Florida Arbovirus Surveillance
Week 45: November 8-14, 2026

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV), and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease, is also included. During the period of November 8-14, 2026, the following arboviral activity was recorded in Florida.

WNV activity: One human case of WNV infection was reported in Holmes County. No horses with WNV infection were reported this week. Sixteen sentinel chickens tested positive for antibodies to WNV in Alachua, Bay, Brevard, Citrus, Hernando, Indian River, Leon, Pasco, Pinellas, Sarasota, Sumter, and Walton counties. In 2026, positive samples from eight symptomatic humans, two asymptomatic blood donors, 513 sentinel chickens, five horses, and eight mosquito pools have been reported from 32 counties.

SLEV activity: No human cases of SLEV infection were reported this week. No sentinel chickens tested positive for antibodies to SLEV this week. In 2026, two sentinel chickens have been reported from two counties.

EEEV activity: No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. Two sentinel chickens tested positive for antibodies to EEEV in Bay and Leon counties. In 2026, positive samples from one human, 54 sentinel chickens, and seven horses have been reported from 19 counties.

International Travel-Associated Dengue: Twenty-nine cases of dengue were reported this week. In 2026, 451 travel-associated dengue cases have been reported.

Dengue Cases Acquired in Florida: Twenty-seven cases of locally acquired dengue were reported this week. In 2026, 651 cases of locally acquired dengue and 22 mosquito pools have been reported from 12 counties. Please see page 3 for additional information.

International Travel-Associated Chikungunya Fever Cases: Seven cases of chikungunya fever were reported this week. In 2026, 114 cases of travel-associated chikungunya fever have been reported.

Chikungunya Fever Cases Acquired in Florida: No cases of locally acquired chikungunya fever were reported this week. In 2026, two cases of locally acquired chikungunya fever have been reported from one county.

International Travel-Associated Oropouche Fever cases: No cases of Oropouche fever were reported this week. In 2026, no cases of travel-associated Oropouche fever have been reported.

International Travel-Associated Zika Fever Cases: No cases of Zika fever were reported this week. In 2026, no travel-associated Zika fever cases have been reported.

Zika Fever Cases Acquired in Florida: No cases of locally acquired Zika fever were reported this week. In 2026, no cases of locally acquired Zika fever have been reported.

Advisories/Alerts as of November 14, 2026: Bay, Brevard, Broward, Columbia, Leon, Manatee, Martin, Palm Beach, Polk, Sarasota, and Walton counties are currently under a mosquito-borne illness advisory. Alachua, Citrus, Duval, Hillsborough, Holmes, Miami-Dade, Orange, Pasco, Pinellas and Seminole counties are currently under a mosquito-borne illness alert.

There are currently multiple travel health notices from the Centers for Disease Control and Prevention related to mosquito-borne diseases.

Dengue			Yellow Fever		Chikungunya	Zika	Malaria
Africa and Middle East	Americas	Asia and the Pacific Islands	Americas	Africa	Americas	Asia	Africa and Middle East
Chad	Bolivia	Bangladesh	Colombia	Burkina Faso	Costa Rica	Indonesia	Mayotte
Kenya	Colombia	Cambodia		Côte d'Ivoire	French Guiana		Yemen
	Cuba	Malaysia		Ghana	Nicaragua		
	Ecuador	Marshall Islands					
	Panama	Sri Lanka					
	Peru	Vanuatu					
		Vietnam					
		Wallis and Futuna					

Level 1 Travel Health Notice, Level 2 Travel Health Alert: wwwnc.cdc.gov/travel/notices.

2026 Human Case Summary

2026 West Nile Virus Illness Acquired in Florida: In 2026, eight human cases of WNV illness acquired in Florida have been reported in Alachua (May, August), Duval (August), Columbia (September), Holmes (August, October), Sarasota (October), and Walton (July) counties. Two asymptomatic blood donors have been reported in Duval (August) and Leon (July) counties.

2026 Eastern Equine Encephalitis Acquired in Florida: In 2026, one human case of EEEV illness acquired in Florida has been reported in Leon County (September).

