, with a total of 156 clients served.
Safe Sleep	Promote the Beds 4 Babies program to Pinellas Home Visiting Programs and OB providers.	There were 443 Safe Sleep Kits distributed between the Department, partners, and the coalition.

FL-FIMR Region 11 Activities

Priority	Activity	Outcome
Maternal Health	Continue the Emergency Room Referral Project at Tampa General Hospital (TGH) and expand to St. Joseph's Women's Hospital.	Fifty percent of moms referred and contacted, accepted care coordination services.
Safe Sleep	Expand the TGH Muma Children's Hospital Pediatric Referral Project for infants under 12 months by educating caregivers on Safe Sleep practices during their hospital stay. Add Impaired Parenting, Substance Use, and Sleep Deprivation to expand the Safe Baby Curriculum as advised by FIMR.	Fifty-five percent of the moms referred received Safe Baby education and accepted a referral for services. A total of 563 people received Safe Baby training.
Preconception Health	Provide Neonatal Intensive Care Unit (NICU) case management at St. Joseph's Women's Hospital and explore expansion to TGH.	Baycare home visits averaged 45 visits per month.

FL-FIMR Region 12 Activities

Priority	Activity	Outcome
Maternal Health	Host workshop(s) aimed at educating women of childbearing ages, pregnant women, and expectant fathers on key maternal topics.	As of April 2026, the coalition has hosted and participated in 11 workshops.
Safe Sleep	Attend Safe Sleep task force meetings, take part in community events that promote Safe Sleep, and educate local agencies and families about Safe Sleep practices.	As of April 2026, there were a total of 211 caregivers and community members reached with Safe Sleep education.
Preconception Health	Provide educational material focusing on weight and STIs in prenatal bags and community health events.	As of April 2026, there have been over 1,000 prenatal bags provided, and 21 community health events attended.

FL-FIMR Region 13 Activities

Priority	Activity	Outcome
Maternal Health	Complete a training on screening, including provider requirements, the purpose of the screen, and benefits of referring patients to Coordinated Intake and Referral, annually for all prenatal providers in Osceola County.	More than 75% of the prenatal providers were successfully registered for the electronic prenatal training schedule.
Preconception Health	Distribute 'Get Healthy Before You Get Pregnant' marketing material at attended community events and on social media.	'Get Healthy Before You Get Pregnant' materials were created and distributed at several attended community events and social media posts were made and marketed.

FL-FIMR Region 14 Activities

Priority	Activity	Outcome
Safe Sleep	Distribute education materials at local community events promoting Safe Sleep practices. Provide Safe Sleep educational materials in all prenatal packets to all pregnant women, given to OB offices and in all postnatal packets, given to families at birthing hospitals. A minimum of 600 educational materials will be provided monthly.	There were 850 Safe Sleep educational flyers delivered to families at community events and 450 Sleep Baby Safely bags. There were 10,165 (approximately 847 monthly) Safe Sleep educational flyers delivered to 100% of OB offices, maternal health providers, and birthing hospitals.
Maternal and Infant Health Education	Develop and execute a plan for an educational webinar series that will include maternal and infant health education.	There were 10 live webinars conducted.

FL-FIMR Region 15 Activities

Priority	Activity	Outcome
Maternal Health	Meet with leadership teams of OB/GYN clinics to discuss workflow of care coordination, intake, and referral to ensure face to face engagement with pregnant clients.	Successfully trained 73 individuals in our mini ambassador curriculum.
Provider Education	Meet with appropriate stakeholders in data input for birth and death certificates.	Met with nursing staff at the local hospital facility to learn the process of data entry with birth and death certificates.
Preconception Health	Provide "Healthier You" education to community partners and county residents.	Engaged with two after school programs and have successfully trained 15 individuals in the "Healthier You" curriculum.

FL-FIMR Region 16 Activities

Priority	Activity	Outcome
Safe Sleep	Apply Safe Sleep activities and practices to the Family Safety Alliance's In-Depth Technical Assistance process of reducing stigma and improve "Plans of Safe Care" for individuals who use substances. Apply for grants and obtain more volumes of the Safe Sleep curriculum to provide Safe Sleep training to community partners and agencies. Provide educational opportunities on Safe Sleep that empower staff of organizations that serve high-risk populations, such as individuals with history of substance use.	The Plan of Safe Care pilot officially launched in Sarasota County in the beginning of April 2026. A total of 100 curriculum volumes, along with 1,000 English and 500 Spanish Sleep Baby Safely brochures. A total of 130 individuals, who work with families of young children in Sarasota County, have been trained.

FL-FIMR Region 17 Activities

Priority	Activity	Outcome
Maternal Health	Promote home visiting services through education provider interaction on referral process. Complete outreach office visits with OBs to promote postpartum visit scheduling and adherence. Engage with delivery hospitals to ensure postpartum visits are scheduled prior to discharge. Provide Count the Kicks and baby spacing materials and education to providers and through outreach efforts.	There were 8,456 infant and prenatal intakes completed from 05/01/25 to 04/10/26. There were 13 outreach and technical assistance visits to delivery hospitals, 128 pediatric office visits, and 154 OB office provider visit from 05/01/25 to 04/10/26. There were more than 10,200 educational packets/bags distributed from 05/01/25 to 04/10/26.

FL-FIMR Region 18 Activities

Priority	Activity	Outcome
Maternal Health	Collaborate with CAG members identified to start implementing the distribution of FIMR flyer and/or develop a FIMR page to add to their social media platform to inform on the importance of tending to chronic diseases impacting maternal health.	The FIMR had been invited and participated in seven meetings to share information about fetal and infant mortality prevention.
Safe Sleep	Complete at least 20 outreaches/presentations and collaborate with at least 10 community agencies.	The FIMR brought Safe Sleep materials to all 20 events/presentations.

FL-FIMR Region 19 Activities

Priority	Activity	Outcome
Maternal Health	Increase the outreach of community doulas who will work with women who are pregnant and parenting in high-priority areas.	Fourteen doulas were trained at the first training. A second training held in February trained 15 additional doulas.
Safe Sleep	Continue monthly Safe Sleep Trainings for providers. Promote these trainings in the community. Provide trainings to staff of community health centers.	A total of 22 trainings were held this year.
Policy Recommendations	Promote community educational and health education tools and materials, including content that encompasses medical and mental health during preconception, pregnancy, and postpartum.	"Know Your Rights" for pregnancy childbirth and beyond tool, and "How's Dad?" were disseminated in four languages. Four community baby showers were hosted.

FL-FIMR Region 21 Activities

Priority	Activity	Outcome
Maternal Health	Strengthen and support the local bereavement program to provide timely care for families experiencing pregnancy or infant loss, including partnerships with hospital staff and providers to ensure appropriate referral and follow-up. Provide in-hospital postpartum support in collaboration with the local hospital, WIC, and Healthy Start to assist with breastfeeding, assess Non-medical needs, and connect families with appropriate community services.	There were 13 families served, an ongoing quarterly support group, expanded staffing, and provider engagement initiatives. There were over 300 in-hospital postpartum visits, 40 follow-up breastfeeding support contacts, and a breastfeeding collaborative meeting scheduled to align community partners.