2026 International Travel-Associated Chikungunya Cases: One hundred fourteen cases with onset in 2026 have been reported in individuals with travel history to a chikungunya-endemic area in the two weeks prior to onset. Counties reporting cases were: Alachua, Broward (5), Collier (4), Hernando, Hillsborough (9), Lee, Miami-Dade (73), Monroe (3), Okaloosa, Orange (3), Osceola (2), Palm Beach (5), Pinellas, Seminole, St. Lucie (3), and St. Johns. Countries of origin were Bolivia (2), Brazil (2), Cameroon, Cuba (73), Guyana, Nicaragua (33), Sri Lanka, and Surinam. Two cases were reported in a non-Florida resident.

2026 Chikungunya Cases Acquired in Florida: Two cases of locally acquired chikungunya fever have been reported in Miami-Dade County with onset in August.

2026 International Travel-Associated Dengue Cases: Four hundred fifty-one cases with onset in 2026 have been reported in individuals with travel to a dengue-endemic area in the two weeks prior to onset. Counties reporting cases were: Alachua, Bay, Brevard (6), Broward (20), Citrus, Collier (5), Duval (3), Hendry (2), Hernando, Hillsborough (29), Lake, Lee (20), Manatee (3), Marion (2), Miami-Dade (288), Monroe (4), Orange (8), Osceola (3), Palm Beach (23), Pasco (3), Pinellas (4), Polk (4), Sarasota (2), Seminole (4), St. Johns (4), St. Lucie (8), and Walton. Six cases were reported in non-Florida residents. In 2026, 402 cases of dengue reported in Florida have been serotyped by PCR. Please see the table below for a breakdown of cases by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	DENV-2/ DENV 3	Unknown	Total
Bahamas		2					2
Bangladesh		1	1				2
Brazil		1					1
Colombia	1	1	3	1		3	9
Cuba		335	7	2	1	41	386
Dominican Republic		4				2	6
Ecuador			2				2
El Salvador			3				3

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	DENV-2/ DENV 3	Unknown	Total
Guatemala			1				1
Guyana		2				1	3
India	2	5	2				9
Indonesia		1					1
Laos		1					1
Mexico			2			1	3
Mexico/Honduras			1				1
Nicaragua	1		8			1	10
Peru			3				3
Philippines		1					1
Puerto Rico	2		4				6
Vietnam		1					1
Total	**6**	**355**	**37**	**3**	**1**	**49**	**451**

2026 Dengue Cases Acquired in Florida: In 2026, 651 cases of locally acquired dengue have been reported in Brevard, Broward, Citrus (3), Hillsborough (487), Manatee (2), Miami-Dade (16), Orange (15), Palm Beach, Pasco (6), Pinellas (116), Polk, and Seminole (2) with onset in July (21), August (173), September (296), and October (161). Two cases were reported in non-Florida residents. In 2026, 596 cases have been serotyped by PCR. Please see the table below for a breakdown of cases by county and serotype.

County of Exposure	DENV-2	DENV-3	Unknown	Total
Brevard	1			1
Broward	1			1
Citrus	2		1	3
Hillsborough	449		38	487
Manatee	1		1	2
Miami-Dade	10	4	2	16
Orange	12		3	15
Palm Beach	1			1
Pasco	5		1	6
Pinellas	108		8	116
Polk	1			1
Seminole	1		1	2
Total	**592**	**4**	**55**	**651**

Note: The number of new locally acquired dengue cases under investigation has decreased in recent weeks. As investigations are completed, updates will be reflected in the weekly case counts.

Please note that there is often a delay between when symptoms begin and when a case is reported by the Department. The length of this delay varies by investigation and may be influenced by several factors, including when an individual seeks medical care, the number and type of diagnostic tests needed to confirm infection, and the time required to verify any reported travel history.

2026 International Travel-Associated Malaria Cases: Forty-five cases with onset in 2026 have been reported in individuals with travel history to a malaria-endemic area. Counties reporting cases were: Alachua (2), Broward (7), Duval (5), Hernando, Hillsborough (5), Lee (2), Leon, Marion, Martin, Miami-Dade (6), Orange (5), Palm Beach, Pasco, Pinellas (2), Polk, Seminole (2), St. Johns, and Washington. Four cases were reported in non-Florida residents. Please see the table below for a breakdown of cases by country of origin and *Plasmodium* species.

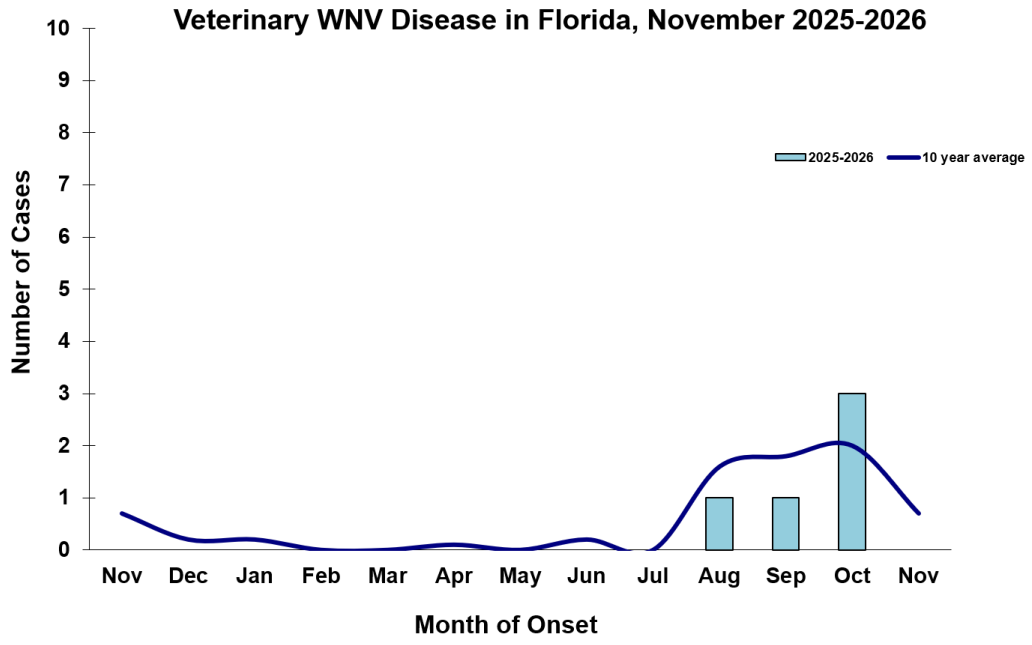

Country of Exposure	*Plasmodium falciparum*	*Plasmodium ovale*	*Plasmodium vivax*	Total
Africa			1	1
Benin	1			1
Cameroon	3	1		4
Côte d'Ivoire	4			4
Gabon	1			1

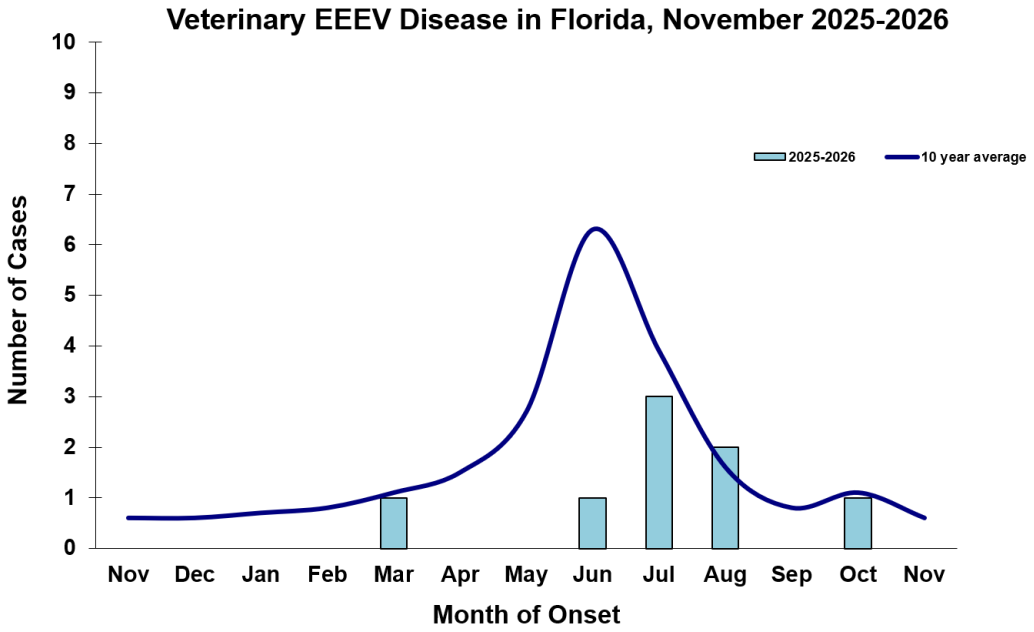

Country of Exposure	*Plasmodium falciparum*	*Plasmodium ovale*	*Plasmodium vivax*	Total
Gambia/Sierra Leona	1			1
Ghana	3			3
India			2	2
Kenya	3			3
Liberia	3			3
Malawi	1			1
Nicaragua			1	1
Nigeria	10			10
Pakistan			1	1
Papua New Guinea			1	1
Sierra Leone	1			1
Sudan	1			1
Tanzania	2			2
Togo	1			1
Uganda	1	1		2
Zambia	1			1
Total	**37**	**2**	**6**	**45**

Veterinary Cases**

**Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

No veterinary cases were reported this week.

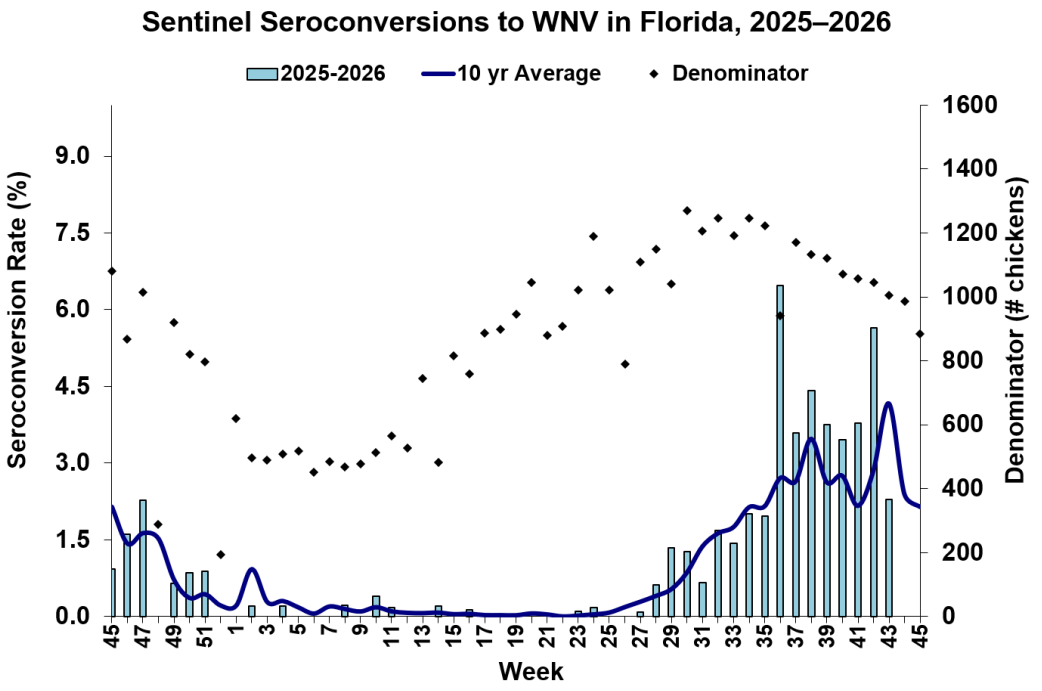

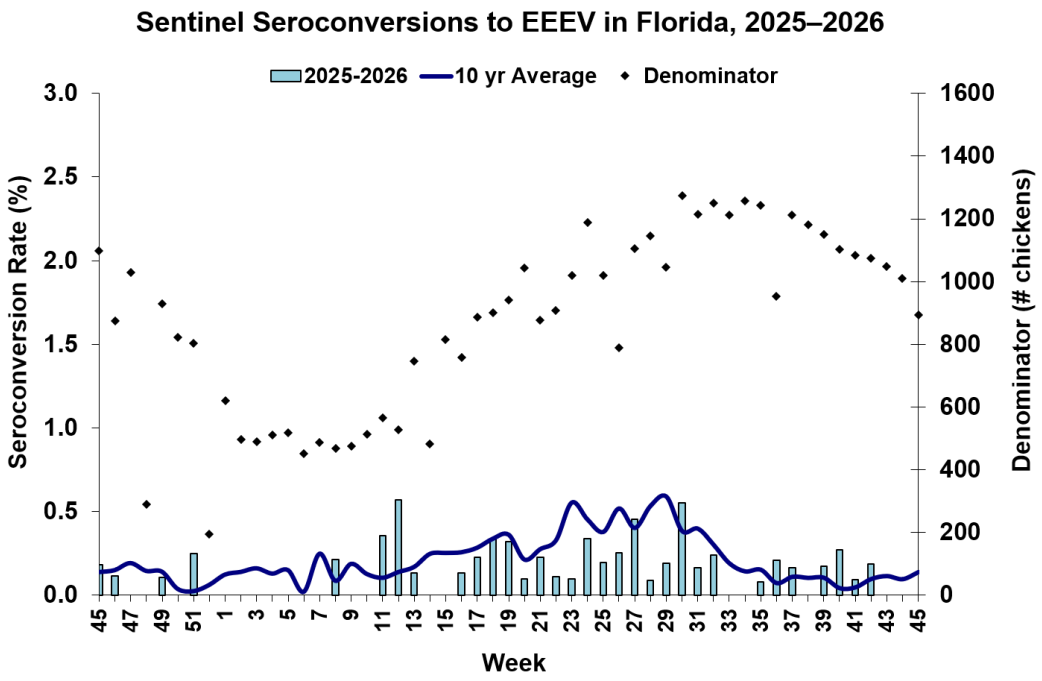

Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Sixteen sentinel chickens tested positive for antibodies to WNV in Alachua, Bay, Brevard, Citrus, Hernando, Indian River, Leon, Pasco, Pinellas, Sarasota, Sumter, and Walton counties. Two sentinel chickens tested positive for antibodies to EEEV in Bay and Leon counties.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Alachua	11/3/2026	11.76		11.76				2 WNV	1 EEEV, 12 WNV
Bay	11/2/2026				6.67	6.67		1 EEEV	1 EEEV, 21 WNV
Brevard	10/29/2026	1.67		1.67				1 WNV	3 EEEV, 1 SLEV, 21 WNV
Citrus	11/3/2026	3.45		3.45				2 WNV	2 EEEV, 22 WNV
Hernando	11/2/2026	4.76		4.76				1 WNV	1 EEEV, 10 WNV
Indian River	10/28/2026	3.23		3.23				1 WNV	1 EEEV, 21 WNV
Leon	11/2/2026				20.00	20.00		1 EEEV	5 EEEV, 19 WNV
Pasco	11/2/2026	8.11		8.11				3 WNV	75 WNV
Pinellas	11/4/2026	2.70		2.70				1 WNV	67 WNV
Sarasota	11/3/2026	4.23		4.23				3 WNV	15 WNV
Sumter	10/29/2026	4.76		4.76				1 WNV	7 WNV
Walton	11/2/2026	1.39		1.39				1 WNV	22 EEEV, 2 HJV, 77 WNV

Mosquito Pools

One mosquito pool tested positive for dengue in Pasco County.

County	Collection Date	Result	Species	County YTD
Pasco	11/9/2026	1 DENV-2	*Ae. aegypti*	2 DENV-2

Dead Birds

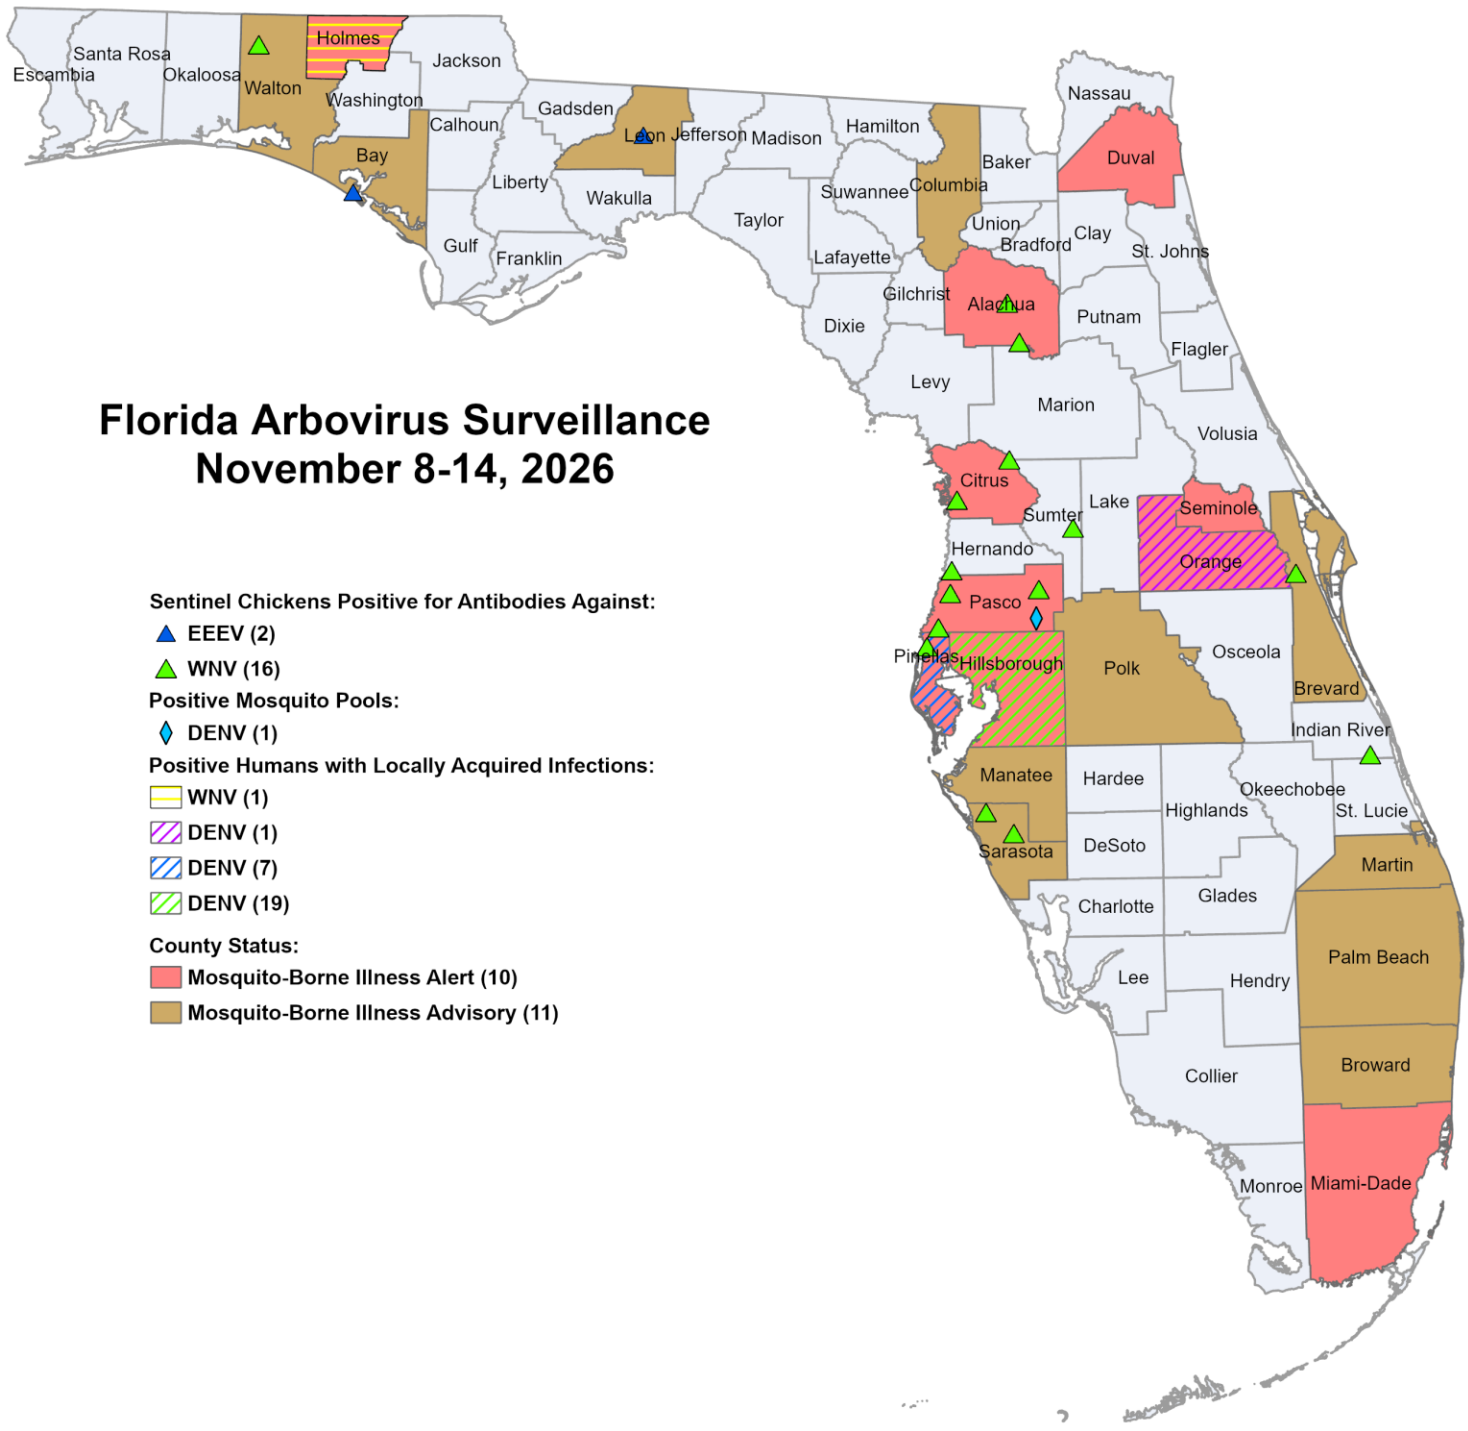

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 38 reports representing a total of 111 dead birds, including one crow, and one raptor were received from 20 counties.

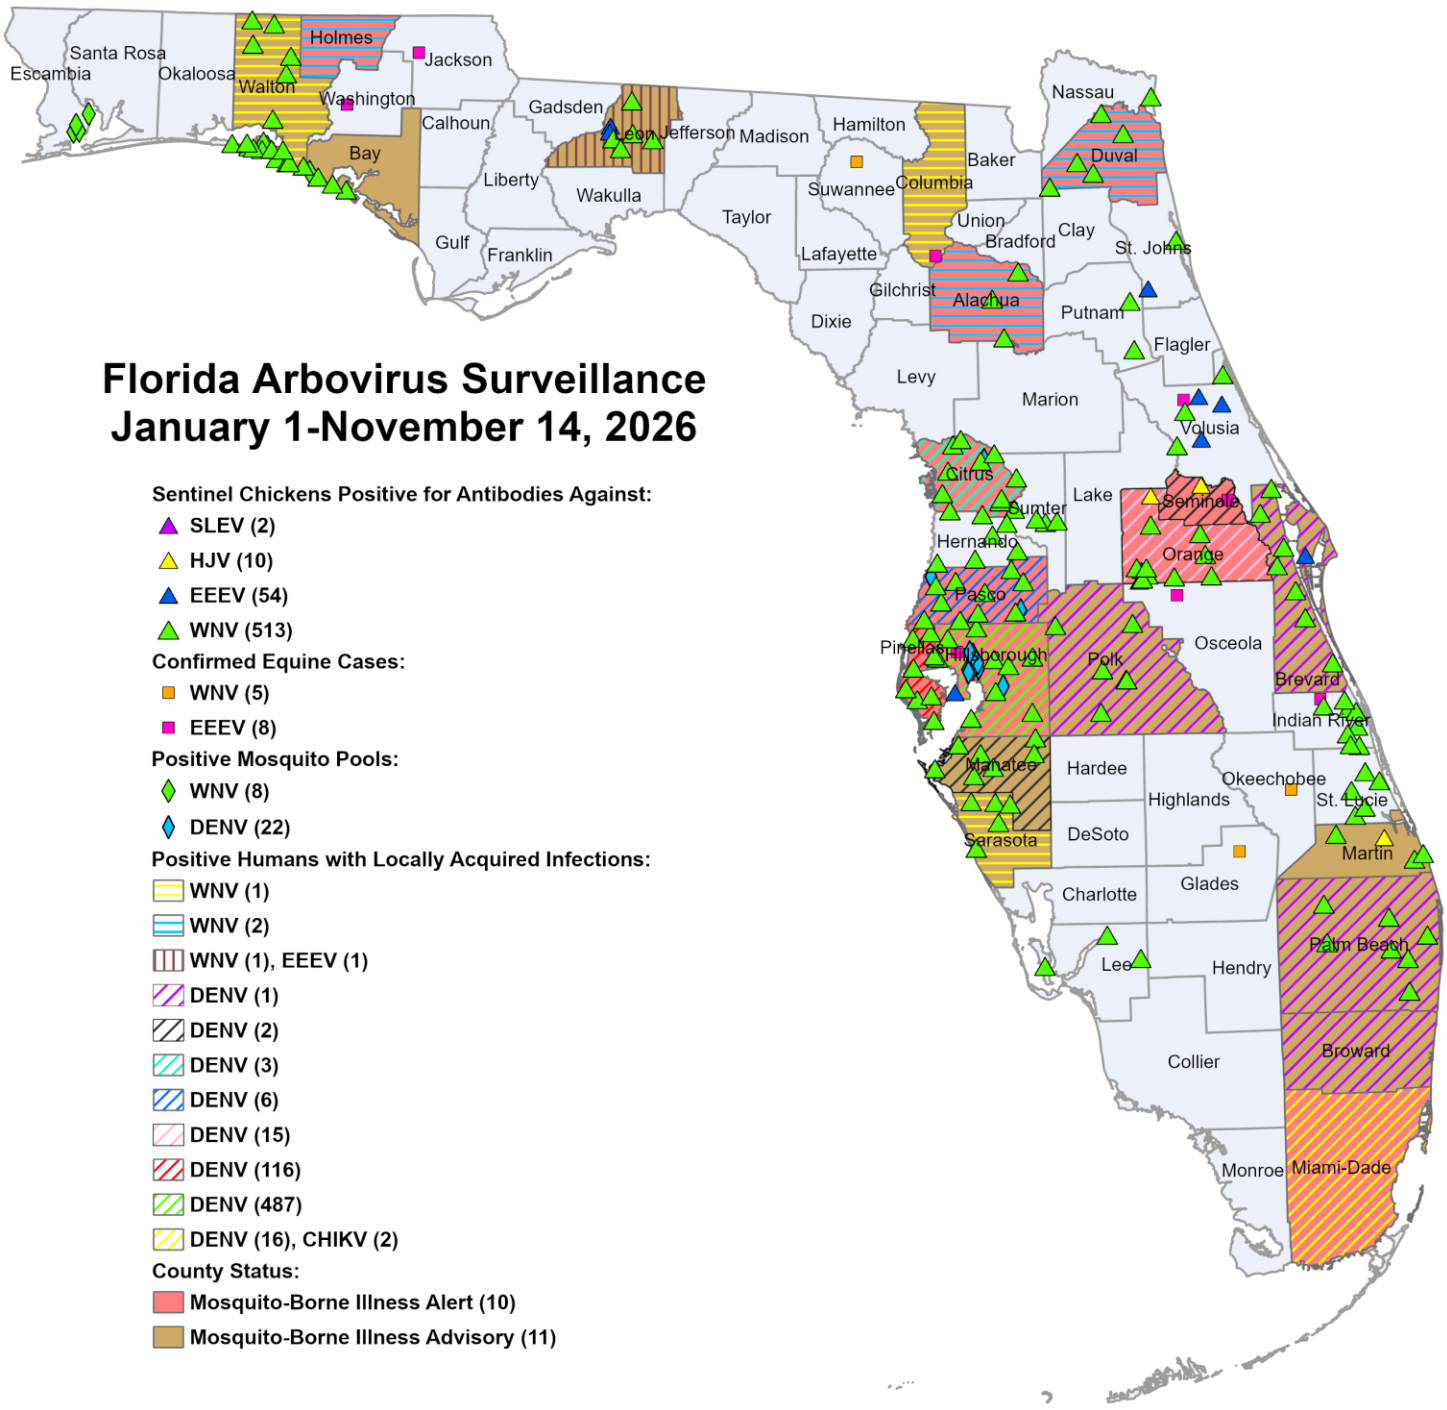

In 2026, 1617 reports representing a total of 3741 dead birds (84 crows, 31 jays, 445 raptors, 192 doves) were received from 54 of Florida's 67 counties.

For more surveillance information, please see the DOH website at: www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html

For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at: www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html. Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
